Lucy and the Rocket Dog Will Buckingham,2017-08-15 The unforgettable story of the bond between a budding scientist and her beloved dog, perfect for fans of *A Wrinkle in Time* and *See You In the Cosmos*. Lucy loves space. She loves to gaze up at the stars and bask in space's bigness and its here, there, and everywhere-ness. She loves it so much that she built a rocket ship in her backyard, hoping that one day she can use it to explore space herself. The ship is just Prototype I, though, so it's not ready to carry anyone into orbit yet. Or so she thinks. Laika doesn't give much thought to space—she is a dog, after all. The thing that Laika loves the most is Lucy. She loves Lucy so much that, one evening, she wanders into Prototype I looking for her—and is promptly launched into space. While Laika takes off on an intergalactic adventure, Lucy begins a lifelong scientific quest to bring her dog home. Told from the two friends' alternating perspectives and, in turns, heartbreaking and hilarious, this tale will win over anyone who has ever loved a pet, or who has looked at the stars and wondered just what might be going on in the here, there, and everywhere-ness. A Library Information Technology Association Excellence in Children's & Young Adult Science Fiction Notable Book "I wish I had this book when I was a kid! It brings you on a fun adventure through the universe and sneaks in some fascinating science along the way."—Emily Calandrelli, Correspondent on *Bill Nye Saves the World* Reminiscent of Roald Dahl's style For those who might enjoy a dog book, a science book, or just a good story.--Kirkus Readers who have ever loved a dog and tinkers who dream of leaving the prototype stage of design will enjoy this tale of friendship and improbable interstellar canine time-bending.--SLJ

Rocket Dog J. M. Napier,2018-06 Inspired by NASA, Elon Musk's SpaceX program, Elton John and some of the author's favorite books growing up (including *Me and My Flying Machine*, *The Story of Ferdinand* and *The Big Orange Splot*), *Rocket Dog* is - on its surface - a lighthearted and inspiring story about space exploration and the friendship between a red bull terrier named Stella and a white bull terrier named Carlos. But the book also touches on deeper issues, including the exploitation of animals for scientific discovery, the complexities of relationships and the conflict that many young children face as they try to figure out where they belong in the world. *Rocket Dog* allows children to use their imaginations and experience the wonders (and terrors) of space exploration through the eyes of a dog. The story communicates the importance of friendship and encourages children to believe in themselves and always shoot for the stars.

How Stella Learned to Talk Christina Hunger, 2021-05-04 INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella "spoke" her first word, and the other breakthroughs they've had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.

In the span of a few years, Soviets sent the first animal into space, the first man, and the first woman. These events were a direct challenge to the United States and the capitalist model that claimed ownership of scientific aspiration and achievement. *Into the Cosmos* shows us the fascinating interplay of Soviet politics, science, and culture during the Khrushchev era, and how the space program became a binding force between these elements.
