Servicing Satellite TV Equipment Nick

Beer, 1998-05-20 This is the definitive practical guide to fault-finding, troubleshooting and servicing satellite television equipment, both indoors and outdoors. It will take you through all areas of satellite television system servicing from the simplest fixed dish to fully motorised systems. From PAL to Mac to MPEG all contemporary systems are covered. Satellite TV systems have been installed in a wide variety of locations, using a bewildering range of equipment. That equipment is beginning to need maintenance and repair. To cope with the volume and variety of work, Nick Beer has written the first guide to satellite TV which concentrates on what to look for and what to do when it goes wrong. This book is up to date and crammed with real-life experience, not theoretical data or manufacturer's ideal specs. Nick Beer has already written the best-selling *Servicing Audio and Hi-fi Equipment* and is a technical correspondent for many UK and international journals such as *Television*. He also works as an engineer and teaches satellite servicing to technicians. A practical

guide to a new and important area for service engineers

Satellite Broadcasting Ralph Negrine, 2013-06-19
Originally published in 1988, this book provides a thorough
examination of the possibilities and key issues in satellite
technology which at the time already seemed likely to
change the face of broadcasting both within nations and
internationally. It begins with a guide to the technical
development of different systems of satellites and signal
reception and an outline of the international, political and
regulatory issues involved. It then examines the situation
in various industrialised countries by analysing launching
plans, funding, the interaction between satellite, cable and
VCRs and the effect on existing broadcasting systems.
Concerned throughout with a wide range of cultural
considerations and the potential impacts of the new media,
this is a useful reflection on the time.
