Documentary's Awkward Turn Jason Middleton,2013-12-04 Despite the prominence of awkwardness as cultural buzzword and descriptor of a sub-genre of contemporary film and television comedy, it has yet to be adequately theorized in academic film and media studies. Documentary's Awkward Turn contributes a new critical paradigm to the field by presenting an analysis of awkward moments in documentary film and other reality-based media formats. It examines difficult and disrupted encounters between social actors on the screen, between filmmaker and subject, and between film and spectator. These encounters are, of course, often inter-connected. Awkward moments occur when an established mode of representation or reception is unexpectedly challenged, stalled, or altered: when an interviewee suddenly confronts the interviewer, when a subject who had been comfortable on camera begins to feel trapped in the frame, when a film perceived as a documentary turns out to be a parodic mockumentary. This book makes visible the ways in which awkwardness connects and subtends a range of transformative textual strategies, political and ethical problematics, and modalities of spectatorship in documentary film and media from the 1970s to the present.

Monstrous Forms Adam Charles Hart,2019-11-01 It makes us jump. It makes us scream. It haunts our nightmares. So why do we watch horror? Why do we play it? What could possibly appealing about a genre that tries to terrify us? Why would we subject ourselves to shriek-inducing shocks, or spend dozens of hours watching a television show about grotesque flesh-eating monsters? Monstrous Forms offers a theory of horror that works through the genre across a broad range of contemporary moving-image media: film, television, video games, YouTube, gifs, streaming, virtual reality. This book analyzes our experience of and engagement with horror by focusing on its form, paying special attention to the common ground, the styles and forms that move between mediums. It looks at the ways that moving-image horror addresses its audiences, the ways that it elicits, or demands, responses from its viewers, players, browsers. Camera movement (or camera movement), jump scares, offscreen monsters-horror innovates and perfects styles that directly provoke and stimulate the bodies in front of the screen. Analyzing films including Paranormal Activity, It Follows, and Get Out, video games including Amnesia: The Dark Descent, Layers of Fear, and Until Dawn, and TV shows including The Walking Dead and American Horror Story, Monstrous Forms argues for understanding horror through its sensational address, and dissects the forms that make that address so effective.

Why Horror Seduces Mathias Clasen,2017-09-29 From vampire apocalypses, shark attacks, witches, and ghosts, to murderous dolls bent on revenge, horror has been part of the American cinematic imagination for almost as long as pictures have moved on screens. But why do they captivate us so? What is the drive to be frightened, and why is it so perennially popular? Why Horror Seduces addresses these questions through evolutionary social sciences. Explaining the functional

seduction of horror entertainment, this book draws on cutting-edge findings in the evolutionary social sciences, showing how the horror genre is a product of human nature. Integrating the study of horror with the sciences of human nature, the book claims that horror entertainment works by targeting humans' adaptive tendency to find pleasure in make-believe, allowing a high intensity experience within a safe context. Through analyses of well-known and popular modern American works of horror--Rosemary's Baby; The Shining; I Am Legend; Jaws; and several others--author Mathias Clasen illustrates how these works target evolved cognitive and emotional mechanisms; we are attracted to horrifying entertainment because we have an adaptive tendency to find pleasure in make-believe that allows us to experience negative emotions at high levels of intensity within a safe context. Organized into three parts identifying fictional works by evolutionary mode--the evolution of horror; evolutionary interpretations of horror; the future of horror--Why Horror Seduces succinctly explores the cognitive processes behind spectators' need to scream.

Handbook of Emotional Development Vanessa LoBue,Koraly Pérez-Edgar,Kristin A. Buss,2019-07-04 This handbook offers a comprehensive review of the research on emotional development. It examines research on individual emotions, including happiness, anger, sadness, fear, and disgust, as well as self-conscious and pro-social emotions. Chapters describe theoretical and biological foundations and address the roles of cognition and context on emotional development. In addition, chapters discuss issues concerning atypical emotional development, such as anxiety, depression, developmental disorders, maltreatment, and deprivation. The handbook concludes with important directions for the future research of emotional development. Topics featured in this handbook include: The physiology and neuroscience of emotions. Perception and expression of emotional faces. Prosocial and moral emotions. The interplay of emotion and cognition. The effects of maltreatment on children's emotional development. Potential emotional problems that result from early deprivation. The Handbook of Emotional Development is an essential resource for researchers, clinicians/professionals, and graduate students in child and school psychology, social work, public health, child and adolescent psychiatry, pediatrics, and related disciplines.

The Haunted Maze Stephen Stanley,2013 Ten full-color, double-page challenges take puzzlists ages 8 and up into a haunted wonderland — through a hall of mirrors and across bubbling pools of acid, past monsters, skeletons, and ghosts.

Emotional Development Across the Lifespan Linda A. Camras, 2022-07-12 Unique in its dual focus on emotion and lifespan development, this text weaves together theory, research, and practical clinical implications for fostering children's emotional well-being. The author examines how emotions are experienced, expressed, understood, and regulated from infancy through later adulthood, surveying both typical and atypical development. For each stage, chapters highlight the interrelated influences of temperament, neurobiology, and the social environment, and distinguish universal processes from those that vary across cultures. The book presents current knowledge about specific emotions, probes the causes and consequences of emotional maladjustment, and reviews evidence-based and promising interventions. Innovative methods, examples, and meta-analyses are described; key terms are defined within chapters and in an end-of-book glossary.

What the Face Reveals Erika L. Rosenberg, Paul Ekman, 2020-06-15 For years, *What the Face Reveals* has been a singular collection of previously published original research using the Facial Action Coding System (FACS) to study facial behavior. Accompanying each article is an author commentary, prepared for this book, on the value of bringing FACS-based measurement to their area of study. The new third edition includes new research findings and applications, and extends the focus of earlier volumes to showcase the development of Animal FACS systems and applications of automated FACS measurement. *What the Face Reveals* is an indispensable reference to anyone who uses FACS in their research, as the studies showcased here employ a variety of methodological and design technique for the use of FACS that could be replicated or extended in other research contexts. New to this Edition: --Revised to include 50% new contributions, reflecting changes in facial measurement in the 21st century --New structure organized around six areas of FACS research: Animal FACS, Automated Measurement, Basic Affective Science, Development, Pain, Psychopathology, and Social and Health Psychology
