The Spanish Connection Eberhard Crailsheim, 2016-09-12 In early modern times, the city of Seville was the most important entrepôt between the Old and the New World, attracting numerous merchants from all of Europe. They provided the American market with European merchandise, especially with textiles and metalware from Flanders and France. This book investigates the networks of Flemish and French merchants in Seville, displaying overall structures of trade as well as collective strategies of both merchant colonies.

*Why We Play* Roberte Hamayon, 2016 Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called Games, echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. Playing is no 'doing' in the ordinary sense once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise ?

**Metrology in Urban Drainage and Stormwater Management: Plug and pray** Francois Clemens, Jean-Luc Bertrand-Krajewski, 2021-08-15 This book presents the advancements made in applied metrology in the field of Urban Drainage and Stormwater Management over the past two decades in scientific research as well as in practical applications. Given the broadness of this

subject (measuring principles, uncertainty in data, data validation, data storage and communication, design, maintenance and management of monitoring networks, technical details of sensor technology), the focus is on water quantity and a sound metrological basis. The book offers common ground for academics and practitioners when setting up monitoring projects in urban drainage and storm water management. This will enable an easier exchange of results so as to allow for a faster scientific progress in the field. A second, but equally important goal, is to allow practitioners access to scientific developments and gained experience when it comes to monitoring urban drainage and storm water systems. In-depth description of international case studies covering all aspects discussed in the book are presented, along with self-training exercises and codes available for readers on a companion website.

**In the Metro** Marc Augé, 2002 Tourists climb the Eiffel Tower to see Paris. Parisians know that to really see the city you must descend into the metro. In this revelatory book, Marc Augé takes readers below Paris in a work that is both an ethnography of the city and a personal narrative. Guiding us through history, memory, and physical space, Augé juxtaposes the romance of the metro with the reality of multiethnic urban France. His work is part autobiography, with impressions from a lifetime riding the trains; part meditation on self and memory reflected in the people and places underneath Paris; part analysis of a place where the third world and the first world meet, where remnants of cultures move and press together; and part a reflection on anthropology in an era of globalization and urban development. Although he is a pillar of French thought, *In the Metro* is Augé's first major critical and creative work translated into English. It shows him to be firmly rooted in a tradition of literary ethnography that reaches back to Claude Lévi-Strauss and Michel de Certeau, but also engaged in current theoretical debates in literary and cultural studies. In Augé's idiosyncratic and innovative approach, the act of observing the quotidian is elevated to an art. The writer and his history become part of the field he observes, and anthropology interacts with a site -- urban life -- usually reserved for sociology and cultural studies. Throughout, Augé reveals a passion for his milieu, seeing the metro as a place rich with history and literature -- an eclectic egalitarian society.

Different Times? Archaeological and Environmental Data from Intra-Site and Off-Site Sequences Zoï Tsirtsoni, Catherine Kuzucuoğlu, Philippe Nondédéo, Olivier Weller, 2020-06-18 Proceedings from Session II-8 of the XVIII UISPP Congress, Paris, 2018, questioning temporal correlations between intra-site and off-site data in archaeology-related contexts. The word 'site' describes here archaeological sites - usually settlements - where recent research has produced information on the duration and timing of human presence.

**The Jeu d'Adam** Christophe Chaguinian, 2017-11-30 The *Jeu d'Adam* is an Anglo-Norman mid-twelfth-century representation of several biblical stories, including the temptation of Adam and Eve and the subsequent fall, Cain and Abel, and the prophets Isaiah and Daniel. Its framework builds on the Latin responses of the mass during the liturgical season of Septuagesima, from before Lent to Easter. This collection of essays explores whether this early play was monastic or secular, its Anglo-Norman character, and the text's musical provenance.

**Royal Power in the Late Carolingian Age** Horst Löfflein, 2020-10-09 The prevalent image of the late Carolingian age is one of decline and fall. Charles III the Simple's (893/898-923) rule, which has hardly received any scholarly attention since the late 19th century, is perceived to have been the classic example of this development. Enthroned by rebels as well as cast down by a rebellion he is said to have been a weak ruler, powerless in the face of the ambitions of the nobles of the West Frankish realm. Yet, what do weak and powerless mean? In modern scholarship, early medieval rule is understood not as a question of command and obedience but as the result of cooperation between rulers and nobles. Thus, royal actions, such as the defence of the realm against the Northmen, interactions with other rulers or in regard to conflicts with or between the nobles, are reflections of the relations between the ruler and the circle of nobles around him. A ruler's power therefore depended on his ability to integrate the most powerful nobles into his rule, to mediate between their interests and to create consensus over the course of action. Based on this view, a new assessment of Charles the Simple's rule, the circle of nobles around him, the actions taken by him and thus his royal power is provided in this study, with the rules of his predecessors since the death of Charles the Bald in 877 serving as a basis for comparison.
