Why Government Can't Save You John F. MacArthur,2000-09-16 The Lord did not come as a political deliverer or social reformer. He did not rally supporters in a grandiose attempt to capture the culture for morality or greater political and religious freedom. Rather, His divine calling was to rescue the lost souls of individual men and women from sin and hell. In *Why Government Can't Save You: An Alternative to Political Activism*, author John MacArthur illustrates through Scripture that, regardless of the numerous immoral, unjust, and ungodly failures of secular government, believers are to pray and seek to influence the world for Christ by godly, selfless, and peaceful living under that authority, not by protests against the government or by acts of civil disobedience. Dr. MacArthur will explore these areas: Christians' responsibility to authority How and why we should support our leaders How to live righteously in a pagan culture The principle of paying taxes Jesus' lessons on tax exemptions The biblical purpose of government The principle and reasons for civil obedience. To devote all, or even most, of our time, energy, money, and strategy to putting a façade of morality on the world or the appearance of 'rightness' over our governmental and political institutions is to badly misunderstand our roles as Christians in a spiritually lost world. ?John MacArthur

The Alternative G. Speke,2006-09 What is this book about? How to change the world? Make it better? In 1989, I tried to open a door. But the door was locked - firmly. Knock, Knock, Knock on Heaven's door... ...strange! Every door seems hollow... Humanity is waiting, and needs so much to see something important barred from view. I shall give the Key to you. Hopefully you will manage to make it work, one day, soon.

Why Government Can't Save You John MacArthur,2000-09-18 Though the Lord relentlessly proclaimed the law of God, He did not come as a political deliverer or social reformer. He did not issue a call for changes, even by peaceful means. Nor did Jesus rally supporters in a grandiose attempt to capture the culture for morality or greater political and religious freedoms. Rather, His divine calling was to rescue the lost souls of individual men and women from sin and hell. A certain amount of healthy and balanced concern about current trends in government and the community is acceptable, as long as we realize that such interest is not vital to our spiritual lives, our righteous testimony or the advancement of the kingdom of Christ. Above all, the believer's political involvement should never displace the priority of preaching and teaching the gospel because the morality and righteousness that God seeks is the result of salvation and sanctification.-John MacArthur In *Why Government Can't Save You (An Alternative to Political Activism)*, author John MacArthur illustrates through Scripture that, regardless of the numerous immoral, unjust, and ungodly failures of secular government, believers are to pray and seek to influence the world for Christ by godly, selfless, and peaceful living under that authority, not by protests against the government or by acts of civil disobedience. Dr. MacArthur will explore these areas: Christians' Responsibility to authority How and why to support our leaders How to live righteously in a pagan culture The principle of paying taxes Jesus' lessons on tax exemptions The biblical purpose of government The principle and reasons for civil obedience To devote all, or even most, or our time, energy, money, and strategy to putting a facade of morality on the world or the appearance of 'rightness' over our governmental and political institutions is to badly misunderstand our roles as Christians in a spiritually lost world.-John MacArthur In this book find out your Christian responsibility to government and political causes.

Save the Planet: Using Alternative Energies Courtney Farrell,2010-01-01 *Save the Planet: Using Alternative Energies* applies the NCTE/IRA Standards to science and social studies content. Each book sends the reader on a fact-finding mission, posing an initial challenge and concluding with questions and answers. Through engaging, interactive scenarios, learners can experiment with text prediction, purpose-driven research, and creative problem solving—all critical thinking skills—while learning about ways to care for our planet.

Saving Energy in U.S. Transportation ,1994 This report assesses an array of transportation policies designed to reduce energy use and describes the intersection of these policies with general transportation problems such as congestion and air pollution. The report: describes the U.S. transportation system and its energy use; presents and evaluates forecasts of energy use to 2010; compares and contrasts U.S. and European travel and energy use patterns; discusses reasons governments may choose to intervene in transportation markets; and describes and evaluates a range of policy options to reduce U.S. transport energy use, from gasoline taxes to urban planning. Its objective is to provide a balanced, qualitative perspective of issues and problems rather than a highly quantified analysis.

Sand Talk Tyson Yunkaporta,2020-05-12 A paradigm-shifting book in the vein of *Sapiens* that brings a crucial Indigenous perspective to historical and cultural issues of history, education, money, power, and sustainability—and offers a new template for living. As an indigenous person, Tyson Yunkaporta looks at global systems from a unique perspective, one tied to the natural and spiritual world. In considering how contemporary life diverges from the pattern of creation, he raises important questions. How does this affect us? How can we do things differently? In this thoughtful, culturally rich, mind-expanding book, he provides answers. Yunkaporta's writing process begins with images. Honoring indigenous traditions, he makes carvings of what he wants to say, channeling his thoughts through symbols and diagrams rather than words. He yarns with people, looking for ways to connect images and stories with place and relationship to create a coherent world view, and he uses sand talk, the Aboriginal custom of drawing images on the ground to convey knowledge. In *Sand Talk*, he provides a new model for our everyday lives. Rich in ideas and inspiration, it explains how lines and symbols and shapes can help us make sense of the world. It's about how we learn and how we remember. It's about talking to everyone and listening carefully. It's about finding different ways to look at things. Most of all it's about a very special way of thinking, of learning to see from a native perspective, one that is spiritually and physically tied to the earth around us, and how it can save our world. *Sand Talk* include 22 black-and-white illustrations that add depth to the text.

Oxford Studies in Normative Ethics Volume 10 Mark Timmons, 2020-10-15 OSNE is an annual forum for new work in normative ethical theory. Leading philosophers advance our understanding of a wide range of moral issues and positions, from analysis of competing normative theories to questions of how we should act and live well. OSNE will be an essential resource for scholars and students working in moral philosophy.

Compendium of GAO's Views on the Cost Saving Proposals of the Grace Commission: Individual issue analyses United States. General Accounting Office, 1985 In response to a congressional request, GAO examined issues studied and recommendations made by the President's Private Sector Survey on Cost Control, better known as the Grace Commission, to determine whether: (1) the issues and recommendations made on program management and cost control had merit; (2) legislation would be necessary to implement the recommendations; (3) implementation efforts were completely underway; and (4) the savings estimates were realistic. GAO found that many of the issues studied and recommendations made by the Commission had overall merit and that, while many have already been implemented by legislative or administrative action, many more require additional legislative action to be fully implemented. However, GAO questioned the accuracy of many of the associated savings estimates, found flaws in the methodology used to develop some of the estimates, and found that the description of the methodology used in some estimates was insufficient to allow an assessment of its validity. In most of the instances where GAO questioned the methodology used, it believed that the savings were overstated. GAO supported management improvement issues more frequently than policy-oriented issues; however, policy-oriented issues constitute a large portion of the total estimated savings. GAO does not support restructuring federal subsidy programs and fixing federal health care costs to a percentage of the gross national product, and it disagreed with selected aspects of recommendations to reduce civilian and military retirement benefits. GAO support was most extensive in the areas aimed at strengthening federal management systems, federal automatic data processing operations, federal credit and cash management efforts, and civilian procurement and property management activities. GAO has made similar or related recommendations in nearly half of the areas in which it agreed with the Commission. Additional legislative action would be necessary to fully implement approximately half of the recommendations analyzed.

Saving the Market from Capitalism Massimo Amato, Luca Fantacci, 2014-11-05 This new book by two leading economists is a far-reaching analysis of the role and organization of the financial system in the aftermath of the economic crisis. The authors argue that the financial markets, as currently organized, hinder genuine market transactions and therefore harm the economy, along with any chance of sustained recovery. Despite the crisis, the power of the financial markets has continued to grow. Far from being subjected to major restructuring or regulation, they continue to rule largely unchecked - laying down economic policies, deposing governments, disrupting social contracts and reshaping international alliances. The time has come to think through more radical proposals for reform - to save other markets from the overwhelming power of the one market that has come to dominate them all, the financial market. Through a detailed examination of specific measures - from policies aimed at reigning in financial markets to the idea of local currencies that could be used to foster economic development within localities and regions - the authors develop a set of proposals that would help to revitalize markets, free them from the domineering power of finance and re-establish the relationship between creditor and debtor that was severed by the rise of the modern financial system. Building on their very successful work *The End of Finance*, this new and timely book will appeal to students of economics, politics and sociology as well as to general readers interested in one of the key issues of our time.

Bionanotechnology to Save the Environment Pierfrancesco Morganti, 2019-02-19 Nanotechnology is the science of manipulating atoms and molecules in the nanoscale thousand times smaller than the width of a human hair. The world market for products that contain nanomaterials is expected to increase enormously in the future. The use of nanotechnology has stretched across various streams of science, from electronics to medicine and has also found applications in the field of cosmetics. How will this revolution impact our lifestyle and our planet? Very often the progresses of science, human knowledge and evolution of our lifestyle has been associated with devastating effects on our forests, oceans and more in general on our planet. The real challenge in the years to come is the sustainability of human evolution. The reader of this interesting book will discover how nanotechnology, and in particular nanomaterials derived from plant biomass and fishery's waste, can improve the quality of our environment by reducing carbon emissions, improving the recycling of materials and even, in the long run, become a profitable business. Green nanotechnologies can be applied to a huge number of products ranging from intelligent textiles to smart drugs or functional polymers which can have a big impact on our daily lives, but nevertheless help us in saving our biodiversity and our planet. However, to fully achieve all these benefits, companies and scientists should be supported by National and International Agencies and Institutions in order to facilitate and support scientific development in this field allowing from one side the protection of intellectual property, but on the other giving accessibility of these technologies to emerging countries for improving the quality of life and the environment all over the world equally.
