*Viral Parenting* Mindy McKnight, 2019-04-02 Mindy McKnight, YouTube's favorite mom, shares the tools parents need to keep kids safe in their online lives--and shows how to create stronger family relationships as they do. A cross between Jen Hatmaker and Rosalind Wiseman, VIRAL PARENTING is a guide to raising responsible, safe, and communicative kids in the digital world.

Mindy shares practical tools for having honest conversations with kids of all ages about privacy, bullying, respectfulness, and family time, while emphasizing the importance of trust and open communication. These strategies are timeless--whether applied to texting, snapping, Facebooking, kiking, or whatever social media platforms await us in the future, this book is ultimately about teaching children about personal responsibility and safety. Mindy shares practical tools for creating family rules for kids of all ages about privacy, bullying, respectfulness, and family time, while emphasizing the importance of trust and open communication. Using family contracts, guided conversations, device checks, and respectful but firm oversight, the McKnights have raised a close knit family and navigated the complexity of being world-wide internet celebrities with grace. McKnight will show any parent of any child or teen how that's done--setting non-negotiable guidelines and offering a savvy perspective toward privacy that audience have been begging for.

Everything You Need to Know about Social Media Greta Van Susteren, 2017-11-14 A simple, step-by-step guide to the major social media platforms—Facebook, Twitter, LinkedIn, Instagram, Snapchat, and more—by former news anchor and media maven Greta Van Susteren.

**Consumer Behaviour** Isabelle Szmigin, Maria Piacentini, 2018 A new approach to teaching consumer behaviour, incorporating the latest issues in behavioural, psychological and sociological learning alongside new areas of research. *Qualitative Methodologies in Tourism Studies* Milka Ivanova, Dorina-Maria Buda, Elisa Burrai, 2022-09-05 Disruptive and creative research methodologies proposed in this book are designed to dismantle neoliberal narratives deployed in tourism studies and wider social sciences. Progressing criticality in tourism studies, this volume showcases cutting-edge contributions ranging from reflexivity, subjectivities, and dreams; to messy emotions in auto-ethnographic accounts of fieldwork; 'motherhood capital' accessing Inuit communities; collective memory work; ethnodrama and creative non-fiction, amongst others. Disruption and creativity are the two ideas around which tourism geographers challenge and begin dismantling hegemonic ideologies in tourism studies. The chapters in this book provide a vantage point from where to disrupt first, before tourism geographers can engender progress and transformation within and outside of the field. In tourism studies in general, and tourism geography in particular, the years of the 2000s have witnessed an emphasis on qualitative methodological research, both in terms of the topics addressed and the types of methodological tools. In many ways, this legitimisation of qualitative work mirrors developments in other areas such as human geography, sociology and anthropology, in which this book is anchored. The authors debate in more depth how tourism studies offer multidimensional, multilogical and multi-emotional approaches to research design. The chapters were originally published as a special issue of the journal, *Tourism Geographies*.

**Data Privacy and GDPR Handbook** Sanjay Sharma, 2019-11-27 The definitive guide for ensuring data privacy and GDPR compliance Privacy regulation is increasingly rigorous around the world and has become a serious concern for senior management of companies regardless of industry, size, scope, and geographic area. The Global Data Protection Regulation (GDPR) imposes complex, elaborate, and stringent requirements for any organization or individuals conducting business in the European Union (EU) and the European Economic Area (EEA)—while also addressing the export of personal data outside of the EU and EEA. This recently-enacted law allows the imposition of fines of up to 5% of global revenue for privacy and data protection violations. Despite the massive potential for steep fines and regulatory penalties, there is a distressing lack of awareness of the GDPR within the business community. A recent survey conducted in the UK suggests that only 40% of firms are even aware of the new law and their responsibilities to maintain compliance. The Data Privacy and GDPR Handbook helps organizations strictly adhere to data privacy laws in the EU, the USA, and governments around the world. This authoritative and comprehensive guide includes the history and foundation of data privacy, the framework for ensuring data privacy across major global jurisdictions, a detailed framework for complying with the

GDPR, and perspectives on the future of data collection and privacy practices. Comply with the latest data privacy regulations in the EU, EEA, US, and others Avoid hefty fines, damage to your reputation, and losing your customers Keep pace with the latest privacy policies, guidelines, and legislation Understand the framework necessary to ensure data privacy today and gain insights on future privacy practices The Data Privacy and GDPR Handbook is an indispensable resource for Chief Data Officers, Chief Technology Officers, legal counsel, C-Level Executives, regulators and legislators, data privacy consultants, compliance officers, and audit managers.

**The Qualified Self** Lee Humphreys, 2018-04-13 How sharing the mundane details of daily life did not start with Facebook, Twitter, and YouTube but with pocket diaries, photo albums, and baby books. Social critiques argue that social media have made us narcissistic, that Facebook, Twitter, Instagram, and YouTube are all vehicles for me-promotion. In *The Qualified Self*, Lee Humphreys offers a different view. She shows that sharing the mundane details of our lives—what we ate for lunch, where we went on vacation, who dropped in for a visit—didn't begin with mobile devices and social media. People have used media to catalog and share their lives for several centuries. Pocket diaries, photo albums, and baby books are the predigital precursors of today's digital and mobile platforms for posting text and images. The ability to take selfies has not turned us into needy narcissists; it's part of a longer story about how people account for everyday life. Humphreys refers to diaries in which eighteenth-century daily life is documented with the brevity and precision of a tweet, and cites a nineteenth-century travel diary in which a young woman complains that her breakfast didn't agree with her. Diaries, Humphreys explains, were often written to be shared with family and friends. Pocket diaries were as mobile as smartphones, allowing the diarist to record life in real time. Humphreys calls this chronicling, in both digital and nondigital forms, media accounting. The sense of self that emerges from media accounting is not the purely statistics-driven “quantified self,” but the more well-rounded qualified self. We come to understand ourselves in a new way through the representations of ourselves that we create to be consumed.

*Field Recordings from the Inside* Joe Bonomo, 2017-02-14 Using as its epigraph and unifying principle Luc Sante's notion that “Every human being is an archeological site,” *Field Recordings from the Inside* provides a deep and personal examination at the impact of music on our lives. Bonomo effortlessly moves between the personal and the critical, investigating the ways in which music defines our personalities, tells histories, and offers mysterious, often unbidden access into the human condition. The book explores the vagaries and richness of music and music-making—from rock and roll, punk, and R&B to Frank Sinatra, Nashville country, and Delta blues—as well as the work of a diverse group of artists and figures—Charles Lamb, music writer Lester Bangs, painter and television personality Bob Ross, child country musician Troy Hess, and songwriter Greg Cartwright. Mining the often complex natures and shapes of the creative process, *Field Recordings from the Inside* is a singular work that blends music appreciation, criticism, and pop culture from one of the most critically acclaimed music writers of our time.

*Digilect* Ágnes Veszelszki,2017-06-26 The high degree of internet penetration and its social (and linguistic) effects evidently influence how people, and especially the highly susceptible younger generations, use language. The primary aim of the book is not only to identify the characteristic features of the digital language variety (this has already been done by several works) but to examine how digital communication affects the language of other mediums of communication: orality, handwritten texts, digitally created but not digitally perceived, that is printed texts, including in particular advertisements (which quickly respond to linguistic change). Naturally, the book presents the characteristics of the digital language variety (and coins the term digilect) but only to give a framework to the impact analysis. It is important to document changes in progress and thus direct attention to potential outcomes. The current linguistic change is different from previous ones primarily in its speed and form of spreading, and it not only brings innovative grammatical forms and writing/spelling solutions but may also have far-reaching cultural and educational consequences in the long run.

*Why Muslim Women and Smartphones* Karen Waltorp, 2020-07-12 Using an assemblage approach to study how Muslim women in Norrebro, Denmark use their phones, Karen Waltorp examines how social media complicates the divide between public and private in relation to a group of people who find this distinction of utmost significance. Building on years of ethnographic fieldwork, Waltorp's ethnography reflects the trust and creativity of her relationships with these women which in turn open up nuanced discussions about both the subject at hand and best practice in conducting anthropological research. Combining rich ethnography with theoretical contextualization, Waltorp's book alternates between ethnography and analysis to illuminate a thoroughly modern community, and reveals the capacity of image-making technology to function as an infrastructure for seeing, thinking and engaging in fieldwork as an anthropologists. Waltorp identifies a series of important issues around anthropological approaches to new media, contributing to new debates around the anthropology of automation, data and self-tracking.
