Gladstone Centenary Essays David Bebbington, Roger Swift, 2000-03-01 W. E. Gladstone towers over the politics of the nineteenth century. He is known for his policies of financial rectitude, his campaigns to settle the Irish question and his championship of the rights of small nations. He remains the only British Prime Minister to have served for four separate terms. In 1998 an international conference at Chester College brought together Gladstone scholars to mark the centenary of his death, and many of the papers presented on that occasion are published in this volume. Covering the whole of the statesman's long political life from the first Reform Act to the last decade of the nineteenth century, they range over topics as diverse as parliamentary reform and free trade, Gladstone's English Nonconformist supporters and his Irish Unionist opponents. A select bibliography, arranged by subject, supplies guidance for further research. The collection forms a tribute, appreciative but critical, to the Grand Old Man of British politics.

*The Life and Work of Martin Johnson Heade* Theodore E. Stebbins, Janet L. Comey, Martin Johnson Heade, Karen E. Quinn, 2000-01-01 Martin Johnson Heade was one of the most significant American painters of the nineteenth century, creator of portraits, history and genre pictures, still lifes, ornithological studies, landscapes, and marines, and his own unique orchid and hummingbird compositions. This book brings a perspective to Heade and his works, presenting him as one of the most original and productive painters of his time. Theodore Stebbins builds on his acclaimed 1975 study of Heade, drawing on several newly discovered collections of Heade's letters and the painter's own Brazilian journal. Stebbins tells of Heade's training and early career as an itinerant portraitist and discusses his move to New York, where, under the influence of Frederic E. Church, he began painting landscapes and seascapes. He examines Heade's relationships with patrons and dealers, writers and scientists, and he sheds new light on Heade's trips to Brazil, to the Central American tropics, and to London. And he describes Heade's move to Florida in 1883, which marked not his retirement but a final period of creativity that lasted until his death in 1904. The book includes not only an examination of Heade's life and works but also reproductions of all his 620 known paintings, including nearly 250 that have been discovered since 1975.
