GTO Roger Corea,2017-03-28 Antonio Grimaldi is fraught with desperation. He has only two choices: steal the most valuable Ferrari ever made and spend the rest of his life in prison, or have his wife and seven year old son killed by a vindictive assassin. The story begins with the priceless Ferrari

GTO prototype being delivered to Genoa by two valued members of Enzo Ferrari’s inner circle, Antonio Grimaldi and Giancarlo Bandini. The GTO will be placed inside a watertight container aboard the SS Andrea Doria, for shipment to Chinetti Motors, a Ferrari dealership in New York City. But the Italian ocean liner sinks near Nantucket in the North Atlantic in July of 1956. Three generations later, Tommy Grimaldi’s best friend, Mike Bender, decides to spend his inheritance attempting to salvage the GTO. When Tommy learns that the name of the person who delivered the GTO to Genoa was also a “Grimaldi”, he and his good friend, Rebecca Ricci, research Tommy’s heritage. Not only do they learn the shocking truth about Antonio, they also uncover a deadly scheme involving Mike. GTO is an amazing story about courage and the ability to turn adversity into a meaningful and productive life. It is about being strong in the face of a devastating injustice and doing the right thing, no matter how compelling the circumstances are to do otherwise.

The Emergence of Organizations and Markets John F. Padgett,Walter W. Powell,2012-10-14 A dynamic framework for studying social emergence The social sciences have sophisticated models of choice and equilibrium but little understanding of the emergence of novelty. Where do new alternatives, new organizational forms, and new types of people come from? Combining biochemical insights about the origin of life with innovative and historically oriented social network analyses, John Padgett and Walter Powell develop a theory about the emergence of organizational, market, and biographical novelty from the coevolution of multiple social networks. They demonstrate that novelty arises from spillovers across intertwined networks in different domains. In the short run actors make relations, but in the long run relations make actors. This theory of novelty emerging from intersecting production and biographical flows is developed through formal deductive modeling and through a wide range of original historical case studies. Padgett and Powell build on the biochemical concept of autocatalysis—the chemical definition of life—and then extend this autocatalytic reasoning to social processes of production and communication. Padgett and Powell, along with other colleagues, analyze a very wide range of cases of emergence. They look at the emergence of organizational novelty in early capitalism and state formation; they examine the transformation of communism; and they analyze with detailed network data contemporary science-based capitalism: the biotechnology industry, regional high-tech clusters, and the open source community.
