Barber's Turn-of-the-Century Houses George F. Barber,2012-03-14 At the turn of the twentieth century, George F. Barber ran a successful architectural firm. Today, surviving examples of Barber's signature designs are the pride of their communities. This architectural snapshot from 1901 features working floor plans and fine drawings of more than eighty of Barber's distinctive dwellings. Specializing in serving a mail-order clientele, Barber's company produced catalogs giving floor plans of a convenient and practical character, and exterior designs of artistic merit in the various prevailing styles. Prepared from long, practical experience, the handsome designs and plans range from the modest to the magnificent, including stately Georgians and colonials as well as snug country homes and seaside cottages. Loaded with spacious kitchens and double parlors as well as porches and balconies of beautiful classic design, this authentic guide will fascinate architectural historians, preservationists, and home restorers, along with anyone interested in Victorian-era architecture.

Interpretable Machine Learning Christoph Molnar,2020 This book is about making machine learning models and their decisions interpretable. After exploring the concepts of interpretability, you will learn about simple, interpretable models such as decision trees, decision rules and linear regression. Later chapters focus on general model-agnostic methods for interpreting black box models like feature importance and accumulated local effects and explaining individual predictions with Shapley values and LIME. All

interpretation methods are explained in depth and discussed critically. How do they work under the hood? What are their strengths and weaknesses? How can their outputs be interpreted? This book will enable you to select and correctly apply the interpretation method that is most suitable for your machine learning project.

RA The Book Vol 1 Roger D'Arcy,Hugh Flynn,2015-02-02 RA:The Book - The Recording Architecture Book of Studio Design was first published as a single, hardcover volume in 2011 and which has sold in over fifty countries to critical acclaim. A necessarily large format dictated by the detailed drawings it contained, RA:The Book was unavoidably heavy and costly to produce and ship. This iBook version is the first of three stand alone volumes which will hopefully make this essential guide to recording studio design more accessible. It includes a new introduction with previously unavailable photographs. The following description is for the original hardcover: Established by Roger D'Arcy and Hugh Flynn on April 1st 1987 Recording Architecture has risen to become one of the premier recording studio design companies in the world. First Commissioned by ex Def Leppard guitarist Pete Willis for Blue Room studios In Sheffield swiftly followed by projects such as Hulgrave Hall, for composer Keith Hopwood the company has grown to design key installations around the world. Now for the first time they will be publishing a history of these ground breaking designs covering all aspects of architectural, acoustic and interior design of these studios and spaces specifically related to sound on a project by project basis. In a Career spanning Three decades Recording Architecture has virtually unrivalled experience in the design of studios which range in size and purpose from classical orchestral, residential, mixing, mastering, post production, film dubbing, video editing and rehearsal studios over 40 countries worldwide. Stating his desire to expand awareness with the new book Roger D Arcy states Over the years, and perhaps surprisingly, the only available books on recording studio design seem to have been written by individuals with little or no qualified background in Architecture or design in the field - we are trying show the detailed architectural/acoustic input behind a successful design with each studio study showing drawings in large format . This is not a theoretical guide but a detailed presentation of tried and tested techniques as applied to real, built projects in many of the case studies, the actual drawings issued for construction are reproduced. The examples illustrate not only what we think should be done but what was in fact physically (and successfully) implemented in a wide variety of situations from small, private project studios to large,

commercial land mark studios such as Lansdowne and CTS. Examples range in scope from individual spaces and rooms to multi studio facilities and cover the two principal strands of recording and mixing: MUSIC studios recording (tracking), mixing and mastering (including cutting) project to orchestral in scale examples have been taken from the private, commercial and educational sectors. POST PRODUCTION studios voice over (dubbing), FX recording (Foley), film mix studios (dubbing theatres) from small voice over studios for TV to large Dolby Premier Certified film mix theatres. Contents include hundreds of photographs together with detailed plans and construction drawings - including comprehensive specifications of materials and techniques - showing exactly how these environments were created.

This book has been written to assist with clarifying target criteria and expanding horizons when it comes to ecological buildings. It is meant as a handbook and source of reference for clients, architects, planners and building operators, to provide them with pertinent information about their design, construction and operation: how to do this in the most energy-efficient and economical

manner? Also, there is feedback and documentation about prominent buildings like the Hamburg Dockland or the Landesbank Baden-Wuerttemberg in Stuttgart. Further, there are insightful interviews with architects and clients about many important buildings, which help turn this book into an integrated source of reference for sustainable architecture. - A Guideline for Planning, Construction and Operation of sustainable Buildings - A source of reference for clients, architects, planners and building operators - Innovative architectural examples with sustainable concepts and design
