Behavior Analytics in Retail Ronny Max,2013-09-26 What is the value of a bricks-and-mortar store? As retailers move to a multichannel world where the winners must overcome the challenges of pricing transparency, personalized marketing, and supply chain controls, most sales still occur in the physical site. Behavior Analytics is the science of studying the behavior of people. Schedule to Demand is a subset of Behavior Analytics, a method that correlates between traffic, sales and labor data, in order to optimize the productivity of employees and position them where they matter most. In Behavior Analytics for Retail, we will introduce the core metrics of Schedule to Demand; design the requirements for a Customer Service Model of the store, inside the store, and at the checkout; present technology options and accuracy requirements; and offer insights through case studies. Regardless of how the future will shape retail, the physical store will continue to exist, and thrive. We propose a framework for retailers, and others, on how to optimize store operations and profitability, and enhance the shopping experience by measuring, monitoring and predicting the behavior of employees and customers.

Mobile Influence Chuck Martin,2013-06-11 Outlines a model for today's businesses on how to compete and capture market shares that are subject to mobile technologies, explaining the essential role of mobile devices as research and purchase-point consumer tools while identifying six sale timeline points that can be effectively marketed. By the best-selling author of *The Digital Estate*.

Customer's New Voice John S. McKean,2014-10-13 Find out how to reap the benefits of motivating and engaging the new, direct customer voice *The Customer's New Voice* shows businesses

how to motivate and transform directly volunteered consumer knowledge into profitable insights, enabling a new echelon of marketing relevancy, customer experience, and personalization. With a deep look at the inner workings of how a modern generation of business innovators are tapping into the fresh opportunities with the customer's new voice, this book describes how businesses are transforming inference-based predictions of purchase intent with direct consumer knowledge of their actual intentions and buying context. The result: An untouchable/unprecedented level of offer relevancy, experience, and personalized service levels. Those offers range from the most basic app model of Give me your physical location, we'll find the best Thai restaurant near you, and give you an instant coupon to a more complex model such as an Electric utility value proposition: We'll give you discounts to charge your Prius during certain times to help us optimize our grid efficiency while allowing Toyota to monitor and optimize your battery to enable Toyota's R&D and customer experience enhancement. Forty case studies detail proven approaches for directly engaging the new consumer, showing companies how to take advantage of rapidly evolving personal technology—smart phones, homes, vehicles, wearable technology, and Internet of Things—and the new sharing culture to collect the higher value intentionally/ discretionarily shared information. Readers gain access to a robust tool set including templates, checklists, tables, flow diagrams, process maps, and technical data schematics to streamline these new capabilities and accelerate implementation of these transformational techniques. Ninety percent of the data that businesses use to determine what they sell or how to personalize a customer experience results from consumers unintentionally volunteering indirect data; however, this type of data has less than 10 percent accuracy. This low effectiveness also necessitates up to 70 percent of a business's cost infrastructure. Direct consumer knowledge is now available and boasts up to 20-50 percent accuracy, yet businesses remain anchored in the old indirect competencies. This book helps companies integrate compelling sharing motivators and controls for consumers to feel motivated and safe about directly sharing their product and experience desires, providing the ultimate market advantage. Learn how to catch up to the new digitalized consumer Leverage direct consumer information from current megatrends Navigate privacy's current and future metamorphosis Unlock the untapped value of Big Data's true enabler—Little Data Parsing incidentally volunteered data has been stagnant for decades due to the capabilities and expectations of a new generation of enabled consumers The timeless reality is that any level of investment in computing power, data, and analytics will never approach their full ROI potential without interfusing the direct, intentional insights from the consumer. If today's forward-thinking companies want to profitably engage the new consumers, they must learn the secrets of motivating and safeguarding this new potential of customer transparency. The risks of not engaging these new consumer voices? Irrelevancy and Silence. The Customer's New Voice shows businesses how to fulfill the promise and caveat of the new consumer: If you make my life easier, reward me, and respect my shared information: I will tell you my secrets.

The Aisles Have Eyes Joseph Turow, 2017-01-17 The author of *Media Today* offers “a trenchant, timely, and troubling account of [retailers’] data-mining, in-store tracking, and predictive analytics” (*The Philadelphia Inquirer*). By one expert’s prediction, within twenty years half of Americans will have body implants that tell retailers how they feel about specific products as they browse their local stores. The notion may be outlandish, but it reflects executives’ drive to understand shoppers in the aisles with the same obsessive detail that they track us online. In fact, a hidden surveillance

revolution is already taking place inside brick-and-mortar stores, where Americans still do most of their buying. Drawing on his interviews with retail executives, analysis of trade publications, and experiences at insider industry meetings, advertising and digital studies expert Joseph Turow pulls back the curtain on these trends, showing how a new hyper-competitive generation of merchants—including Macy's, Target, and Walmart—is already using data mining, in-store tracking, and predictive analytics to change the way we buy, undermine our privacy, and define our reputations. Eye-opening and timely, Turow's book is essential reading to understand the future of shopping. "Turow shows shopping today to be an exercise in unwitting self-revelation—and not only online."—The Wall Street Journal "Thoroughly researched and clearly presented with detailed evidence and fascinating peeks inside the retail industry. Much of this information is startling and even chilling, particularly when Turow shows how retail data-tracking can enable discrimination and societal stratification."—Publishers Weekly "Revealing . . . Valuable reading for shoppers and retailers alike."—Kirkus Reviews

Hard Sell Colin Clark, 2014-08-01 Market pitchers routinely transform a patch of bare ground into a sea of eager purchasers using little more than their 'gift of the gab' and some homespun 'psychology' to convince passers-by to stop and buy their goods. Employing some of the world's most successful selling techniques, in one of the oldest and most difficult of all marketing situations, their rhetoric and social skills have to equal that employed by the most accomplished salespersons, politicians and professional persuaders. Between 1984 and 1994 sociologists Clark and Pinch recorded over 75 pitching routines on street markets and other sales sites throughout the UK, mainland Europe and the United States. Using examples of pitchers attracting a crowd, describing and demonstrating their goods, building bargains, cajoling the unconvinced to make a purchase and coping with problem customers, the authors reveal, for the very first time, the reasons for these traders' extraordinary success—both on and away from the markets. Comparing their findings with more orthodox sales situations—direct response TV home shopping and infomercials, as well as other forms of grass-roots selling (fly pitching, the mock auction sales con, street entertaining and urban 'hustling')—the authors highlight many important lessons that have relevance for everyone involved in all types of marketing, advertising and persuasion. In this revised, updated and extended edition the authors also reveal why, today, pitching on markets appears to have become a dying art. Original, authoritative and highly readable, *The Hard Sell* is an essential and often hilarious guide for anyone who wants to understand how real-life selling really works.
