Subterranean LP James Rollins, 2010-12-21 Beneath the ice at the bottom of the Earth is a magnificent subterranean labyrinth, a place of breathtaking wonders—and terrors beyond imagining. A team of specialists led by archaeologist Ashley Carter has been hand-picked to explore this secret place and to uncover the riches it holds. But they are not the first to venture here—and those they follow did not return. There are mysteries here older

than time, and revelations that could change the world. But there are also things that should not be disturbed—and a devastating truth that could doom Ashley and the expedition: they are not alone. With all the trademark elements that have made James Rollins a bestselling author around the world—pulse-pounding adventure, scientific intrigue, nail-biting suspense—*Subterranean* deserves a place in every thriller lover's collection. Even if you've read it before, you won't want to put this classic Rollins down.

The Last Oracle James Rollins, 2009-10-13 In this superb thriller from #1 New York Times bestselling author James Rollins, Sigma Force must battle a group of rogue scientists who have unleashed a diabolical project that could bring about the extinction of mankind. Salvation . . . or annihilation? What if scientists could bio-engineer the next great world prophet—the next Buddha, Mohammed, or even Jesus? Would it mark the Second Coming or initiate a chain reaction leading to the end of mankind? Formed during the Cold War, a think tank of world scientists known as the JASONS have discovered a way to manipulate and enhance autistic children who show savant talents—mathematical geniuses, statistical masterminds, brilliant conceptual artists. Yet among their young patients a strange side-effect begins to arise. Before it can be analyzed fully, a rogue group of the JASONS begins their own secret experimentation with a cadre of the best children. Their goal, to create a world prophet for the new millennium, one who can be manipulated to create a

new era of global peace . . . a peace on their own terms, that is. But such manipulation has grim consequences as a biological meltdown among the children begins to occur—turning the innocent into something far more frightening. To stop the JASONS before they engineer the extinction of mankind, Commander Gray Pierce of SIGMA Force races against time to solve a mystery that dates back to the first famous oracle of history—the Greek Oracle of Delphi. But can the past save the future?

Diary of a Med Student Daniel B Azzam, Ajay N Sharma, 2020-09-04 From the earliest stages of our medical training, we experience unforgettable moments with our patients - inspiring, traumatic, joyful, and sometimes even humorous events. Too often, as doctors-in-training we talk about the suffering or recovery of our patients, ignoring our own emotions after these events, letting them passively shape us until we dig ourselves into an abyss of burn out and resentment. *Diary of a Med Student* is a book created by medical students, for medical students, doctors, pre-med students, and their loved ones to look backward, forward, and laterally on the wonderful world of medical school. This book offers a space to reflect on our emotions, process their meaning, and share them as tales of sorrow, humor, joy, or inspiration, told from the perspective of medical students writing in a diary. While the act of sharing emotion is itself therapeutic, reading these emotional challenges that we can all relate to is unifying and comforting, providing us

with insight through the lessons conveyed in the light of a variety of feelings. Let this book spark a powerful domino effect of change in medical education: in the way we teach physicians to create a safe space for inner reflection and expression of emotion to ultimately enhance physician wellness.

The Information Needs of Communities Steven Waldman, 2011 In 2009, a bipartisan Knight Commission found that while the broadband age is enabling an information and communications renaissance, local communities in particular are being unevenly served with critical information about local issues. Soon after the Knight Commission delivered its findings, The Federal Communications Commission (FCC) initiated a working group to identify crosscurrents and trends, and make recommendations on how the information needs of communities can be met in a broadband world. Steven Waldman and the FCC Working Group on the Information Needs of Communities produced this report, addressing the rapidly changing media landscape in a broadband age. The Information Needs of Communities looks not only at the changing face of media, but also at the relevant policy and regulatory situations, including

the track record of the FCC. Finally, the report offers policy suggestions to help create the best media system ever seen.

Hollowed Out Jeremy S. Adams, 2021-08-03 Do teachers have a front row seat to America's decline? Jeremy S. Adams, a teacher at both the high school and college levels, thinks so. Adams has spent decades trying to instill wisdom, ambition, and a love of learning in his students. And yet, as he notes, when teachers get together, they often share an arresting conclusion: Something has gone terribly wrong. Something essential is missing in our young people. Their curiosity seems stunted, their reason undeveloped, their values uninformed, their knowledge lacking, and most worrying of all, their humanity diminished. Digital hermits of a sort unfamiliar to an older generation, they have little interest in marriage and family. They largely dismiss—and are shockingly ignorant of—religion. They sneer at patriotism, sympathize with riots and vandalism, and regard American society and civilization as so radically flawed that it must be dismantled. Often friendless and depressed, they eat alone, study alone, and even “socialize” alone. Educators like Adams see a generation slipping away. The problems that have hollowed out our young people have been festering for years. A year of COVID-19 lockdowns and social distancing have magnified them. The result could be a generation—and our nation's future—lost in a miasma of alienation and stupefaction. In his stunning new book, Hollowed Out, Jeremy S. Adams reveals why students have rejected the wisdom, culture, and institutions of Western civilization—and

what we can do to win them back. Poignant, frightening, and yet inspiring, this is a book for every parent, teacher, and patriot concerned for our young people and our country

The Influence of Teachers John Merrow, 2011 How can schools and teachers change to keep up with the current educational landscape, a world in which young people must learn how to ask the right questions, not merely parrot back the 'right' answers? In this urgent and insightful book, John Merrow draws on his experience as a reporter for PBS and NPR to examine this question and others, and offer possibilities and solutions for a new education system. Told through warm storytelling and compelling case studies, Merrow paints a vibrant and inspiring picture of why and how we must transform - not reform - our schools.

How I Met My Monster Amanda Noll, 2019-11-03 One night, when Ethan reaches under his bed for a toy truck, he finds this note instead: Monsters! Meet here for final test. Ethan is sure his parents are trying to trick him into staying under the covers, until he sees five colorful sets of eyes blinking at him from beneath the bed. Soon, a colorful parade of quirky, squeaky little monsters compete to become Ethan's monster. But only the little green monster, Gabe, has the perfect blend of stomach-rumbling and snorting needed to get Ethan into bed and keep him there so he falls asleep—which as everyone knows, is the real reason for monsters under beds. With its perfect balance of giggles and shivers, this silly-spooky prequel to the award-winning I Need

My Monster and Hey, That's MY Monster! will keep young readers entertained.

Trapped Under the Sea Neil Swidey, 2015-02-17 The harrowing story of five men who were sent into a dark, airless, miles-long tunnel, hundreds of feet below the ocean, to do a nearly impossible job—with deadly results. A quarter-century ago, Boston had the dirtiest harbor in America. The city had been dumping sewage into it for generations, coating the seafloor with a layer of “black mayonnaise.” Fisheries collapsed, wildlife fled, and locals referred to floating tampon applicators as “beach whistles.” In the 1990s, work began on a state-of-the-art treatment plant and a 10-mile-long tunnel—its endpoint stretching farther from civilization than the earth’s deepest ocean trench—to carry waste out of the harbor. With this impressive feat of engineering, Boston was poised to show the country how to rebound from environmental ruin. But when bad decisions and clashing corporations endangered the project, a team of commercial divers was sent on a perilous mission to rescue the stymied cleanup effort. Five divers went in; not all of them came out alive. Drawing on hundreds of interviews and thousands of documents collected over five years of reporting, award-winning writer Neil Swidey takes us deep into the lives of the divers, engineers, politicians, lawyers, and investigators involved in the tragedy and its aftermath, creating a taut, action-packed narrative. The climax comes just after the hard-partying DJ Gillis and his friend Billy Juse trade assignments as they head into the tunnel, sentencing one of them to death. An intimate portrait of the wreckage left in the wake

of lives lost, the book—which Dennis Lehane calls extraordinary and compares with *The Perfect Storm*—is also a morality tale. What is the true cost of these large-scale construction projects, as designers and builders, emboldened by new technology and pressured to address a growing population's rapacious needs, push the limits of the possible? This is a story about human risk—how it is calculated, discounted, and transferred—and the institutional failures that can lead to catastrophe. Suspenseful yet humane, *Trapped Under the Sea* reminds us that behind every bridge, tower, and tunnel—behind the infrastructure that makes modern life possible—lies unsung bravery and extraordinary sacrifice.

The Innovators Walter Isaacson, 2014 Following his blockbuster biography of Steve Jobs, *The Innovators* is Walter Isaacson's revealing story of the people who created the computer and the Internet. It is destined to be the standard history of the digital revolution and an indispensable guide to how innovation really happens. What were the talents that allowed certain inventors and entrepreneurs to turn their visionary ideas into disruptive realities? What led to their creative leaps? Why did some succeed and others fail? In his masterly saga, Isaacson begins with Ada Lovelace, Lord Byron's daughter, who pioneered computer programming in the 1840s. He explores the fascinating personalities that created our current digital revolution, such as Vannevar Bush, Alan Turing, John von Neumann, J.C.R. Licklider, Doug Engelbart, Robert Noyce, Bill Gates, Steve Wozniak, Steve Jobs, Tim Berners-

Lee, and Larry Page. This is the story of how their minds worked and what made them so inventive. It's also a narrative of how their ability to collaborate and master the art of teamwork made them even more creative. For an era that seeks to foster innovation, creativity, and teamwork, The Innovators shows how they happen--

The Birth of Korean Cool Euny Hong, 2014-08-14 How did a really unhip country suddenly become cool? Eating on the Wild Side Jo Robinson, 2013-06-04 Winner of the 2014 IACP

Cookbook Award in the category of Food Matters. The next stage in the food revolution--a radical way to select fruits and vegetables and reclaim the flavor and nutrients we've lost. Ever since farmers first planted seeds 10,000 years ago, humans have been destroying the nutritional value of their fruits and vegetables. Unwittingly, we've been selecting plants that are high in starch and sugar and low in vitamins, minerals, fiber, and antioxidants for more than 400 generations. EATING ON THE WILD SIDE reveals the solution--choosing modern varieties that approach the nutritional content of wild plants but that also please the modern palate. Jo Robinson explains that many of these newly identified varieties can be found in supermarkets and farmer's market, and introduces simple, scientifically proven methods of preparation that enhance their flavor and nutrition. Based on years of scientific research and filled with food history and practical advice, EATING ON THE WILD SIDE will forever change the way we think about food.

One night, when Ethan checks under his bed for his monster, Gabe, he finds a note from him instead: Gone fishing. Back in a week. Ethan knows that without Gabe's familiar nightly scares he doesn't stand a chance of getting to sleep, so

Ethan interviews potential substitutes to see if they've got the right equipment for the job—pointy teeth, sharp claws, and a long tail—but none of them proves scary enough for Ethan. When Gabe returns sooner than expected from his fishing trip, Ethan is thrilled. It turns out that Gabe didn't enjoy fishing because the fish scared too easily.
