The Neighborhood Effect Anna Ohanyan,2022-08-23 Why are certain regions of the world mired in conflict? And how did some regions in Eurasia emerge from the Cold War as peaceful and resilient? Why do conflicts ignite in Bosnia, Donbas, and Damascus—once on the peripheries of mighty empires—yet other postimperial peripheries like the Baltics or Central Europe enjoy quiet stability? Anna Ohanyan argues for the salience of the neighborhood effect: the complex regional connectivity among ethnic-religious communities that can form resilient regions. In an account of Eurasian regional formation that stretches back long before the nation-state, Ohanyan refutes the notion that stable regions are the luxury of prosperous, stable, democratic states. She examines case studies from regions once on the fringes of the Habsburg, Ottoman, and Russian Empires to find the often-overlooked patterns of bonding and bridging, or clustering and isolation of political power and social resources, that are associated with regional resilience or fracture in those regions today. With comparative examples from Latin America and Africa, *The Neighborhood Effect* offers a new explanation for the conflicts we are likely to see emerge as the unipolar US-led order dissolves, making the fractures in regional neighborhoods painfully evident. And it points the way to the future of peacebuilding: making space for the smaller links and connections that comprise a stable neighborhood.

Russia Abroad Anna Ohanyan,2018-10-01 While we know a great deal about the benefits of regional integration, there is a knowledge gap when it comes to areas with weak, dysfunctional, or nonexistent regional fabric in political and economic life. Further, deliberate “un-regioning,” applied by actors external as well as internal to a region, has also gone unnoticed despite its increasingly sophisticated modern application by Russia in its peripheries. This volume helps us understand what Anna Ohanyan calls “fractured regions” and their consequences for contemporary global security. Ohanyan introduces a theory of regional fracture to explain how and why regions come apart, consolidate dysfunctional ties within the region, and foster weak states. *Russia Abroad* specifically examines how Russia employs regional fracture as a strategy to keep states on its periphery in Eurasia and the Middle East weak and in Russia's orbit. It argues that the level of regional maturity in Russia's vast vicinities is an important determinant of Russian foreign policy in the emergent multipolar world order. Many of these fractured regions become global security threats because weak states are more likely to be hubs of transnational crime, havens for militants, or sites of protracted conflict. The regional fracture theory is offered as a fresh perspective about the post-American world and a way to broaden international relations scholarship on comparative regionalism.

**Networked Regionalism as Conflict Management** Anna Ohanyan,2015-04-15 Most regions of the world are plagued by conflicts that are made insoluble by a confluence of complex threads from history, geography, politics, and culture. These frozen conflicts defy conflict management interventions by both internal and external agents and institutions. Worse, they constantly threaten to extend beyond their local geographies, as in the terrorist bombings in Boston by ethnic Chechens, or to escalate from skirmishes to full-scale war, as in Nagorno-Karabakh. Consequently, such conflicts cry out for alternative approaches to the classic, state-focused, and sovereignty-based conflict management models that are practiced in traditional diplomacy—which most often produce rather short-term, ad hoc, fragmented interventions and outcomes. Drawing upon the cases of the South Caucasus, the Western Balkans, Central America, South East Asia, and Northern Ireland, *Networked Regionalism as Conflict Management* offers a theoretical and practical solution to this impasse by arguing for regional collective interventions that involve a long-term reengineering of existing conflict management infrastructure on the ground. Such approaches have been attracting the attention of scholars and practitioners alike yet, thus far, these concepts have rarely involved more than simple prescriptions for regional cooperation between grassroots actors and traditional diplomacy. Specifically, says Anna Ohanyan, only the cultivation and establishment of regional peace systems can provide an effective path toward conflict management in these standoffs in such intractably divided regions.

**The SAGE Handbook of Globalization** Manfred Steger,Paul Battersby,Joseph Siracusa,2014-05-22 Global studies is a fresh and dynamic discipline area that promises to reinvigorate undergraduate and postgraduate education in the social sciences and humanities. In the Australian context, the interdisciplinary pedagogy that defines global studies is gaining wider acceptance as a coherent and necessary approach to the study of global change. Through the Global Studies Consortium (GSC), this new discipline is forming around an impressive body of international scholars who define their expertise in global terms. The GSC paves the way for the expansion of global studies programs internationally and for the development of teaching and research collaboration on a global scale. Mark Juergensmeyer and Helmut Anheier's forthcoming *Encyclopaedia of Global Studies* with SAGE is evidence of this growing international collaboration, while the work of Professor Manfred Steger exemplifies the flourishing academic literature on globalization. RMIT University's Global Cities Institute represents a substantial institutional investment in interdisciplinary research into the social and environmental implications of globalization in which it leads the way internationally. Given these developments, the time is right for a book series that draws together diverse scholarship in global studies. This Handbook allows for extended treatment of critical issues that are of major interest to researchers and students in this emerging field. The topics covered speak to an interdisciplinary approach to the study of global issues that reaches well beyond the confines of international relations and political science to encompass sociology, anthropology, history, media and

cultural studies, economics and governance, environmental sustainability, international law and criminal justice. Specially commissioned chapters explore diverse subjects from a global vantage point and all deliberately cohere around core “global” concerns of narrative, praxis, space and place. This integrated approach sets the Handbook apart from its competitors and distinguishes Global Studies as the most equipped academic discipline with which to address the scope and pace of global change in the 21st century.

*Taking Action with Teacher Research* Ellen Meyers,Frances O'Connell Rust,2003 More and more, classroom teachers are using action research strategies to tackle basic issues and daily dilemmas-everything from designing their own professional development to reshaping instructional practice. Through their support of teachers who are eager to take up this work, Ellen Meyers and Frances Rust have found that the challenges to the reform of public schools are most likely to surface in three areas: resources needed to meet standards, conditions of the workplace, and status of the teaching profession. Their book is a lucid guide for teachers to address these and other problems in classrooms and beyond; to ask the right questions and design and implement research to find answers; and to use this data to effect change. Every chapter contains rich examples of teacher research in action. Jane Fung focuses on the conditions of schooling and the status of teachers in an elementary school in downtown Los Angeles. Lara Goldstone, teaching in New York's Chinatown, looks at obstacles to successful communication with the parents of her students. In a Lower East Side middle school, Matt Wayne confronts the problem of getting appropriate books for struggling eighth-grade students. Carol Tureski at a high school in Queens finds that lack of access to high-interest, culturally relevant resources is a significant barrier to facilitating adolescent literacy. Janet Price, also at a Queens high school, shows what can happen when teachers set the agenda for professional development around assessment in their school. Natasha Warikoo at a Manhattan high school looks at the impact of class size on her teaching of second-language learners in her math class. When teachers consider themselves to be researchers, not just consumers of research, they are exercising leadership. And when teachers form networks to share their knowledge, they are breaking down obstacles that have thwarted their leadership for so long. Action research empowers teachers to do just that-to lead reform efforts and provide the remedies needed for all children to succeed. The studies in this book are part of the work of the Teachers Network Policy Institute, whose mission is to give teachers an active voice in education policy making.
