**Opportunities to Improve Marine Forecasting** National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Marine Board,Committee on Opportunities to Improve Marine Observations and Forecasting,1989-02-01 Commerce and the general public—especially those living in increasingly crowded, highly developed low-lying coastal communities—rely heavily on accurate forecasts of marine conditions and weather over the oceans to ensure the safe and productive use of the sea and coastal zone. This book examines the opportunities to improve our ocean forecasting systems made possible by new observational techniques and high-speed computers. Significant benefits from these potential improvements are possible for transportation, ocean energy and resources development, fisheries and recreation, and coastal management.  
An Introduction to Sea State Forecasting Graham P. Britton,1981  
*Marine Weather Forecasting* J. Frank Brumbaugh,2000 Have you ever listened to a weather forecast stating there may be a slight chance of showers but the rain is coming down so hard you are seriously considering a lifejacket while standing on the dock? During such times, one suggestion to the forecaster runs through everyone's mind: Look out the window!! That is certainly one of the most accurate methods to forecast the immediate weather. Everyone knows the look of the sky when a thunderstorm or squall is moving in, but few know how to determine what is in store more than a few hours ahead. Frank has taken the mystery out of weather forecasting in his book Marine Weather Forecasting. He explains how to tell more about the weather, for hours and days to come, than any broadcast. But you must know what to look for when you go on deck. The wind, clouds, moon and sun all tell the story and Frank explains how to read these signs. Anyone can understand Frank's detailed descriptions of forecasting and the illustrations add to the ease. Caution: After reading this book you may never rely on another broadcast report. Covers practical applications of GRIB files, QuikSCAT wind measurements, and other modern resources. No subject is more important to every sailor than the wind and its direction.
