The Last Lecture Randy Pausch,2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned—about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. We cannot change the cards we are dealt, just how we play the hand. —Randy Pausch A lot of professors give talks titled The Last Lecture. Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—Really Achieving Your Childhood Dreams—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because time is all you have . . . and you may find one day that you have less than you think). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

"Listening to your mum's voice can make your day". An explorative study about the social functions of voice messages in messaging apps for international students Lisa Fritsch, 2020-01-08 Master's Thesis from the year 2019 in the subject Communications - Interpersonal Communication, grade: 1,6, European University Viadrina Frankfurt (Oder), language: English, abstract: Since 2013, voice messages can be sent using messaging services such as WhatsApp. Thus, the oral information transfer enters the digital messenger communication, which was previously exclusively based in written form. In German research of communication and linguistics, there are few scientists who have so far dealt with voice messages. They present a new challenge for the media linguistic conception of digital communication, as they fall into a gap between oral and written language utterances. The linguistics professor Katharina König emphasizes this decisive new aspect: With the integration of voice messages[...] media orality enters the non-simultaneous, quasi-synchronous messenger communication. Voice messages bring a kind of 'answering machine' option to messenger chats. How does this change digital communication? What are the social functions for the interpersonal exchange of them? These questions were investigated as part of a qualitative research, for which 20 international students between the ages of 20 and 34 were interviewed in Paris and Sofia. The selection of this sample favors the preservation of a homogeneous group of young adults in the same life situation. The research results showed that, despite the different countries of origin, the students have a similar usage of voice messages. The main benefit of voice messages is that they can be sent faster and easier and are therefore particularly practical in stressful situations. The speed allows more complex information to be recorded in less time. Furthermore, the increased emotionality through one's own voice and consequently a bigger intimacy between two chat partners, play an important role in the social functions of voice messages.
