Mom Walks: Sharing Failure Rebecca Prenevost,2022-02-17 Every mom worries about their tween's phone use, right? Probably, but what's the worst thing that could happen? Tweens, phones, and social media can put any mom on edge. And some trouble Dawn got into when she was younger only ratchets up her anxiety as she parents her sixth-grade daughter, Kayli, through it. Dawn holds out as long as she can before letting Kayli get a phone. Then, when she finally allows it, she ensures all the "right" rules are in place. But it hardly matters. Dawn can't prevent Kayli from messing up. And with each additional mistake, Dawn grows increasingly frustrated, which only makes Kayli want to hide her errors more. As their mother-daughter relationship gets put to the test, Dawn must figure out what's really important before the consequences become permanent.

Sharing This Walk Karina Biondi,2016-10-12 The Primeiro Comando do Capital (PCC) is a Sao Paulo prison gang that since the 1990s has expanded into the most powerful criminal network in Brazil. Karina Biondi's rich ethnography of the PCC is uniquely informed by her insider-outsider status. Prior to his acquittal, Biondi's husband was incarcerated in a PCC-dominated prison for several years. During the period of Biondi's intense and intimate visits with her husband and her extensive fieldwork in prisons and on the streets of Sao Paulo, the PCC effectively controlled more than 90 percent of Sao Paulo's 147 prison facilities. Available for the first time in English, Biondi's riveting portrait of the PCC illuminates how the organization operates inside and outside of prison, creatively elaborating on a decentered, non-hierarchical, and far-reaching command system. This system challenges both the police forces against which the PCC has declared war and the methods and analytic concepts traditionally employed by social scientists concerned with crime, incarceration, and policing. Biondi posits that the PCC embodies a politics of transcendence, a group identity that is braided together with, but also autonomous from, its decentralized parts. Biondi also situates the PCC in relation to redemocratization and rampant socioeconomic inequality in Brazil, as well as to counter-state movements, crime, and punishment in the Americas.

Lean Safety Gemba Walks Robert B. Hafey,2014-11-24 A Lean Safety Gemba Walk is a walk through the work area (Gemba) that focuses on the continuous improvement of safety. When conducted in a respectful manner, by skilled facilitators, Safety Gemba Walks can have a dramatic long-lasting impact on the culture of a business. Lean Safety Gemba Walks: A Methodology for Workforce Engagement and Culture Change is a follow-up to the author's bestselling book, Lean Safety, published in 2010. It is a natural progression from the philosophical overview provided by Lean Safety to the reality of the application of those principles in facilities around the world. This book presents a collection of Lean Safety Gemba Walk case studies that are based on the author's experiences over the last four years. As the stories unfold, readers are transported on a journey of discovery through the Gemba and begin to see safety differently just as those who physically participated. Illustrating the importance of employee engagement and culture change, the book provides you with the tools to engage managers, employees, and hourly staff in the continuous improvement of safety. The concepts covered will allow you to empower employees to make a difference in their safety culture rather than simply complying with safety rules.

Safety Rest Areas, Roadway Vegetation, and Utility and Highway Issues 1991 National Research Council (U.S.). Transportation Research Board,1992

National Bicycling and Walking Study Arlene M. Cleven,1992

National Bicycle and Walking Study ,1992

Psychological Perspectives on Walking Ralf Risser,Matúš Šucha,2020-06-15 Psychological Perspectives on Walking provides a comprehensive overview of the benefits of walking and shows how we can encourage people to walk more based on psychological principles. It examines how walking significantly improves health, positively impacts the environment, contributes to resolving social issues, and boosts the local micro-economy. This pioneering book discusses psychological motivations for walking versus not walking and asserts research-based arguments in favour of walking, including both theoretical considerations and everyday concerns. The book investigates the motivations that can lead to increased walking, advises on how to build walking-conducive habits, and recommends strategies for decision makers for promoting changes that will allow walking to thrive more easily. The authors include success stories and lessons learned from what have become known as 'walkable' cities to show how interventions and initiatives can succeed on a practical basis. This accessible, practical book is essential for urban planners; health specialists; policy makers; traffic experts; psychology, civil engineering, and social sciences students; and experts in the field of sustainable mobility. Psychological Perspectives on Walking will appeal to anyone in the general population in favour of a sustainable and healthy lifestyle.

Built Environment and Walking & Cycling Around Metro Stations Yanan Liu,2023-11-14 This book explores the relationship between pedestrians/cyclists' mode and route choice to/from metro/railway stations and the micro-level (street-scale) built environment in a second-tier city in China. More specifically, it investigates how the street-scale built environment influences pedestrians/cyclists' mode choice and route choice behavior and examines user preferences for the micro-level built environment around metro stations. The focus on a second-tier city is motivated primarily to expand the set of Chinese cities where the effects of the built environment on pedestrian/cyclist mode and route choice have been studied. Results demonstrate the effects of the street-scale built environment on pedestrian flows. The effects are higher for the main road, which is directly connected with the metro station. The findings of this book are expected to support the design of preferred walking/biking built environments around a metro station. This book appeals to urbanists, planners, engineers, policy makers, and those interested in a wide-ranging overview of slow/green transportation and built environment promotion. These methods not only help to understand the quantitative relationship between built environment design and travel behavior but also support the evaluation and assessment of built environment design in urban planning projects. It reduces the gap in our understanding of the quantitative relationship between the micro-level built environment and pedestrians/cyclists' transportation mode and route choice around the metro station. Both stated choice data and revealed choice data were used. An extended set of micro-level built environment attributes was developed. Besides the widely studied transportation-related factors, street-level built environment factors were studied using quantitative methods.

Walking Art Practice Ernesto Pujol,2016-05-01 a collection of intimate reflections by artist Ernesto Pujol, which bring together his experiences as a former monk, performance artist, social choreographer and educator.

Walking Bodies Helen Billingham,2020-09-01 A curated collection of papers, provocations and actions from the 'Walking's New Movements' conference held at the University of Plymouth in November 2019

Walking with Same-Sex Attracted Friends Ng Zhi-Wen,Ronald JJ Wong,Bernice Lee,Tan Soo-Inn,Joanna Hor,Raphael Zhang, This book seeks to both encourage those who are serious about following Christ but who are struggling with same-sex attraction, and to challenge the church to lend a listening ear and a helping and welcoming hand. The stories in this book are told with pathos, honesty, and courage. We must all recognise that whatever our story or struggle with sin (and we all have struggles), God has chosen us to be His children so that we can be conformed to the likeness of His Son. The church should understand this and provide a safe redemptive space to all of us sinners, whatever our problem, surrounded by the sheltering canopy of God's unchanging truth and abiding love. From the Foreword by Bishop Emeritus Dr Robert

Solomon, The Methodist Church in Singapore

Measures to Overcome Impediments to Bicycling and Walking Gary H. Zehnpfenning,1993

Transportation and the Elderly, Problems and Progress United States. Congress. Senate. Special Committee on Aging,1974

Walking as Artistic Practice Ellen Mueller,2023-10-01 Walking as Artistic Practice lays out foundational information about the history of walking and its development as an artistic practice, making it accessible to readers of all backgrounds. It also provides guidance on how to analyze and discuss walking artworks, with vocabulary support, over three hundred examples, and over seventy-five exercises. The chapters offer a variety of topical approaches, allowing readers and instructors to craft an experience most suited to their interests and needs. Themes include observational and sensory experience, leading versus following, who walks where (identity and positionality), rituals, place, activism, connections to drawing, and embodiment. Appendices include information on documentation, sample syllabi, readings and resources, brainstorming tips, community engagement guidance, and tips for travel-based study. Instructors will appreciate this text because it has so many resources to direct students to when they have questions about analysis, history, community engagement, or documentation approaches. It's the type of book that students will hang onto long after the course is done because it is so practical and useful.

Walking, Cycling and Active Travel As Part of Physical Activity and Public Health Systems Paul Kelly,Jason M. R. Gill,Jessica Bourne,Justin Richards,Deborah Salvo,2024-04-09

Encyclopedia of Transportation Mark Garrett,2014-08-13 Viewing transportation through the lens of current social, economic, and policy aspects, this four-volume reference work explores the topic of transportation across multiple disciplines within the social sciences and related areas, including geography, public policy, business, and economics. The book’s articles, all written by experts in the field, seek to answer such questions as: What has been the legacy, not just economically but politically and socially as well, of President Eisenhower’s modern interstate highway system in America? With that system and the infrastructure that supports it now in a state of decline and decay, what’s the best path for the future at a time of enormous fiscal constraints? Should California politicians plunge ahead with plans for a high-speed rail that every expert says–despite the allure–will go largely unused and will never pay back the massive investment while at this very moment potholes go unfilled all across the state? What path is best for emerging countries to keep pace with dramatic economic growth for their part? What are the social and financial costs of gridlock in our cities? Features: Approximately 675 signed articles authored by prominent scholars are arranged in A-to-Z fashion and conclude with Further Readings and cross references. A Chronology helps readers put individual events into historical context; a Reader’s Guide organizes entries by broad topical or thematic areas; a detailed index helps users quickly locate entries of most immediate interest; and a Resource Guide provides a list of journals, books, and associations and their websites. While articles were written to avoid jargon as much as possible, a Glossary provides quick definitions of technical terms. To ensure full, well-rounded coverage of the field, the General Editor with expertise in urban planning, public policy, and the environment worked alongside a Consulting Editor with a background in Civil Engineering. The index, Reader’s Guide, and cross references combine for thorough search-and-browse capabilities in the electronic edition. Available in both print and electronic formats, Encyclopedia of Transportation is an ideal reference for libraries and those who want to explore the issues that surround transportation in the United States and around the world.

Possibility of Politics in India Akshat Jain,2024-01-15 This book is an attempt to find new ways of inter-disciplinary theorisation about this moment when both the unitary idea of the Indian nation and the bureaucratic dream of a centralised Indian state are falling apart. At this juncture, the Indian state has two choices. Either it can recognise the political nature of the struggles confronting it and radically re-imagine itself or it can wage a losing war against the democratic aspirations of people. It is essential that political movements in the subcontinent let go of their differences and organise together to agitate for modernisation. By bringing these disparate struggles together, this book explores the possibility of an alliance between them such that they are able to inform each other against a colonial state. Taken together, this book is thus an experiment in politics, rather than being about specific events. The chapters in this book were originally published in various Taylor & Francis journals.

Walking Each Other Home Peter C. Wilcox,2017-05-23 The English writer G. K. Chesterton once wrote: Nothing taken for granted; everything received with gratitude; everything passed on with grace. These reflections are the author's effort, as an older father, to pass on to his daughter, with grace, what he believes is truly important in life. When his daughter was young, he used to tell her that his constant prayer was to live long enough so that I can get you raised! Thankfully, that prayer has been answered. But parenting is a life-long process that evolves as we and our children grow older. Through the years, Dr. Wilcox has discovered that being an older father has advantages and disadvantages. If age gives one more life experience and wisdom, then hopefully these reflections will be a way that he can share his life and wisdom with her and others. Throughout thirty years as a psychotherapist and spiritual director, Dr. Wilcox counseled many fathers who were genuinely trying to be good parents. This book is intended to help fathers influence, in a positive way, the life choices their daughters will make. It is an invitation to explore how we can continue to help our daughters grow spiritually and psychologically into the person God is calling them to become.
