Maharashtra Human Development Report 2012: TOWARDS INCLUSIVE HUMAN DEVELOPMENT Jayachandran Usha, Kurian, Oommen C, Suryanarayana M. H., D. P. Singh, Anuja Jayaraman, 2014 The present Maharashtra Human Development Report (MHDR) 2012 keeps the spirit of the Eleventh and Twelfth Five Year Plans of 'faster, sustainable and more inclusive growth' at the core of its analysis. MHDR 2002 was the state's first effort in focusing on the prevailing human development scenario in the spheres of growth, poverty, equity, education, health and nutrition. Since then the state has come a long way in the last decade, achieving near-complete enrolments at the primary school level, a wide coverage of health infrastructure and initiation of new incentives, to name a few. The 2012 Report goes beyond being just a situation-analysis of the current human development scenario to a more analytical exercise in facilitating a deeper understanding of what and where the inequalities are, how capabilities can be enhanced, what has been the progress, where the shortfalls are and where the thrust of efforts to promote human development should be. Recognizing the centrality of inclusive growth processes to human development, the need to study human development outcomes disaggregated by gender, rural-urban, regional and social groups is the focal point of this Report. The outcome would be the identification of specific human development goals, evidence-based policy recommendations and directions to how those excluded from the growth and human development processes can be included to reap the benefits of the same.

Land of Sunshine, State of Dreams Gary R Mormino, 2008-09-01 Florida is a story of astonishing growth, a state swelling from 500,000 residents at the outset of the 20th century to some 16 million at the end. As recently as mid-century, on the eve of Pearl Harbor, Florida was the smallest state in the South. At the dawn of the millennium, it is the fourth largest in the country, a megastate that was among those introducing new words into the American vernacular: space coast, climate control, growth management, retirement community, theme park, edge cities, shopping mall, boomburbs, beach renourishment, Interstate, and Internet. Land of Sunshine, State of Dreams attempts to understand the firestorm of change that erupted into modern Florida by examining the great social, cultural, and economic forces driving its transformation. Gary Mormino ranges far and wide across the landscape and boundaries of a place that is at once America's southernmost

state and the northernmost outpost of the Caribbean. From the capital, Tallahassee--a day's walk from the Georgia border--to Miami--a city distant but tantalizingly close to Cuba and Haiti--Mormino traces the themes of Florida's transformation: the echoes of old Dixie and a vanishing Florida; land booms and tourist empires; revolutions in agriculture, technology, and demographics; the seductions of the beach and the dynamics of a graying population; and the enduring but changing meanings of a dreamstate. Beneath the iconography of popular culture is revealed a complex and complicated social framework that reflects a dizzying passage from New Spain to Old South, New South to Sunbelt.

Resources in education ,1984-07

Social Policy in China Chan, Chak Kwan,Ngok, Kinglun,David

Phillips,2008-02-13 This much-needed new textbook introduces readers to the development of China's welfare policies since its conception of an open-door policy in 1978. Setting out basic concepts and issues, including key terms and the process of policy making, it overcomes a major barrier to understanding Chinese social policy. The book explores in detail the five key policy areas of employment, social security, health, education and housing. Each is examined using a human well-being framework comprising both qualitative and quantitative data and eight dimensions: physical and psychological well-being, social integration, fulfilment of caring duties, human learning and development, self-determination, equal value and justice. This enables the authors to provide not only factual information on policies but also an in-depth understanding of the impact of welfare changes on the quality of life of Chinese people over the past three decades. A major strength of the book lies in its use of primary Chinese language sources, including relevant White Papers, central and local government policy documents, academic research studies and newspapers for each policy area. There are very few books in English on social policy in China, and this book will be welcomed both by academics and students of China and East Asian studies and comparative social policy and by those who want to know more about China's social development.

Food Security and Safety Volume 2 Olubukola Oluranti Babalola,Ayansina

Segun Ayangbenro,Omena Bernard Ojuederie,2022-11-16 Sustainable food production is a global challenge with respect to climate change and an ever-increasing world population. Conventional crop production using agrochemicals presents human health and environmental challenges. Rising concerns about environmental sustainability have increased attention toward improved, efficient, and sustainable means of crop production. Various strategies are employed in enhancing crop production to adapt and mitigate climate change and ensure food security. The future of food production relies on improving productivity without compromising long-term productivity and environmental sustainability. Feeding the ever-increasing world population would require concerted efforts by all stakeholders to combat the impact of climate change and numerous ecological challenges facing food production. Hence, innovative technologies and methods are indispensable in mitigating the effects on food security. The book looks at the current challenges and solutions, from an African perspective, regarding food safety and health management, food security and nutrition, climate change and sustainable food production, and forest resources and food security. The target audience is scientists, graduate students, researchers, academicians, and professionals in food

production for sustainable development and ecosystem management. This book will also be helpful to policymakers and specialists in framing future feasible agro-ecosystem policies.

Leisure and Power in Urban China Unn Målfrid Rolandsen, 2011-03-31 *Leisure and Power in Urban China* is the first comprehensive study of leisure activities in a medium size Chinese city. Hitherto, studies of Chinese leisure have focused on holidays, festivals and tourism. This, however, is a study of the kinds of leisure that take place on regular workdays in a local environment of Quanzhou city. In doing so, *Leisure and Power* introduces leisure studies to China studies, and data from China to the field of Leisure studies. Based on interviews with people from all walks of life and case studies from bookshops, internet bars, Karaoke parlours, streets and public squares, Rolandsen brings to attention the importance of fun and socializing in the lives of Chinese urbanites. Central to the study is the contrast between popular practices and official discourse. Rolandsen provides in-depth analyses of the moralist PRC leisure ethic so characteristic of official Chinese publications and news media. Using examples from everyday life as a contrast, this study demonstrates that official propaganda has but little influence on how Chinese individuals lead their lives. Taking leisure as a point of departure, this book describes the new kinds of interaction between the local party-state and the population it seeks to govern. This book will be of interest to students and scholars of Chinese Studies, Leisure Studies, Urban Studies and Asian Studies in general.

Biomedical Index to PHS-supported Research ,1987

Asian Tigers, African Lions ,2013-10-02 *Asian Tigers, African Lions* is an anthology of contributions by scholars and (former) diplomats related to the 'Tracking Development' research project, funded by the Netherlands Ministry of Foreign Affairs, and coordinated by the African Studies Centre and KITLV, both in Leiden, in collaboration with scholars based in Africa and Asia. The project compared the performance of growth and development of four pairs of countries in Southeast Asia and Sub-Saharan Africa during the last sixty years. It tried to answer the question how two regions with comparable levels of income per capita in the 1950s could diverge so rapidly. Why are there so many Asian tigers and not yet so many African lions? What could Africa learn from Southeast Asian development trajectories?

Nutritional and Health Aspects of Food in the Balkans Alina-Ioana Gostin, Diana Bogueva, Vladimir Kakurinov, 2021-05-21 *Nutritional and Health Aspects of Food in the Balkans* s introduces and analyzes traditional foods from the Balkans. Beginning with the eating habits in Balkans, this book unfolds the history of use, origin, compositions and preparation, ingredient origin, nutritional aspects, and the effects on health for various foods and food products of the region. *Nutritional and Health Aspects of Food in the Balkans* also addresses local and international regulations and provides suggestions on how to harmonize these regulations to promote global availability of these foods. A volume in a series co-produced with Global Harmonization Initiative, *Nutritional and Health Aspects of Food in the Balkans* is sure to be a welcomed reference for nutrition researchers and professionals, including nutritionists, dieticians, food scientists, food technologists, toxicologists, regulators, and product developers as well as educators, and students. Analyzes nutritional and health claims in the Balkan region Includes traditional foods from the Balkans Explores both scientific

and anecdotal diet-based health claims Examines if foods meet regulatory requirements and how to remedy noncompliance Reviews the influence of historical eating habits on today's diets

American Agriculturist ,1874

The Routledge Companion to Intangible Cultural Heritage Michelle L. Stefano, Peter Davis, 2016-12-08 This collection provides an in-depth and up-to-date examination of the concept of Intangible Cultural Heritage and the issues surrounding its value to society. Critically engaging with the UNESCO 2003 Convention for the Safeguarding of the Intangible Cultural Heritage, the book also discusses local-level conceptualizations of living cultural traditions, practices and expressions, and reflects on the efforts that seek to safeguard them. Exploring a global range of case studies, the book considers the diverse perspectives currently involved with intangible cultural heritage and presents a rich picture of the geographic, socioeconomic and political contexts impacting research in this area. With contributions from established and emerging scholars, public servants, professionals, students and community members, this volume is also deeply enhanced by an interdisciplinary approach which draws on the theories and practices of heritage and museum studies, anthropology, folklore studies, ethnomusicology, and the study of cultural policy and related law. The Routledge Companion to Intangible Cultural Heritage undoubtedly broadens the international heritage discourse and is an invaluable learning tool for instructors, students and practitioners in the field.
