**Memoirs of a Grandmother** Pauline Wengeroff,2010-06-25 Pauline Wengeroff, the only nineteenth-century Russian Jewish woman to publish a memoir, sets out to illuminate the cultural history of the Jews of Russia in the period of Jewish enlightenment, when traditional culture began to disintegrate and Jews became modern. Wengeroff, a gifted writer and astute social observer, paints a rich portrait of both traditional and modernizing Jewish societies in an extraordinary way, focusing on women and the family and offering a gendered account (and indictment) of assimilation. In Volume 1 of Memoirs of a Grandmother, Wengeroff depicts traditional Jewish society, including the religious culture of women, during the reign of Tsar Nicholas I, who wished his Jews to be acculturated to modern Russian life.

Russia's Own Orient Vera Tolz,2011-02-10 Russia's own Orient examines how intellectuals in early twentieth-century Russia offered a new and radical critique of the ways in which Oriental cultures were understood at the time. Out of the ferment of revolution and war, a group of scholars in St. Petersburg articulated fresh ideas about the relationship between power and knowledge, and about Europe and Asia as mere political and cultural constructs. Their ideas anticipated the work of Edward Said and post-colonial scholarship by half a century. The similarities between the two groups were, in fact, genealogical. Said was indebted, via Arab intellectuals of the 1960s who studied in the Soviet Union, to the revisionist ideas of Russian Orientologists of the fin de siècle. But why did this body of Russian scholarship of the early twentieth century turn out to be so innovative? Should we agree with a popular claim of the Russian elites about their country's particular affinity with the 'Orient'? There is no single answer to this question. The early twentieth century was a period when all over Europe a fascination with things 'Oriental' engendered the questioning of many nineteenth-century assumptions and prejudices. In that sense, the revisionism of Russian Orientologists was part of a pan-European trend. And yet,

Tolz also argues that a set of political, social, and cultural factors, which were specific to Russia, allowed its imperial scholars to engage in an unusual dialogue with representatives of the empire's non-European minorities. It is together that they were able to articulate a powerful long-lasting critique of modern imperialism and colonialism, and to shape ethnic politics in Russia across the divide of the 1917 revolutions.

**Reimagining Border in Cross-border Education** Neeta Inamdar, Pranjali Kirloskar, 2023-08-14 Universities are inherently and definitionally universal in their quest for the creation and dissemination of knowledge. They are set to defy borders that exist in parochial forms. Globalization which opened up borders has by design or default created inequalities and imbalances in knowledge systems. Undoubtedly, knowledge is power but there is difference in the power that is intrinsic to it and the power that is ascribed which is determined by dominant political and economic hierarchies. If knowledge predominantly flows from global north to global south, people seeking knowledge move from global south to global north. These imbalances are also seen within these regions, between cultures and communities, one claiming superiority over the other. These realities call for a reassessment of not only what constitutes knowledge, but also what encompasses the idea of borders. This book elaborates on the inclusive role of education that can act as an equalizer or as a catalyst for creating a level playing field across borders. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan)

*Study Abroad and Second Language Use* Valerie A. Pellegrino Aveni, 2005-03-10 Language plays an essential role in how we portray our personalities. Through social interaction, others develop a picture of us based on our linguistic cues. However, when we interact in a foreign language and in a new country, limitations in linguistic and cultural knowledge can make self-presentation a more difficult task. This book explores the problems faced by language students embarking on study abroad programmes, spending time in a foreign country and having to interact – and express their personalities – in a second language. Drawing on her extensive work with students, Valerie Pellegrino Aveni explores the factors that complicate self-presentation and the strategies students use for overcoming these, looking in particular at issues of anxiety, control, age, gender, risk-taking and self-esteem. Offering rich insights into the study abroad experience, this book will be an invaluable resource for professionals in second language acquisition, and for teachers and students preparing for study abroad.

*A Farewell to the West?* Barin Kayaoğlu, Willem Th. Oosterveld, Rob de Rave, Nicholas Farnham, 2017-02-20 Still in dangerous waters since the shock of the attempted military coup in July 2016, the behavior of The Republic of Turkey – long considered an important strategic partner for the West – has become increasingly unpredictable. Could Turkey really bid “adieu” to the West in coming years, or perhaps even months? What kinds of paths lay ahead of a possible Turkish “pivot” away from the West? What does this mean for the West’s strategic interests in the region? Authored by Dr. Barin Kayaoğlu of the American University of Iraq, this year’s study entitled “A Farewell to the West? Turkey’s Possible Pivot in the Aftermath of the July 2016 Coup Attempt” explores the conditions that could lead Turkey to change its foreign policy direction in the near future, exploring four distinctive possibilities that could all have important implications for Europe, and the wider world. This study is part of the 2016-2017 HCSS StratMon.

**Phraseology** Sylviane Granger, Fanny Meunier, 2008-06-01 Long regarded as a peripheral issue, phraseology is now taking centre stage in a wide range of fields. This recent explosion of interest undoubtedly has a great deal to do with the development of corpus linguistics research, which has both demonstrated the key role of phraseological expressions in language and provided researchers with automated methods of extraction and analysis. The aim of this volume is to take stock of current research in phraseology from a variety of perspectives: theoretical, descriptive, contrastive, cultural, lexicographic and computational. It contains overview chapters by leading experts in the field and a series of case studies focusing on a wide range of multiword units: collocations, similes, idioms, routine formulae and recurrent phrases. The volume is an invitation for experienced phraseologists to look at the field with different eyes and a useful introduction for the many researchers who are intrigued by phraseology but need help in finding their way in this rich but complex domain.
