Custodians of the Internet Tarleton Gillespie, 2018-06-26 A revealing and gripping investigation into how social media platforms police what we post online—and the large societal impact of these decisions. Most users want their Twitter feed, Facebook page, and YouTube comments to be free of harassment and porn. Whether faced with “fake news” or livestreamed violence, “content moderators”—who censor or promote user†posted content—have never been more important. This is especially true when the tools that social media platforms use to curb trolling, ban hate speech, and censor pornography can also silence the speech you need to hear. In this revealing and nuanced exploration, award†winning sociologist and cultural observer Tarleton Gillespie provides an overview of current social media practices and explains the underlying rationales for how, when, and why these policies are enforced. In doing so, Gillespie highlights that content moderation receives too little public scrutiny even as it shapes social norms and creates consequences for public discourse, cultural production, and the fabric of society. Based on interviews with content moderators, creators, and consumers, this accessible, timely book is a must†read for anyone who’s ever clicked “like” or “retweet.”

The New Girl Jennifer Degenhardt, 2017-10-07 Taruka is the new girl at the high school in town. The story takes the reader through a year of high school that Taruka is not likely to forget. She makes friends and meets a boy, Cooper. Like Cooper and many of the students at the school Taruka is very involved in sports, so she gets along with her new classmates well. But issues arise with her newfound friendship with Cooper when their differences are highlighted by the adults in their lives. This book is intended as a reader for students learning English. While the story has a plot similar to the classic story of Romeo and Juliet or Tony and Maria, the vocabulary and grammar are simple and comprehensible even for those just beginning with English.

Safety Crimes Steve Tombs, Dave Whyte, 2013-05-13 Every year in the UK, hundreds of workers are killed just doing their jobs, thousands more die of illnesses caused by their work and tens of thousands suffer major injuries such as amputations, loss of sight, serious burns, and so on. Worldwide, two million people are killed by work each year. Yet with the exception of high profile cases such as the gas leak at Bhopal, India, which killed tens of thousands, this crime wave fails to attract the interest of the politicians, the media or - least forgiveably of all - the knowledge industry of criminology. This book is concerned with crimes against worker and public safety, providing an account and analysis of this increasingly important field, and setting this within the broader context of corporate and white-collar crime. It uses case studies and original analyses of official data to illustrate key points and themes, drawing upon both well known and high profile instances of safety crimes as well the mass of ubiquitous 'mundane' or 'routine' deaths and injuries. Thus the book examines how much safety crime is there, how are such offences rendered invisible, and how can their extent be unearthed

accurately? Throughout the book the authors analyse the social, legal and political processes that ensure that safety crimes remain subject to under-enforcement and under-criminalisation. This analysis identifies key moments in the historical development of criminal law and regulation, and assesses the prospects for criminalising safety crimes in the context of contemporary neo-liberal regulatory policies. The theoretical and political justifications for dominant approaches to the regulation and sanctioning of safety criminals are subject to critique in order to develop alternative, more effective, means of criminalisation and punishment. The book concludes with an original analysis of safety crimes that allows us to understand the complexities of the conditions of their production, and develop a more realistic appraisal of the prospects for their amelioration.
