Fast After 50 Joe Friel, 2015-01-10 *Fast After 50* is for every endurance athlete who wants to stay fast for years to come. For runners, cyclists, triathletes, swimmers, and cross-country skiers, getting older doesn't have to mean getting slower. In his groundbreaking book *Fast After 50*, Friel offers a smart approach for athletes to ward off the effects of age. Running the Dream Matt Fitzgerald, 2020-05-05

The bestselling author of *80/20 Running* and *How Bad Do You Want It?* reveals his inspiring and surprising journey to see just how fast he can go. Matt Fitzgerald has been running (and writing

about running) for most of his adult life. But, like many passionate amateur runners, he never felt he was quite fulfilling his potential. If he follows the training, nutrition, and lifestyle of an elite runner, just how fast could he go? In his mid-forties, Matt at last has the freedom to do nothing but train, if only for the span of one summer. The time is now. He convinces the coach of Northern Arizona Elite, one of the country's premier professional running teams, to let him train with a roster of national champions and Olympic hopefuls in the running mecca of Flagstaff, Arizona, leading in to the Chicago Marathon. The results completely redefined Matt's notion of what is possible, not only for himself but for any runner. Filled with a vibrant cast of characters, rigorous and quad-torching training, and a large dose of self-deprecating humor, Matt's gripping account of his "fake pro runner" experience allows us to partake in the dream of having the chance to go all the way. Yet for the gifted young runners Matt trains with, it's not a dream but concrete reality, and their individual stories enrich this inspiring narrative. Running the Dream pulls us into the rarified world of professional running in a way we can all relate to, regardless of speed, and to take away pieces of one man's amazing journey to try to achieve our own potential.

The Happy Runner Roche, David,Roche, Megan,2018-11-15 Is your daily run starting to drag you down? Has running become a chore rather than the delight it once was? Guided by their personal experiences and coaching expertise, they point out the mental and emotional factors that will help you learn exactly how to become a happy runner and achieve your personal best.

Runner's World Run Less Run Faster Bill Pierce,Scott Murr,2021-01-19 Finally, runners at all levels can improve their

race times while training less, with the revolutionary Furman Institute of Running and Scientific Training (FIRST) program. Hailed by the Wall Street Journal and featured twice in six months in cover stories in Runner's World magazine, FIRST's unique training philosophy makes running easier and more accessible, limits overtraining and burnout, and substantially cuts the risk of injury, while producing faster race times. The key feature is the 3 plus 2 program, which each week consists of: -3 quality runs, including track repeats, the tempo run, and the long run, which are designed to work together to improve endurance, lactate-threshold running pace, and leg speed -2 aerobic cross-training workouts, such as swimming, rowing, or pedaling a stationary bike, which are designed to improve endurance while helping to avoid burnout With detailed training plans for 5K, 10K, half marathon, and marathon, plus tips for goal-setting, rest, recovery, injury rehab and prevention, strength training, and nutrition, this program will change the way runners think about and train for competitive races. Amby Burfoot, Runner's World executive editor and Boston Marathon winner, calls the FIRST training program the most detailed, well-organized, and scientific training program for runners that I have ever seen.

Basic Marathon Training Don Garber, 2004 Provides a guide to running a marathon, including equipment, training, diet, and injury prevention.

The Little Red Book of Running Scott Douglas, 2011-06-29 running.

The Beginning Runner's Handbook Ian MacNeill, SportMedBC, 2011-12-20 This easy-to-use, practical guide helps runners safely build strength and endurance, get motivated and set realistic goals, choose the proper footwear and clothing, eat right, and avoid injury. Completely updated, this fourth edition contains a wealth of new material. A revised RunWalk program gives runners a choice between running 10K or covering the distance by running and walking. A whole new

chapter on preparing for charity runs reflects the popularity of getting fit while giving back to the community. There are expanded and enhanced sections with cross-training options such as trail running and bootcamp sessions; information on running through pregnancy; facts about barefoot running, minimalist shoes and shorter strides lengths, plus links to online sources of information and running communities. Combining advice from the experts, training tips and testimonials from runners of all ages, *The Beginning Runner's Handbook* is a step-by-step road map for achieving running success.

80/20 Triathlon Matt Fitzgerald, David Warden, 2018-09-18 A breakthrough program for triathletes -- beginner, intermediate, and advanced -- showing how to balance training intensity to maximize performance -- from a fitness expert and elite coach. Cutting-edge research has proven that triathletes and other endurance athletes experience their greatest performance when they do 80 percent of their training at low intensity and the remaining 20 percent at moderate to high intensity. But the vast majority of recreational triathletes are caught in the so-called moderate-intensity rut, spending almost half of their time training too hard--harder than the pros. Training harder isn't smarter; it actually results in low-grade chronic fatigue that prevents recreational athletes from getting the best results. In *80/20 Triathlon*, Matt Fitzgerald and David Warden lay out the real-world and scientific evidence, offering concrete tips and strategies, along with complete training plans for every distance-- Sprint, Olympic, Half-Ironman, and Ironman--to help athletes implement the 80/20 rule of intensity balance. Benefits include reduced fatigue and injury risk, improved fitness, increased motivation, and better race results.

Run Like a Pro (Even If You're Slow) Matt Fitzgerald, Ben Rosario, 2022-03-01 Cutting-edge advice on how to achieve your personal best, for everyone from casual runners to ultramarathoners. In *80/20 Running*, respected running and

fitness expert Matt Fitzgerald introduced his revolutionary training program and explained why doing 80 percent of runs at a lower intensity and just 20 percent at a higher intensity is the best way for runners at all levels--as well as cyclists, triathletes, and even weight-loss seekers--to improve their performance. Now, in this eye-opening follow-up, Fitzgerald teams with Olympic coach Ben Rosario to expand and update the 80/20 program to include ultramarathon training and such popular developments as the use of power meters. New research has bolstered the case that the 80/20 method is in fact that most effective way to train for distance running and other endurance sports. *Run Like a Pro (Even If You're Slow)* shows readers how to take the best practices in elite running and adopt them within the limits of their own ability, lifestyle, and budget.

Smart Marathon Training Jeff Horowitz, 2011-10-01 Old-school marathon training plans ask runners to crank out 70 to 100 miles a week. It's no wonder those who make it to the start line are running ragged. *Smart Marathon Training* maps out a healthier, more economical approach to training that emphasizes quality over quantity. With more than 75 detailed exercises plus six easy-to-follow training plans for half and full marathons, *Smart Marathon Training* will get you to the starting line feeling refreshed and ready to run your best race yet. This innovative program eliminates junk miles, paring down training to three essential runs per week and adding a dynamic strength and cross-training program to build overall fitness. Runners will train for their best performance in less time and avoid the injuries, overtraining, and burnout that come from running too much. *Smart Marathon Training* builds up a runner's body to resist injury. Runners gain the strength they need to run long using functional exercises that target the hips, glutes, and quads. Running is a full-body sport, so this training program also builds a strong core and upper body to avoid injuries that begin above the waist. No one fakes a marathon or half-marathon--everyone has to

do the work. But Smart Marathon Training replaces long, grinding miles with low-impact cross-training. Horowitz outlines a cycling plan to complement run workouts, boosting base fitness while saving runners' bodies for their best runs.
