Headline News, Science Views National Research Council, National Academy of Sciences, Frank Press, 1991-02-01 Many Americans want information on how to eat a healthier diet, clean up the environment, or improve their children's education. Yet, all too often, people lack the time or background to read scientific reports for answers to these questions. Now, scientists and nonscientists alike will enjoy Headline News, Science Views, a collection of easy-to-read short articles on many of today's most important issues. These readable essays are written by some of the country's leading scientists, engineers, physicians, and other experts. The authors discuss intriguing issues in language that is understandable and compelling...without jargon. Celebrity Bill Cosby contributes an essay on Getting the Facts Straight About Science. Television journalist Hugh Downs asks Who Owns Antarctica? Readers learn the many ways in which science and technology affect their daily lives. This volume makes groundbreaking scientific achievement accessible, fascinating—and fun. Bridging the gap between the experts and the public, it is a must read for anyone concerned about the future.

Headline News, Science Views II National Research Council, 1993-02-01 Why all the talk about biodiversity? Is malaria really making a comeback? Just what are computer viruses? Many Americans are confused about these and other issues involving science, technology, and health care. But they lack the time or technical background to read scientific reports. Headline News, Science Views II provides short, readable answers directly from the experts. Leading scientists, engineers, and others discuss today's issues in language that is understandable and compelling—without jargon. This engaging book can be warmly recommended to card-carrying scientists and laypeople alike, New Scientist wrote about the first edition of Headline News, Science Views. Try the opening items and say goodbye to your next couple of hours. Now, in a completely new edition packed with 75 engaging articles, Headline News, Science Views II probes further into scientific issues behind today's headlines, issues like highway safety, global warming, industrial competitiveness, and women's health. Experts on these and other topics discuss where the problems lie and how to fix them. The essays originally were distributed by the National Academy Op-Ed Service and published in more than 250 newspapers. Many are tied to studies of the National Academy of Sciences, National Academy of Engineering, Institute of Medicine, and National Research Council. Together, they make ground-breaking scientific achievement accessible, fascinating—and fun.

Science-Mart Philip Mirowski, 2011-04-29 This trenchant study analyzes the rise and decline in the quality and format of science in America since World War II. Science-Mart attributes this decline to a powerful neoliberal ideology in the 1980s which saw the fruits of scientific investigation as commodities that could be monetized, rather than as a public good.

Telling Science Stories Martin W. Angler, 2020-03-13 A practical manual for anyone who wants to turn scientific facts into gripping science stories, this book provides an overview of story elements and structure, guidance on where to locate them in scientific papers and a step-by-step guide to applying storytelling techniques to writing about science. In this book, Martin W. Angler outlines basic storytelling elements to show how and where fledgling science storytellers can find them in scientific output. Journalistic techniques like selection through news values and narrative interviews are covered in dedicated chapters. A variety of writing techniques and approaches are presented as a way of framing science stories in ways that are informative and compelling in different media – from short films to news articles. Practical examples, selected interviews and case studies complement each chapter, with exercises and experimentation suggestions included for deeper understanding. Review questions at the end of each chapter cement the newly gained knowledge to make sure readers absorb it, with links to articles and online tools inviting further reading. A valuable resource for students of journalism and science communication as well as professional journalists, scientists and scientists-in-training who want to engage with the public or simply improve their journal papers. This book is a one-stop shop on science storytelling with a clear focus on providing practical techniques and advice on how to thrive as science writers and communicate science in all of its complexity.

Pragmatics of Discourse Klaus P. Schneider, Anne Barron, 2014-06-18 Discourse is language as it occurs, in any form or context, beyond the speech act. It may be written or spoken, monological or dialogical, but there is always a communicative aim or purpose. The present volume provides systematic orientation in the vast field of studying discourse from a pragmatic perspective. It first gives an overview of a range of approaches developed for the analysis of discourse, including, among others, conversation analysis, systemic-functional analysis, genre analysis, critical discourse analysis, corpus-driven approaches and multimodal analysis. The focus is furthermore on functional units in discourse, such as discourse markers, moves, speech act sequences, discourse phases and

silence. The final section of the volume examines discourse types and domains, providing a taxonomy of discourse types and focusing on a range of discourse domains, e.g. classroom discourse, medical discourse, legal discourse, electronic discourse. Each article surveys the current state of the art of the respective topic area while also presenting new research findings.

The Why Files David J. Tenenbaum, Terry Devitt, 2009-04-28 Science magazine meets The Onion, Mental Floss, and Mad magazine in this ingenious guide to the science behind the news For more than a decade , the intrepid folks at whyfiles.org-the #1 science destination on the web-have been exploring the science behind newsworthy events. Now condensed into a book written with the site's characteristic wit, The Why Files features scores of articles organized into sections that mirror any city's daily newspaper: World News, Metro, Business Life, Sports, Arts & Leisure, Travel, Style, Opinion Page, and more. Who knew that science can explain why extremists say God Told Us to Kill, how poker can make you sick, why great racehorses have big butts, and if electrocution is the best way to zap a bug? For those who love accurate science served up with humor in a one-of-a-kind newscast, this decidedly non-geeky guide is a must.

New Directions in American Reception Study Philip Goldstein, James L. Machor, 2008-01-30 Contemporary reception study has developed a diversity of approaches and methods, including the institutional, textual, historical, authorial, and reader-response, which, to a greater or lesser extent, acknowledge the various ways in which readers have found texts-- literature, television shows, movies, and newspapers--meaningful. This collection emphasizes that new diversity, examining movies, newspapers, fans, television shows, and traditional American as well as modern Hispanic, Black, and Women's literature. The essays on literature include James Machor on Melville's short fiction, Kenneth Roemer on Edward Bellamy's utopian work Looking Backward, Amy Blair on the popularity of Sinclair Lewis's Main Street, Marcial Gonzalez on Danny Santiago and his Hispanic novel Famous All Over Town, and Leonard Diepeveen on modernist fiction and criticism. The theoretical essays on reader-oriented criticism include Patsy Schweickart on interpretation and the ethics of care and Jack Bratich on active audiences. Media versions of response criticism include Andrea Press and Camille Johnson's ethnographic analysis of fans of the Oprah Winfrey Show, Janet Staiger on Robert Aldrich's film version of Mickey Spillane's Kiss Me Deadly, and Rhiannon Bury on the fans of the HBO television show Six Feet Under. History-of-the-book versions include Barbara Hochman on the popularity of the 1890s editions of Harriet Beecher Stowe's Uncle Tom's Cabin, Ellen Garvey on nineteenth-century scrapbooks of newspaper, and David Nord on early twentieth-century newspapers' relations to audience charges of bias and unfairness. Poststructuralist studies include Philip Goldstein on Richard Wright's Native Son, Steve Mailloux on Reading Lolita in Tehran, and Tony Bennett on the cultural analyses of Pierre Bourdieu. The collection concludes with essays by Janice Radway on the limits of these methods and on the possibility of new forms of sociological and anthropological reception study and by Toby Miller on the reception deception in relation to the worldwide distribution and reception of movies and television shows.
