God Beyond Boundaries Perry Schmidt-Leukel,2017 Fruitful relationships and constructive interaction between religions have become more important than ever. But what about the issues of truth and conflicting truth claims? Is it a betrayal of one's own faith to acknowledge the truth of other religions? The current work is the first English translation of *Gott ohne Grenzen*, published in 2005. In this much acclaimed study, Perry Schmidt-Leukel defends religious pluralism showing under which presuppositions Christians can accept other religions as equally valid without denying their differences. He discusses in detail how the pluralist position opens up new perspectives in Christianity's dialogue with Jews, Muslim, Hindus and Buddhists. Schmidt-Leukel, Perry, Prof. Dr., ist Professor für Religionswissenschaft und interkulturelle Theologie an der Universität Münster. Er ist am Exzellenzcluster Religion und Politik der Universität Münster beteiligt. Er ist Mitglied im international advisory board des Forschungsprojektes 'Religion und Dialog in modernen Gesellschaften' an der Akademie der Weltreligionen der Universität Hamburg. Seine Schwerpunkte sind unter anderem Theologie der Religionen, interreligiöse Beziehungen, christlich-buddhistischer Dialog und Pluralismusfähigkeit der Religionen.

Doing Research with Children Anne D Greig,Jayne Taylor,Tommy MacKay,2012-11-16

This Third Edition of Doing Research with Children is practical introduction to the process of designing, doing and writing up research with children and young people. At the centre is a commitment to engaging with children and young people as active research participants rather than as passive subjects. In the new edition, you'll find up to date information on the

fast-changing political and ethical debates around research with children and young people as well as guidance on how to carry out research yourself. Divided into three sections, the new edition covers: -the main theories and approaches of research with children and young people -expanded guidance on research ethics -techniques for conducting both qualitative and quantitative research -more on analysing your research -a brand new chapter on communicating your research findings. This is a must-have guide for students and practitioners who are engaging in research with children and young people.

Learning in Virtual Worlds Sue Gregory, Mark J.W. Lee, Barney Dalgarno, Belinda Tynan, 2016-04-01 Three-dimensional (3D) immersive virtual worlds have been touted as being capable of facilitating highly interactive, engaging, multimodal learning experiences. Much of the evidence gathered to support these claims has been anecdotal but the potential that these environments hold to solve traditional problems in online and technology-mediated education—primarily learner isolation and student disengagement—has resulted in considerable investments in virtual world platforms like Second Life, OpenSimulator, and Open Wonderland by both professors and institutions. To justify this ongoing and sustained investment, institutions and proponents of simulated learning environments must assemble a robust body of evidence that illustrates the most effective use of this powerful learning tool. In this authoritative collection, a team of international experts outline the emerging trends and developments in the use of 3D virtual worlds for teaching and learning. They explore aspects of learner interaction with virtual worlds, such as user wayfinding in Second Life, communication modes and perceived presence, and accessibility issues for elderly or disabled learners. They also examine

advanced technologies that hold potential for the enhancement of learner immersion and discuss best practices in the design and implementation of virtual world-based learning interventions and tasks. By evaluating and documenting different methods, approaches, and strategies, the contributors to Learning in Virtual Worlds offer important information and insight to both scholars and practitioners in the field.
