Learning Design Rob Koper, Colin Tattersall, 2006-01-16 E-learning is still in its infancy. This can be seen both in the limited pedagogical quality and lack of portability of e-learning content, and in the lack of user-friendly tools to exploit the opportunities offered by current technologies. To be successful, e-learning must offer effective and attractive courses and programmes to learners, while at the same time providing a pleasant and effective work environment for staff members who have the task to develop course materials, plan the learning processes, provide tutoring, and assess performance. To overcome these deficiencies, the IMS Global Learning Consortium Inc. released the Learning Design Specification in 2003. With Learning Design it is possible to develop and present advanced, interoperable e-learning courses embracing educational role and game playing methods, problem-based learning, learning community approaches, adaptivity and peer coaching and assessment methods. In this handbook Koper and Tattersall have put together contributions from members of the Valkenburg Group, consisting of 33 experts deeply involved in e-learning and more specifically learning design. The result is a rich and lasting source of information for both e-learning course and tool developers, providing information about the specification itself, how to implement it in practice, what tools to use, and what pitfalls to avoid. The book not only reports first experiences, but also goes beyond the current state of the art by looking at future prospects and emerging applications.

Play in a Covid Frame Anna Beresin, Julia Bishop, 2023-06-01

During the international coronavirus lockdowns of 2020–2021,
millions of children, youth, and adults found their usual play areas out
of bounds and their friends out of reach. How did the pandemic
restrict everyday play and how did the pandemic offer new spaces
and new content? This unique collection of essays documents the
ways in which communities around the world harnessed play within

the limiting frame of Covid-19. Folklorists Anna Beresin and Julia Bishop adopt a multidisciplinary approach to this phenomenon, bringing together the insights of a geographically and demographically diverse range of scholars, practitioners, and community activists. The book begins with a focus on social and physical landscapes before moving onto more intimate portraits of play among the old and young, including coronavirus-themed games and novel toy inventions. Finally, the co-authors explore the creative shifts observed in frames of play, ranging from Zoom screens to street walls. This singular chronicle of coronavirus play will be of interest to researchers and students of developmental psychology, childhood studies, education, playwork, sociology, anthropology and folklore, as well as to toy, museum, and landscape designers. This book will also be of help to parents, professional organizations, educators, and urban planners, with a postscript of concrete suggestions advocating for the essential role of play in a post-pandemic world.
