Career Counseling David Capuzzi,Mark Stauffer,Mark D. Stauffer,2018-09-03 *Career Counseling*, 3rd edition, provides a comprehensive, holistic overview of the foundations of career counseling, information on the most effective skills and techniques, and contextual perspectives on career and lifestyle planning, all by nationally and internationally recognized experts. Updated chapters introduce important material not often addressed in introductory texts, such as rehabilitation, addictive behaviors, counseling couples and families, and working with ethnic and gender/sexual minority clients. Included throughout the text are case studies, informational sidebars, and experiential activities that enhance the reading and encourage additional contemplation of chapter content. Readers can also turn to the book's companion website for chapter test questions, PowerPoints, and additional resources.

Save American Jobs Abraham K. Turkson, 2005-06 Hope has always said to Americans tomorrow will be better than today. Always, until now. Because if you are a computer programmer, engineer, accountant, manager or a factory worker, you are filled with fear, instead of hope, for your job may disappear overnight. If you are a small sized entrepreneur, the big company you've serviced from the beginning of your existence may call in the middle of the night to inform you they will no longer buy from you; they are buying from overseas. And these are the stories unfolding in communities across America. Fear, not hope, is stalking many an American. The information superhighway that was supposed to have been the road to high-paying jobs for Americans has instead turned into one on which offshore outsourcing is killing many jobs. If it is allowed to continue, America's foundation built over many generations will be weakened. To save existing jobs in America and create new ones, Dr. Abraham Turkson has suggested new ideas to reduce costs to make businesses in America more competitive, provide private healthcare for all Americans, and stop oil imports. And none of the suggestions involves raising taxes. Hope must be reborn across America.

Document Image Processing for Scanning and Printing Ilia V. Safonov, Ilya V. Kurilin, Michael N. Rychagov, Ekaterina V. Tolstaya, 2019-03-25 This book continues first one of the same authors "Adaptive Image Processing Algorithms for Printing" and presents methods and software solutions for copying and scanning various types of documents by conventional office equipment, offering techniques for correction of distortions and enhancement of scanned documents; techniques for automatic cropping and de-skew; approaches for segmentation of text and picture regions; documents classifiers; approach for vectorization of symbols by approximation of their contour by curves; methods for optimal compression of scanned documents, algorithm for stitching parts of large originals; copy-protection methods by microprinting and embedding of hidden information to hardcopy; algorithmic approach for toner saving. In addition, method for integral printing is considered. Described techniques operate in automatic mode thanks to machine learning or ingenious heuristics. Most the techniques presented have a low computational complexity and memory consumption due to they were designed for firmware of embedded systems or software drivers. The book reflects the authors' practical experience in algorithm development for industrial R&D.
