How James Watt Invented the Copier René Schils,2011-12-14 Features 25 different scientists and the ideas which may not have made them famous, but made history... Typically, we remember our greatest scientists from one single invention, one new formula or one incredible breakthrough. This narrow perspective does not give justice to the versatility of many scientists who also earned a reputation in other areas of science. James Watt, for instance, is known for inventing the steam engine, yet most people do not know that he also invented the copier. Alexander Graham Bell of course invented the telephone, but only few know that he invented artificial breathing equipment, a prototype of the ‘iron lung’. Edmond Halley, whose name is associated with the comet that visits Earth every 75 years, produced the first mortality tables, used for life insurances. This entertaining book is aimed at anyone who enjoys reading about inventions and discoveries by the most creative minds. Detailed illustrations of the forgotten designs and ideas enrich the work throughout.

GAAP Patrick R. Delaney,1994-12 More accountants now rely on this handy quick-reference volume to help them interpret and apply the latest GAAP than any other professional resource. And with good reason. Not just a reiteration of current GAAP, it cuts through the confusion with clear, concise explanations of all the latest GAAP principles, rules, terminology, and concepts.
