Quebec in a Global Light Robert

Calderisi, 2019-07-15 To the outside world, Quebec is Canada's most distinctive province. To many Canadians, it has sometimes seemed the most troublesome. But, over the last quarter century, quietly but steadily, it has wrestled successfully with two of the West's most daunting challenges: protecting national values in the face of mass immigration and striking a proper balance between economic efficiency and a sound social safety net. Quebec has also taken a lead in fighting climate change. Yet, many people - including many Quebecers - are unaware of this progress and much remains to be done. These achievements, and the tenacity that made them possible, are rooted in centuries of adversity and struggle. In this masterful survey of the major social and economic issues facing Quebec, Robert Calderisi offers an intimate look into the sensitivities and strengths of a society that has grown accustomed to being misunderstood. In doing so, he argues that the values uniting Quebecers - their common sense, courtesy, concern for the downtrodden, aversion to conflict, and mild form of nationalism, linked to a firm refusal to be homogenized by globalization - make them the most Canadian of all Canadians.

Theology, Music, and Modernity Jeremy Begbie, Daniel K. L. Chua, Markus Rathey, 2021-02-02 Theology, Music, and Modernity addresses the question: how can the study of music contribute to a theological reading of modernity? It has grown out of the conviction that music has often been ignored in narrations of modernity's theological

struggles. Featuring contributions from an international team of distinguished theologians, musicologists, and music theorists, the volume shows how music--and discourse about music--has remarkable powers to bring to light the theological currents that have shaped modern culture. It focuses on the concept of freedom, concentrating on the years 1740-1850, a period when freedom--especially religious and political freedom--became a burning matter of concern in virtually every stratum of Western society. The collection is divided into four sections, each section focusing on a key phenomenon of this period--the rise of the concept of 'revolutionary' freedom; the move of music from church to concert hall; the cry for eschatological justice in the work of black hymn-writer and church leader Richard Allen; and the often fierce tensions between music and language. There is a particular concern to draw on a distinctively 'Scriptural imagination' (especially the theme of New Creation) in order to elicit the key issues at stake, and to suggest constructive ways forward for a contemporary Christian theological engagement with the legacies of modernity today.

Global Land Grabs Marc Edelman, Carlos

Oya, Saturnino M. Borrás Jr., 2016-03-22 Since the 2008 world food crisis a surge of land grabbing swept Africa, Asia and Latin America and even some regions of Europe and North America. Investors have uprooted rural communities for massive agricultural, biofuels, mining, industrial and urbanisation projects. 'Water grabbing' and 'green grabbing' have further exacerbated social tensions. Early analyses of land grabbing focused on foreign actors, the biofuels boom and Africa, and pointed to catastrophic consequences for the rural poor. Subsequently scholars carried out local case studies in diverse world regions. The contributors to this volume advance the discussion to a new stage, critically scrutinizing alarmist claims of the first wave of research, probing the

historical antecedents of today's land grabbing, examining large-scale land acquisitions in light of international human rights and investment law, and considering anew longstanding questions in agrarian political economy about forms of dispossession and accumulation and grassroots resistance. Readers of this collection will learn about the impacts of land and water grabbing; the relevance of key theorists, including Marx, Polanyi and Harvey; the realities of China's involvement in Africa; how contemporary land grabbing differs from earlier plantation agriculture; and how social movements—and rural people in general—are responding to this new threat. This book was published as a special issue of Third World Quarterly.

Advances in Intelligent Traffic and Transportation Systems M. Shafik, 2023-04-25

Intelligent traffic and transport systems combine the skills and management technologies of engineering, artificial intelligence, information technology and telecommunications to improve the efficiency of traffic and transport, benefitting the environment by reducing air and noise pollution and helping to create traffic free zones in cities. The management of public transport systems and vehicle fleets can also be improved by the provision of on-line information and better communication. This book presents the proceedings of ICITT2022, the 6th International Conference on Intelligent Traffic and Transportation, held in Paris, France from 25 – 27 September 2022. ICITT is a major annual event for the academics, researchers and industrialists engaged in intelligent traffic and transportation research, and is a friendly and inclusive platform that

brings together a broad community of researchers sharing the common goal of developing and managing the engineering and technology key to sustaining the success of the intelligent traffic and transportation industries. The theme of the 2022 conference was Smart Digital Traffic and Transportation, and the book includes 15 papers, selected after a rigorous peer-review process. The papers are divided into 4 sections, which cover intelligent traffic and transportation; transportation in future smart cities; mobility and cyber-physical systems; and intelligent automation and ICT-enabled collaborative global systems. Covering a wide range of topics, the book will be of interest to all those working in the field of intelligent traffic and transportation.
