Innovation in an Advanced Consumer Society Peder Inge Furseth,Richard Cuthbertson,2016 This book aims to develop innovation theory by focusing on innovation in a consumer society. In an advanced consumer society, services dominate and are provided through digital as well as physical channels by local, national and global firms. This book aims to identify the ways in which value can be increased for all stakeholders through both incremental and disruptive innovation. When interacting with leading businesses, there is a common acceptance that we need a better understanding of how to innovate in a service economy. Today, most advanced economies are service and knowledge based, accounting for about 70 percent of GDP. OECD reports document a considerable knowledge gap related to service innovation. It is a challenge for both business and society that future economic growth will increasingly be based on services rather than manufacturing and products. Failing to understand innovation issues in this context as an engine for growth is somewhat alarming. This raises the question: do we know how to innovate successfully in a consumer driven society? In this book, the

authors develop the concept of Value Driven Service Innovation, alongside a methodology for applying this approach in practice: the Service Innovation Triangle. They develop a better understanding of innovation, based on the uniqueness of services in order to develop the theory of service innovation suitable for a consumer society.

   Service Innovation Marja Toivonen,2016-06-09 This is the first book that summarizes the 20-year history of service innovation research and combines it with the future need to adopt a systems view in the field of service research. The book emphasizes that the most urgent issues of today's economies – the development of welfare and sustainability – cannot be solved with innovations in individual service offerings only, and that innovations of service systems are increasingly needed. Various theoretical approaches and perspectives from different disciplines are included, providing a comprehensive view of the current understanding of the nature of service innovation. The book illustrates the achievements of two research traditions, one based on the general innovation theory and the other based on the service marketing theory. Service innovation is considered from the points of view of drivers,

processes, practices, and outcomes. The interrelations between actors and systems are analyzed, and the nature of innovation as a new way to co-create value is highlighted. The book promotes the view that users are an important source of innovative ideas and that openness is an important success factor in innovation processes. In addition to the general nature and management of service innovation, some specific topics are included, exemplified by innovations in public services and in knowledge-intensive business services. This volume is highly recommended to readers who seek a state-of-the-art overview of the area of service innovation and its linkages to systems research.

Technology and Innovation in Adult Learning Kathleen P. King,2017-02-10 A comprehensive exploration of technology's role in adult learning Technology and Innovation in Adult Learning introduces educators and students to the intersection of adult learning and the growing technological revolution. Written by an internationally recognized expert in the field, this book explores the theory, research, and practice driving innovation in both adult learning and learning technology, and illuminates a powerful approach to recognize and leverage these opportunities. Building on current

trends and research in technology and its use, each chapter illustrates the need, opportunities, and examples of current and future technologies that scaffold adult learning, and provides comprehensive coverage of both current and emerging challenges. Many adult learning faculty, practitioners, and students realize that technology presents a growing and ever-present set of issues, yet few feel confident in identifying the opportunities that arise with each step forward. This book clarifies the interplay between adult learning and learning technology, and characterizes the cyclic exchange of information and opportunities that link these fields now and in the future. Understand the critical issues currently affecting adult learning Learn how technology is presenting both opportunities and challenges for the teaching and learning of adults in different contexts Examine recent research on learning technology for adult learners Discover how technological innovation can be applied now and how it will continue to shape the future of learning Adult learning is on the rise, and there is no mistaking technology's role; whether they're learning with or about technology, today's adult learners come with unique sets of needs and skills that demand specialized approaches. Traditional pedagogical

techniques don't transfer directly, and learning technology requires its own unique approach to development and use. Technology and Innovation in Adult Learning equips practitioners to further adult learning and shape the future of the field, while providing a rich perspective for classroom inquiry and research.

General Purpose Technology, Spin–Out, and Innovation Hiroshi Shimizu,2019-05-17 This book focuses on exploring the relationship between spin-outs from incumbents and the patterns of innovation in general purpose technology. Do spin-outs really promote innovation? What happens if star scientists leave the incumbents and establish a startup to target untapped markets? Entrepreneurial spin-outs have been recognized as an engine of innovation. General purpose technology, such as the steam engine in the Industrial Revolution, has been considered an engine of growth. This book provides new perspectives on how entrepreneurial spin-outs shape the patterns of innovation in general purpose technology by integrating theoretical findings in industrial organizations and includes innovation studies and detailed evidence from a longitudinal case study. Concretely, by

longitudinally exploring the technological development of laser diodes in the USA and Japan, this study examines how the existence or absence of an entrepreneurial strategic choice for spin-outs influences the patterns of subsequent technological development. The longitudinal analysis in this book shows that spin-outs could hinder the subsequent development of existing technology when that technology is still at a nascent level, because the cumulative effects of technological development could disappear if research and development personnel leave their parent firms in order to target different sub-markets. The findings of this book show that institutional settings designed to promote spin-outs do not necessarily promote innovation. The book offers novel theoretical insights into the relationship between institutions promoting spin-outs and the developments of general purpose technology.

The Handbook of Innovation and Services F. Gallouj,F. Djellal,2011-11-01 'This book represents a significant step towards dealing with the lacuna constituted by the inadequacy of the literature on the services. And, as such, it approaches its task from a variety of directions.' From the foreword by William J. Baumol, New York University, US 'The Handbook of Innovation and Services is an

exceptional volume. Its contributors, including Faïz Gallouj, William Baumol, Jean Gadrey, and Pascal Petit, are among the major thinkers in both the fields of the economics of services and the economics of innovation. Selected topics include the cost disease, services innovation in the global economy, social innovation in the services, and innovation and employment in services. The book, I am sure, will become a standard reference volume in both these fields in the ensuing years.' Edward Wolff, New York University, US This Handbook brings together 49 international specialists to address an issue of increasing importance for the world's post-industrial economies; innovation as it relates to services. Contemporary economies have two fundamental characteristics. Firstly, they are service economies in as much as services account for more than 70 per cent of the wealth and jobs in most developed countries. Secondly, they are innovation economies as recent decades have seen an unprecedented development of scientific, technological, organisational and social innovations. This Handbook expertly links these two major characteristics in order to investigate the role of innovation in services, an issue that until now has been inadequately explored and one that poses many theoretical and operational

challenges. This comprehensive volume encompasses the views of eminent scholars from a range of disciplines including economics, management, sociology and geography, and draws on a number of different analytical and methodological perspectives. With its multi-disciplinary approach this Handbook will be an invaluable reference source for academics and students in the fields of economics, management and the geography of services and innovation. Public authorities and managers in the service sector will also find this book fascinating.

Progressive Trends in Knowledge and System-Based Science for Service Innovation Kosaka, Michitaka,2013-10-31 Scientific investigation in the service industry has produced a major effect on productivity and quality in order to lead to new services. With ever-evolving internet technologies and information environments, system science and knowledge science seem to be an effective tool for service innovation in the 21st century. Progressive Trends in Knowledge and System-Based Science for Service Innovation illustrates new approaches to service innovation and new methodologies from the knowledge science and system science perspectives. Practitioners and researchers interested in

knowing more about practical theories and successful examples in service science will find this book to be a vital asset to their studies.

Service Business Model Innovation in Healthcare and Hospital Management Mario A. Pfannstiel,Christoph Rasche,2016-12-16 This book demonstrates how to successfully manage and lead healthcare institutions by employing the logic of business model innovation to gain competitive advantages. Since clerk-like routines in professional organizations tend to overlook patient and service-centered healthcare solutions, it challenges the view that competition and collaboration in the healthcare sector should not only incorporate single-end services, therapies or diagnosis related groups. Moreover, the authors focus on holistic business models, which place greater emphasis on customer needs and put customers and patients first. The holistic business models approach addresses topics such as business operations, competitiveness, strategic business objectives, opportunities and threats, critical success factors and key performance indicators.The contributions cover various aspects of service business innovation such as reconfiguring the hospital business

model in healthcare delivery, essential characteristics of service business model innovation in healthcare, guided business modeling and analysis for business professionals, patient-driven service delivery models in healthcare, and continuous and co-creative business model creation. All of the contributions introduce business models and strategies, process innovations, and toolkits that can be applied at the managerial level, ensuring the book will be of interest to healthcare professionals, hospital managers and consultants, as well as scholars, whose focus is on improving value-generating and competitive business architectures in the healthcare sector.

Innovations in Smart Cities and Applications Mohamed Ben Ahmed,Anouar Abdelhakim Boudhir,2018-03-21 This proceedings book showcases the latest research work presented at the Second Edition of the Mediterranean Symposium on Smart City Application (SCAMS 2017), which was held in Tangier, Morocco on October 15–27, 2017. It presents original research results, new ideas and practical development experiences that concentrate on both theory and practice. It includes papers from all areas of Smart City Applications, e.g. Smart Mobility, Big Data, Smart Grids, Smart Homes

and Buildings, clouds, crowds, mashups, social networks, and security issues. The conference stimulated cutting-edge research discussions among pioneering researchers, scientists, industrial engineers, and students from all around the world. The topics covered in this book also focus on innovative issues at the international level by bringing together experts from different countries. The scope of SCAMS 2017 included methods and practices that combine various emerging internetworking and data technologies to capture, integrate, analyze, mine, annotate, and visualize data in a meaningful and collaborative manner. A series of international workshops were organized as invited sessions during the SCAMS 2017:The 2nd International Workshop on Smart Learning & Innovative EducationsThe 1st International Workshop on Smart HealthcareThe 1st International Workshop on Mathematics for Smart CityThe 1st International Workshop Industry 4.0 and Smart Manufacturing

    Innovation for inclusive value–chain development Devaux, André,Torero, Maximo,Donovan, Jason,Horton, Douglas E.,2016-10-21 Governments, nongovernmental organizations, donors, and the private sector have increasingly embraced value-chain development (VCD) for stimulating economic

growth and combating rural poverty. Innovation for Inclusive Value-Chain Development: Successes and Challenges helps to fill the current gap in systematic knowledge about how well VCD has performed, related trade-offs or undesired effects, and which combinations of VCD elements are most likely to reduce poverty and deliver on overall development goals. This book uses case studies to examine a range of VCD experiences. Approaching the subject from various angles, it looks at new linkages to markets and the role of farmer organizations and contract farming in raising productivity and access to markets, the minimum assets requirement to participate in VCD, the role of multi-stakeholder platforms in VCD, and how to measure and identify successful VCD interventions. The book also explores the challenges livestock-dependent people face; how urbanization and advancing technologies affect linkages; ways to increase gender inclusion and economic growth; and the different roles various types of platforms play in VCD.

Advances in Technological Innovations in Higher Education Adarsh Garg,B V Babu,Valentina E Balas,2024-03-29 The evolution of technology in education can no longer be comprehended simply by

looking at the use of computers and networks. Technology is not just a supplementary tool to the conventional method of education. Education has to undergo a complete transformation with technological innovations for the sustainability of quality education as a system and not in silos. Sustainability in education also necessitates a more workable strategy to realize socially viable educational policies and practices which can focus more on personalized learning. Due to various factors like emerging technologies; changing needs of the learners; policy reforms for enhancing employability; and emphasis on uninterrupted education as in the case of the pandemic scenario of COVID-19, there is a need to steer a major transition in the education system. The education system has to be real and proficient for it to be instrumental to nurture an informed and knowledgeable society. This book on technological innovations in higher education is organized, largely, based on the diversity of higher education ecosystems that are supported by technological innovations. Various author viewpoints give insights into the full potential of technology as well as its risks in interrelated areas of higher education to work towards sustainability of value-based quality education across the

globe.

Business Innovation with New ICT in the Asia-Pacific: Case Studies Michitaka Kosaka,Jie Wu,Ke Xing,Shiyong Zhang,2020-09-09 This book clarifies the direction of business innovation using new ICT such as the Internet of things (IoT), artificial intelligence (AI), smartphones, and cloud computing through a series of case studies on successful trials and advanced businesses in the Asia-Pacific where many industry sectors have been growing successfully in the 21st century. ICT has been playing an important role in value creation for customers and in profit generation for providers, contributing to various service innovation and business innovation. Now, digitalization using IoT and AI provides solutions to address various issues in the human society, which is transforming services and businesses in the 21st century. **"What is the direction of the business innovation using new ICT?"** is a highly concerned question for business researchers and practitioners. Aiming to answer the question, this book conducts a number of cases studies in the Asia-Pacific region, including the Mainland China, Taiwan, Japan, Malaysia, Vietnam, as well as Australia. Among the studies, there are 4 cases from

ICT providers, 4 cases from traditional and services, and 6 cases from new ICT applications and businesses. Each case analyzes social needs and human desires, new value created, roles of new technologies, processes and difficulties in developing new businesses, the relationship among customers, providers, and stakeholders, value chain co-creation and optimization, factors of success, and business models. Finally, the direction of business innovation with new ICT in the Asia-Pacific is suggested by summarizing the findings from the case studies through the lens of the theoretical analysis in service science.

Service Research and Innovation Amin Beheshti,Mustafa Hashmi,Hai Dong,Wei Emma Zhang,2018-03-02 This book constitutes revised selected papers from the Australasian Symposium on Service Research and Innovation, ASSRI, held in Sydney Australia.The 11 full papers presented from ASSRI 2017, which took place during October 19-20, 2017, were carefully reviewed and selected from 26 submissions. The volume also contains 3 papers from ASSRI 2015, which took place during November 2-3, 2015, and one invited paper on the software development processes.The papers were organized in topical sections named: invited talk; modelling; design; quality; social, and application.

Service Innovation in Agricultural Business Sebastian Gack,2018-09-05 This thesis provides a holistic view on the topic via an exploratory interview study approach. Looking through a service-dominant-logic-lens, the author puts the insights of the farm automatization industry in relation to existing service innovation literature. The influence of interconnectivity is illustrated stepwise. Models of the present and the future value network are drawn, which show the expanding need of information exchange between the value network and the supply chain. Additionally, the author identifies the interplay of interconnectivity and the demand for transparency as the driver for new service innovations. To ensure the information exchange, the need of a non-proprietary data exchange platform in the agricultural sector is being suggested.

Tourism and Innovation C. Michael Hall,Allan M. Williams,2019-11-25 This ground-breaking volume on the relationships between tourism and innovation provides an overview of relevant innovation theories and related literatures on entrepreneurship, productivity, regional development and competitiveness, and their significance to contemporary tourism practices. Innovation is a key concept

in business and entrepreneurial studies and the broader social sciences. Yet, despite its policy and academic importance, historically little attention has been given to the role of innovation in tourism and the corresponding contribution of tourism-related human mobility to regional, firm, and product innovation. This book emphasises that innovation in tourism is much more than a series of technological innovations, as important as they are, and instead needs to be understood in an economic, social, and political context, with particular stress being placed on the extent to which innovations are shaped by the framework of governance and regulation, as well as by institutional factors and activities of individual actors and entrepreneurs. It is structured so as to introduce the reader to the overall significance of innovation at various levels and the role that innovation plays in firm and place competition. Supported with case studies throughout, this book is essential reading for all tourism students.

    Trade, Investment, Innovation and their Impact on Access to Medicines Locknie Hsu,2016-02-12 The last two decades have seen great economic change in Asia and this has impacted upon the

vexed question of access to affordable healthcare and medicines in many Asian states. In this book Locknie Hsu examines the issue of access to medicines in Asia from a fresh perspective which embraces trade and investment law, innovation, intellectual property law, competition policy and public health issues. Hsu explores the key evolving legal issues in these areas, including ASEAN integration, free trade agreement negotiations (such as those for the TPP), bilateral investment agreements and significant court decisions. The book goes on to present proposals for steps to be taken in addressing access to medicines in Asia and will be useful to academic researchers, regulators, law-makers and global organizations involved in the issues surrounding access to affordable healthcare and medicines.

Bridge Maintenance, Safety, Management, Life-Cycle Sustainability and Innovations Hiroshi Yokota,Dan M. Frangopol,2021-04-20 Bridge Maintenance, Safety, Management, Life-Cycle Sustainability and Innovations contains lectures and papers presented at the Tenth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2020), held in Sapporo, Hokkaido, Japan, April 11–15, 2021. This volume consists of a book of extended abstracts and a USB

card containing the full papers of 571 contributions presented at IABMAS 2020, including the T.Y. Lin Lecture, 9 Keynote Lectures, and 561 technical papers from 40 countries. The contributions presented at IABMAS 2020 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of maintenance, safety, management, life-cycle sustainability and technological innovations of bridges. Major topics include: advanced bridge design, construction and maintenance approaches, safety, reliability and risk evaluation, life-cycle management, life-cycle sustainability, standardization, analytical models, bridge management systems, service life prediction, maintenance and management strategies, structural health monitoring, non-destructive testing and field testing, safety, resilience, robustness and redundancy, durability enhancement, repair and rehabilitation, fatigue and corrosion, extreme loads, and application of information and computer technology and artificial intelligence for bridges, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on maintenance, safety, management, life-cycle sustainability and technological

innovations of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including engineers, researchers, academics and students from all areas of bridge engineering.

Innovative curriculum design Neal Petersen,Adri du Toit,Elsa Mentz,Robert J. Balfour,2023-09-29 The focus of this book is original research regarding the implementation of problem-based learning and pedagogies of play as active approaches to foster self-directed learning. With the Fourth Industrial Revolution (4IR) in mind, educational institutions need to rethink teaching and learning for the future. As such, active engagement can be encouraged, as evident in this book, where problem-based learning drives learning through real-world problems, while pedagogy of play focuses on innovative environments where the action of play and learning are integrated with the aim of developing SDL. The following are addressed in the chapters: an overview of problem-based learning and pedagogy of play, metaliteracy, playful problem-based learning tasks, computational thinking in game-based tasks and

geometry, solving puzzles, applying LEGO®, using drama as the pedagogy of play and implementing educational robotics. The empirical research findings disseminated in this book aim to inspire academics in the research focus area of self-directed learning with active learning approaches in the school and tertiary classroom that hold affordances to enhance 21st-century skills. Active learning is an umbrella term for pedagogies that mainstream student engagement, such as problem-based learning, cooperative learning, gamification, role-play and drama. This scholarly book highlights various engaging pedagogies.

Innovation in Medicine and Healthcare Yen-Wei Chen,Satoshi Tanaka,Robert J. Howlett,Lakhmi C. Jain,2022-07-05 This book presents the proceedings of the KES International Conferences on Innovation in Medicine and Healthcare (KES-InMed-22), held in Rhodes, Greece, on June 20–22, 2022. Covering a number of key areas, including digital IT architecture in health care; advanced ICT for medicine and health care; biomedical engineering, trends, research, and technologies; and healthcare support systems, this book is a valuable resource for researchers, managers, industrialists,

and anyone wishing to gain an overview of the latest research in these fields.

Innovation in a High Technology B2B Context Monika Maria Möhring,2014-04-18 Investment goods and services require the particular acceptance of buying, technical and strategic departments in customer organisations. The empirical evidence of large scale consumer (B2C) studies therefore bear no validity for B2B decision scenarios in large corporations. Monika Maria Möhring draws on deep insight in an industry-leading multinational corporation's automation, IT, MRO, warehousing and process innovation projects. She scrutinises the build-up and optimisation of sustainable supply relationships. This book depicts the idea, testing, and use of a comprehensive research agenda and methodology for value networks and dyads therein. It introduces a diagnostic industry-proven scorecard and highlights its application for managerial governance of strategic supply chains.
