**The Political Economies of Media** Dwayne Winseck,Dal Yong Jin,2012-05-08 The contributors show that digital media are disrupting entire media industries, but without erasing the past and insist that one media sector is not the same as the next. Transnational Television in Europe Jean K. Chalaby,2009-02-19 Today transnational TV networks count among television's most prestigious brands and rank among Europe's leading TV channels. This is the first, dynamically told story of the extraordinary journey of transnational television in Europe from struggling origins to its present day boom. It is based in extensive research into the international television industry and makes full use of its author's remarkable access to leading industry figures, from Sky and Turner to Discovery and BBC World.The tale begins with a few cross-border TV channels, who fought hostile governments, faced antagonism from the broadcasting establishment and provoked the contempt of advertisers. But, Jean Chalaby argues, the planets came into alignment for pan-European television in the late 1990s, when a transnational shift in European broadcasting was produced. He shows how transnational television and globalization have transformed one another, and how transfrontier TV networks reflect - and help sustain - a global economic order in which the connection between national territory and patterns of production and distribution have broken down.

**Markets and Myths** Anthony Weymouth,Bernard Lamizet,2014-06-03 Market and Myths: Forces for Change in the European Media is the first introductory text to provide a detailed analysis of the European Media in five major Western European countries within the context of a theoretical framework. Issues such as the continuing role of public service broadcasting and the extent to which a process of Europeanisation has occurred within the Media are examined in a clear accessible style which will make this book essential reading for all those with an interest in the European Media.

**Media Training in Transition Countries** Sam Swan,2022-03-23 This book explores the impact of, and lessons learned from, media development and training programs sponsored by the US government and non-governmental organizations in countries transitioning to democracy. Recognizing the importance of establishing a free press and a free market economy in newly democratic societies, this book examines the training of journalists and media managers in selected countries in Eastern Europe, Africa, Asia, the Middle East, and South America. Drawing on the author's and other media trainers' experiences over a 25-year period, this book provides important insights into tailoring training programs to specific regions and countries. Case studies describe training in radio and television management, broadcasting, and media sustainability, and are contextualized against the cultural and historical backgrounds of each region. Media Training in Transition Countries will be of interest to media trainers, government and nongovernment agencies, and scholars and students of international journalism and development.

News in the Global Sphere Ingrid Volkmer,1999 Ingrid Volkmer argues that the new global exchange can be regarded as a trans-societal sphere of mediation, which involves a global exchange of universal but also - increasingly - particular news and political information issues. This new diverse global information flow provides the communication platform, on which a global civil society emerges.
