Whitetail Hunting Adventures Dragan Vujic, 2006-02 Whitetails are fascinating game animals. Here is a collection of deer hunting stories and pictures that have been accumulated over four decades. Some tales are joyous triumphs while others teach valuable lessons. However, every single one is a fond memory and cherished adventure. Each episode illustrates an aspect of whitetail behavior that equips the hunter with more knowledge to successfully harvest these elusive creatures on future hunts.

Bow Hunting Whitetails Dragan Vujic, 2007-03-09 A comprehensive book on hunting whitetails with a bow. Loaded with information, this book has something for everyone from novice to veteran. Topics include selecting the right bow, gaining familiarity with whitetails, learning what drives whitetails, kill zones on a whitetail, styles of hunting, trailing and recovering whitetails, effective strategies and tactics, and how to hunt and harvest a nocturnal buck during legal shooting hours. Over forty pictures are included in the book.

Southern Hunting in Black and White Stuart A. Marks, 1991 For many Southern men living in or close to rural landscapes, hunting is a passion. But it is not a timeless activity in a cultural void. Whether pursuers of fox or raccoon, deer or rabbits, quail or dove, Southern hunters reveal for Stuart Marks complex patterns of male bonding, social status, and relationships with nature. Marks, who has written two outstanding books on hunting in Africa, was born and has long lived in the South. Examining Southern hunting from frontier times through the antebellum era to the present day, he shows it to be a litmus test of rural identity. Drawing on the latest anthropological theory, statistical sources, extensive interviews, and historical research, [Marks] has crafted a multifaceted account of Southern hunting. Relations of race, property, gender, and region appear in fresh guises in this innovative and intriguing study. The portrayal of the contemporary state of hunting is especially interesting, revealing both the continuities with the past and the new pressures on the sport.--Virginia Quarterly Review

Hunting and the Ivory Tower Douglas Higbee, David Bruzina, 2018-05-11 Seventeen hunter-scholars explore the hunting experience and question common negative stereotypes. Despite the academy having a reputation for supporting broad and open inquiry in scholarship, some academics have not extended this open-minded support to colleagues' personal pursuits. A variety of scholars enjoy hunting, which has been stereotyped by some as an activity of the unsophisticated. In *Hunting and the Ivory Tower*, Douglas Higbee and David Bruzina present essays by seventeen hunter-scholars who explore the hunting experience and question negative assumptions about hunting made by intellectuals and academics who do not hunt. Higbee and Bruzina suspect most academics' understanding of hunting is based on brief television news reports of hunter-politicians and commercials for reality TV shows such as *Duck Dynasty*. The editors contend that few scholars appreciate the complexities of hunting or give much thought to its ethical, ecological, and cultural ramifications. Through this anthology they hope to start a conversation about both hunting and academia and how they relate. The contributors to this anthology are academics from a variety of disciplines, each with firsthand hunting experience. Their essays vary in style and tone from the scholarly to the personal and represent the different ways in which scholars engage with their avocation. The essays are grouped into three sections: the first focuses on the often-fraught relation between hunters and academic culture; the second section offers personal accounts of hunting by academics; and the third portrays hunting from an explicitly academic point of view, whether in terms of value theory, metaphysics, or history. Combined, these essays render hunting as a culturally rich, deeply personal, and intellectually satisfying experience worthy of further discussion. A foreword is provided by Robert DeMott, the Edwin and Ruth Kennedy Distinguished Professor at Ohio University in Athens, Ohio. He is a teacher, writer, critic, and internationally respected expert on novelist John Steinbeck.

The Still Hunter Theodore S. Van Dyke, 2012-12-01 STILL-HUNTING, the most scientific of all things pertaining to hunting, has hitherto been almost confined to the backwoodsman or frontiersman, and has been little enjoyed by those born and reared at any distance from facilities for learning practically the ways of the wild woods and plains. Thousands of our best shots with the shot-gun are men born and bred in the city. But of the thousands who enjoy the still-hunt the majority are backwoodsmen. One great reason of this is that the art is one requiring for proficiency more life in the forest than the average city man can spend there. But another great reason has been the almost utter lack of any information or instruction upon the subject. For this, the greatest and most important branch of the whole art of hunting has, I may safely say, been totally neglected by the great body of writers upon field-sports. Not without hesitation have I undertaken to explore this dark continent of the world of field-sports. At this day a writer upon almost any other subject has the roads, paths, blaze-marks, and charts of a dozen or more explorers before him. I have nothing to follow; the only work upon deer, that of Judge Caton, thorough and fine as it is, deals only with the anatomy, physiology, and natural history of deer; all those habits which it is essential for the still-hunter to thoroughly understand being as much beyond the scope of his work as the part he has treated of is beyond the scope of this work.
