The Valuation of Digital Intangibles Roberto Moro-Visconti, 2022-08-31 This book offers an updated primer on the valuation of digital intangibles, a

trending class of immaterial assets. Startups like successful unicorns, as well as consolidated firms desperately working to re-engineer their business models, are now trying to go digital and to reap higher returns by exploiting new intangibles. This book is innovative in its design and concept since it tackles a frontier topic with an original methodology, combining academic rigor with practical insights. Evaluation issues are increasingly based on an analytical comprehension of augmented business models and virtual function analysis, nurtured by real-time big data. The impact of digitalization on scalable business models is the main competitive advantage factor of the BigTechs and other Unicorns, representing a target for startups and the reengineering of traditional firms. The transition from the Internet to the metaverse represents the last frontier, showing how 3D virtual and augmented reality impacts social networking. The second edition of this book updates the contents of the first edition while comprehensively introduces these innovative topics--such as the metaverse, cloud storage, multi-sided digital platforms, ESG-compliance, and value co-creation patterns of digitized stakeholders--and demonstrates how best practices can be applied to specific asset appraisals, making it of interest to researchers, students, and practitioners alike.

Transfer Pricing and Developing Economies Joel Cooper, Randall Fox, Jan Loeprick, Komal Mohindra, 2017-01-05 Recent years have seen unprecedented public scrutiny over the tax practices of Multinational Enterprise (MNE) groups. Tax policy and administration concerning international transactions, aggressive tax planning, and tax avoidance have become an issue of extensive national and international debate in developed and developing countries alike. Within this context, transfer pricing, historically a subject of limited specialist interest, has attained name recognition amongst a broader global audience that is concerned with equitable fiscal policy and sustainable development. Abusive transfer pricing practices are considered to pose major risk to the direct tax base of many countries and developing

countries are particularly vulnerable because corporate tax tends to account for a larger share of their revenue. This handbook is part of the wider WBG engagement in supporting countries with Domestic Resource Mobilization (DRM) by protecting their tax base and aims to cover all relevant aspects that have to be considered when introducing or strengthening transfer pricing regimes. The handbook provides guidance on analytical steps that can be taken to understand a country's potential exposure to inappropriate transfer pricing (transfer mispricing) and outlines the main areas that require attention in the design and implementation of transfer pricing regimes. A discussion of relevant aspects of the legislative process, including the formulation of a transfer pricing policy, and the role and content of administrative guidance, is combined with the presentation of country examples on the practical application and implementation of the arm's length principle and on running an effective transfer pricing audit program. Recognizing the importance of transfer pricing regulation and administration for the business environment and investor confidence, this handbook aims to balance the general objective of protecting a country's tax base and raising additional revenue with investment climate considerations wherever appropriate.

The taxation issues covered include the following: - upstream oil and gas and mining taxes; - incentives for renewable energy; - carbon taxes and emission trading regimes; - dividend, interest, and royalty flows; - foreign tax credits; - permanent establishments; - mergers and acquisitions; - taxation issues for derivatives and hedging; - transfer pricing; - regional purchasing, marketing, service, and intangible property structures; - free trade agreements and customs unions; - dispute resolution; and - tax administration and risk management.
