Enterprise Social Technology Scott Klososky, 2010
Every leader has heard of the business benefits of social technology, yet many still struggle to understand how to get the most out of the technological tools at their disposal -- asking questions like What should I be doing on Facebook? and How can Twitter help my company? This book demystifies this much-hyped subject, and gives readers a level-headed, growth-focused approach to how they can put all kinds of social technology -- not just the big, well-known platforms -- to work for their companies. The book is a step-by-step plan for developing and implementing social technology and covers every aspect of social technology in the business arena -- from planning and goal-setting, to assembling a social tech team, to integrating social tech with your existing online presence, to measuring the return on investment. Business visionaries will be impressed by the scope and practicality of the strategies presented, and older executives prone to thinking of social tech as a toy will come to understand its critical place in today's business landscape.

Social Media Marketing Algorithms Step By Step Workbook Secrets To Make Money Online For Beginners, Passive Income, Advertising and Become An Influencer Jordan Connery, 2021-02-20 Social media is a rapidly growing arena for everything from the posting of videos to car sales, so it should come as no surprise that big business is growing on there, too. However, what can it actually do to help grow your business? Before selling any product, you have to get your name out there and spread the word of your new social media presence. By adding links to your social media accounts on your company website, you are encouraging people to follow you online in order to get the most up to date information as soon as you release it. When you put your company website on your social media profile, it gives your clients a way to go directly to your website. This will allow your

customers to contact your company for more information, and it is more likely to create online buyers. Social media is the main way that companies are beginning to show involvement with their customers and community by promoting events they are sponsoring or releasing news to their clients. Real-time communication has become extremely important for customer satisfaction in today's businesses. People don't want to wait for answers to their questions or for help resolving any issue they might have. With social media, people have direct access to comments and post feedback for companies, making any kind of wait-time for results obsolete. Press releases are a thing of the past and take more time to be processed out to customers. By using social media, your company is able to deliver news and updates to clients in real time, while also allowing them to share the news with others and encouraging a faster spread of communication. By letting customers share your company's posts and information, it also allows new people to follow your company page and learn more about your business. Businesses are turning to Instagram and Facebook, among other social media platforms, to better communicate with their customers and spread the word about their business and future plans. To go about doing this, companies first have to understand the best ways to create brand awareness online and how to draw in new followers. Building a successful online following will take time. However, there are techniques and skills that will help you build an online following and create a popular social media site, while still promoting

your business and keeping in contact with your customers.
