Remaking the News Pablo J. Boczkowski, C. W.

Anderson, 2024-05-21 Leading scholars chart the future of studies on technology and journalism in the digital age. The use of digital technology has transformed the way news is produced, distributed, and received. Just as media organizations and journalists have realized that technology is a central and indispensable part of their enterprise, scholars of journalism have shifted their focus to the role of technology. In *Remaking the News*, leading scholars chart the future of studies on technology and journalism in the digital age. These ongoing changes in journalism invite scholars to rethink how they approach this dynamic field of inquiry. The contributors consider theoretical and methodological issues; concepts from the social science canon that can help make sense of journalism; the occupational culture and practice of journalism; and major gaps in current scholarship on the news: analyses of inequality, history, and failure.

**How to Graduate College for Free** M. Gauge, 2012-09-17  
With college costs continuing to skyrocket, many students (and parents) find themselves scrambling to pay for higher education. Unfortunately, a large percentage of these families find their savings fall short, and are forced to dig themselves into a massive hole of student loans. This is a hole that may take them decades to escape after they graduate college. Understandably, then, students faced with this prospect decide to search for a different method of financing their college education. The good news is, it is completely possible to graduate college for free, or at least at a dramatically reduced expense. There are several different options available for those who wish to graduate college for free. Some of

these options are more feasible for the average student than others. For those of you who would prefer not to spend the better part of \$100,000 for a BA, the primary choices are an athletic scholarship, military funding, or a merit scholarship. This page will primarily focus on merit scholarships. For more good news, you do not have to be a certifiable genius in order to win a major merit scholarship, which can give you a free full ride education at many different universities. The National Merit Scholarship Program is the most well-known of these major scholarship programs. When you take the PSAT/NMSQT (National Merit Scholarship Qualifying Test), you begin the competition process. Levels of awards in the National Merit Program are Commended Student, Semifinalist, Finalist, and National Merit Scholar. Even earning a semifinalist placement can lead to a scholarship for free tuition at many major universities, while a full-fledged National Merit Scholar can receive free tuition, free room & board, and a stipend as well at some schools. Now, some brilliant students fail to win a National Merit Scholarship. And, some surprisingly average students do win a National Merit Scholarship, allowing them to attend college at little or no cost to them! I became a National Merit Scholar, and received extremely generous scholarship offers from many different major universities. Many of these scholarships covered at least the cost of tuition and room and board for all four years of an undergraduate degree; some were for an even larger amount. But, as I said, I know students more intelligent than I who did not do particularly well in the National Merit Program! It is my goal, through this book, to show you the strategies that allowed me to succeed in the National Merit Program (strategies that can apply to a variety of major scholarship programs). Good studying!
