Overcoming AIDS Donald E. Morisky,W. James Jacob,Yusuf K. Nsubuga,Steven J. Hite,2006-06-01 As a result of the AIDS epidemic, many nations around the world have faced the demands of caring for a particularly vulnerable population of children, the orphans of parents who have died of AIDS or whose caregivers are terminally ill from the disease. Overcoming AIDS: Lessons Learned from Uganda offers an in-depth exploration of this global issue and provides a broad focus on evolving a constructive response to the HIV/AIDS epidemic. This collaborative resource is the fourth in the Research in Global Child Advocacy book series, and it offers readers a glimpse into the experience of HIV/AIDS infected and affected people from the perspective of researchers, policy makers, and professionals who diligently work toward crafting a framework for action that is integrated across disciplines. Despite the enormity and intensity of the problem, chapter authors share a commitment to advocate for a better world in which social and economic disparities do not preclude children from experiencing a future that is bright with potential opportunities and hope.

**Minimally Invasive Uro-Oncologic Surgery** Robert G. Moore,Jay T. Bishoff,2005-01-25 The invention of laparoscopic urological techniques in the early 1990s was met with scepticism by urologists who demanded that the methods prove themselves when compared to established 'open' surgical procedures. However, the techniques were quickly shown as successful, and over time have gained acceptance through reproducible and durable outcomes. In this well-illustrated surgical text, an international team of urologic surgeons specializing in uro-oncology share the experience gained in effective and reproducible teaching techniques in the field, and present the pioneering knowledge that will enable others to learn more about this important, ground-breaking procedure.
