The Subterranean Forest Rolf Peter Sieferle,2001 This work studies the historical transition from the agrarian solar energy regime to the use of fossil energy, which has fuelled the industrial transformation of the last 200 years. The author argues that the analysis of historical energy systems provides an explanation for the basic patterns of different social formations. It is the availability of free energy that defines the framework within which socio-metabolic processes can take place. This thesis explains why the industrial revolution started in Britain, where coal was readily available and firewood already depleted or difficult to transport, whereas Germany, with its huge forests next to rivers, was much longer dependent on a traditional solar energy regime.

The Agrarian Question Karl Kautsky,1988 Lenin described The Agrarian Question as the first systematic Marxist study of capitalism and agriculture and the most important event in economic literature since the third volume of Capital. This great work is regarded as Kautsky's main achievement and is a classic work of analysis.Kautsky's pariah status in the eyes of revolutionary Marxists resulted in many years of neglect, but his role and work are now commanding great attention. The analysis of the transformation of peasant economies by capital in The Agrarian Question is now seen as particularly relevant to contemporary Third World peasant economies.This remarkable translation, which brings out the humanity - and the humour - in Kautsky's writing, is more than a work of economic analysis: in a manner ahead of his time, Kautsky integrates questions of political strategy, ecology, sexuality and the family.The illuminating reassessment of The Agrarian Question in the introduction by Professor Teodor Shanin and Hamza Alavi examines in detail the political context, Kautsky's own life, the development of Kautsky's ideas within the work, and its contribution to our understanding of the world

*Numerical Secrets of the Bible* Casper J. Labuschagne,2016-07-20 Were you intrigued, but disappointed by The Bible Code? Numerical Secrets of the Bible, written by one of Europe's leading biblical scholars, gives you the actual facts about one of the most important recent discoveries in the field of biblical study, namely that the books of the Bible are numerical compositions. The biblical writings were not written in an off-hand manner, but were meticulously composed according to compositional techniques in which the counting of words played a crucial role. This discovery has far-reaching consequences for our views on the formation and the structure of the text of the Hebrew Bible and of the Greek text of the New Testament. Labuschagne introduces you to the fascinating world of number symbolism in biblical times. He demonstrates how well-known symbolic numbers,

such as 7 and 12, and especially the lesser known holy numbers 17 and 26, which represent the numerical value of the name YHWH, were used to give structure to the text and to deepen its contents. Among other fascinating findings, this study confirms the medieval Jewish tradition that the name of God is interwoven in the fabric of the text of Holy Scripture.

**Controversies and Innovations in Urological Surgery** J. Clive Gingell,Paul H. Abrams,2012-12-06 The title of this book is a challenge. Anyone with the least knowledge of present day urology will know that there are many very controversial aspects of this subject. Urology is not alone in this unsettled environment for there are similar debates in almost all other aspects of surgery. In addition to the rapid changes in technology, an important part of the explanation for these controversies is simply that more surgeons are prepared to admit that no area of their work is so established that it does not bear further scrutiny and assessment. Argument can be tedious but debate is healthy. This book aims to present material that is debatable: experienced practitioners of each topic explain why an opinion or preference can be sustained. The purist might wish to have these opinions resolved by a well-planned clinical trial, but experience of clinical trials shows that they do not always produce results that are easily translated into a positive change in clinical practice. Would the reader be persuaded more by a statistically significant difference or by an experienced clinician who has reached certain conclusions? Both are risky, but since surgical techniques are often not easily converted into appropriate studies or trials the Editors have obtained the best opinion on each controversy and innovation. The media adore controversy for its own sake. The medical profession accepts controversy but knows that few events in medicine are absolute and few procedures can be done only by one method.

**The Road to Blue Heaven** Wes Miller,2008-11-25 Griffins lounged all around them, inscrutable as cats, brazen as summer. They turned their heads to look at Kes out of fierce, inhuman eyes. Their feathers, ruffled by the wind that came down the mountain, looked like they had been poured out of light; their lion haunches like they had been fashioned out of gold. A white griffin, close at hand, looked like it had been made of alabaster and white marble and then lit from within by white fire. Its eyes were the pitiless blue-white of the desert sky. Little ever happens in the quiet villages of peaceful Feierabiand. The course of Kes's life seems set: she'll grow up to be an herb-woman and healer for the village of Minas Ford, never quite fitting in but always more or less accepted. And she's content with that path--or she thinks she is. Until the day the griffins come down from the mountains, bringing with them the fiery wind of their desert and a desperate need for a healer. But what the griffins need is a healer who is not quite human...or a healer who can be made into something not quite human.
