The Seamless City Rick Baker,2011-04-05 HOW DO WE KEEP AMERICA GREAT? Rick Baker, former mayor of St. Petersburg, Florida, provides a compelling—and challenging—answer: by making American cities great. And great cities are built first of all through strong leadership. During his two terms in office, Rick Baker worked toward a clear, uncompromising goal: to make St. Petersburg the best city in America. He led a downtown renaissance, rebuilt the most economically depressed area of the city, attracted businesses, worked to reduce violent crime, and made public schools a city priority—all with measurable results. The Seamless City offers practical advice, based on his nine years of experience in City Hall, to show how every mayor and city council can make their city dramatically better.

In The Seamless City you'll step behind the scenes of city government to learn: How maintaining basic amenities, like running water, requires constant vigilance—and sometimes tough decisions on the part of city leadership Why a vibrant downtown is essential to attract businesses and create jobs Why the most effective leadership is servant leadership How to find and implement the most effective solutions to a city's most challenging problems Why city government needs to regard the city as a seamless whole, with no section under-served or overlooked

  Seamless R and C++ Integration with Rcpp Dirk Eddelbuettel,2013-06-04 Rcpp is the glue that binds the power and versatility of R with the speed and efficiency of C++. With Rcpp, the transfer of data between R and C++ is nearly seamless, and high-performance statistical computing is finally accessible to most R users. Rcpp should be part of every statistician's toolbox. -- Michael Braun, MIT Sloan School of Management Seamless R and C++ integration with Rcpp is simply a wonderful book. For anyone who uses C/C++ and R, it is an indispensable resource. The writing is outstanding. A huge bonus is the section on applications. This section covers the matrix packages Armadillo and Eigen and the GNU Scientific Library as well as RInside which enables you to use R inside C++. These applications are what most of us need to know to really do scientific programming with R and C++. I love this book. -- Robert McCulloch, University of Chicago Booth School of Business Rcpp is now considered an essential package for anybody doing

serious computational research using R. Dirk's book is an excellent companion and takes the reader from a gentle introduction to more advanced applications via numerous examples and efficiency enhancing gems. The book is packed with all you might have ever wanted to know about Rcpp, its cousins (RcppArmadillo, RcppEigen .etc.), modules, package development and sugar. Overall, this book is a must-have on your shelf. -- Sanjog Misra, UCLA Anderson School of Management The Rcpp package represents a major leap forward for scientific computations with R. With very few lines of C++ code, one has R's data structures readily at hand for further computations in C++. Hence, high-level numerical programming can be made in C++ almost as easily as in R, but often with a substantial speed gain. Dirk is a crucial person in these developments, and his book takes the reader from the first fragile steps on to using the full Rcpp machinery. A very recommended book! -- Søren Højsgaard, Department of Mathematical Sciences, Aalborg University, Denmark Seamless R and C ++ Integration with Rcpp provides the first comprehensive introduction to Rcpp. Rcpp has become the most widely-used language extension for R, and is deployed by over one-hundred different CRAN and BioConductor packages. Rcpp permits users to pass scalars, vectors, matrices, list or entire R objects back and forth between R and C++ with ease. This brings the depth of the R analysis framework together with the power, speed, and efficiency of C++. Dirk Eddelbuettel has been a contributor to CRAN for over a decade and maintains around twenty packages. He is the

Debian/Ubuntu maintainer for R and other quantitative software, edits the CRAN Task Views for Finance and High-Performance Computing, is a co-founder of the annual R/Finance conference, and an editor of the Journal of Statistical Software. He holds a Ph.D. in Mathematical Economics from EHESS (Paris), and works in Chicago as a Senior Quantitative Analyst.

The Seamless Life Steven Garber,2020-01-14 We

all want to make sense of life, of who we are and why we are, and to know that what we do—day in and day out—matters. But daily demands often lead to a life that feels void of meaning and disjointed from our deepest beliefs. Steven Garber challenges us to move beyond our fragmented sense of reality and begin to see all we are and all we do—our work, play, relationships, worship, and loves—as significant to God. Once we discover that there is no chasm between heaven and earth, we are able to understand the coherence of the work of God and of our lives in the world. This is the seamless life—to see the truest truths of the universe woven into the very meaning of life, labor, learning, and liturgy.

   Seamless Anders Sorman-Nilsson,2017-02-13 Achieve brand success with smarter change management and seamless transformation Seamless is a guide for transforming your brand and heroically taking your business into the future. Anders Sörman-Nilsson, futurist and author of Digilogue (Wiley 2013), reveals the key factors to designing a cohesive and agile brand that is fit for the future. This book looks at on-the-ground implementation of Digilogue ideas, giving you a first-hand account of how emerging technology has evolved and disrupted the business

  Seamless Carolyn Lee,2018-04-19 SEAMLESS A story of eternal hope in the midst of great loss Desiring to share her journey about her son's illness, decline, and subsequent entry into eternal life, she heard Holy Spirit say: Wait until you stop bleeding. Her heart had bled profusely with grief. She asked, How was she and her family to adjust to living without their son's vibrant presence here with them? As more healing came, nearly two years later, the Lord spoke the title for this book: Seamless. As she reread her previous journal entries and began to outline the story, Carolyn began to see the seamless correlation between their son's journey from earth to heaven and that of the lily bulb's transformation from bulb to bloom. Her own faith began to emerge from the dark and lonely place of loss to unfolding revelation through the grace of her Lord, Jesus Christ. Three of their son's last words sum up the truth that love and hope are eternal. He boldly stated within his last few hours that he would love them ALWAYS AND FOREVER. She invites you to walk with her through this

journey of raw emotions, great loss, yet with surprising gains of God's generous grace. Learn from her story of how God, in His great mercy, will bring hope and encouragement to us all, when we trust Him with our darkest nights and gaping wounds. Whether you are struggling through a personal sickness or loss, or whether you have detoured from knowing and experiencing Father God's love, her prayer is that this testimony will help in restoring your hope. Carolyn Lee has co-pastored Jubilee Worship Center with her husband, Allen, since 1998. She has earned her bachelor of ministry and master of ministry degrees through Wagner Leadership Institute of Colorado Springs, Colorado. She has earned her doctorate of theology degree through Christian Life Educators Network out of Columbus, Georgia. Carolyn ministers in healing to individuals, at retreats, conferences, and through weekly Bible studies at her church. She and her husband live in Pleasant Garden, North Carolina, and have two sons (the youngest son now in heaven) and two daughters. They have nine grandchildren.

In her unique and remarkably readable way, Angie Smith—bestselling author of What Women Fear, Mended, I Will Carry You, and Seamless—helps you tie together all the loose, disconnected threads you find in the Bible, weaving them into a

beautifully crafted storyline. After reading Woven, when it comes to reading Scripture, you'll go: From confused to confident From lost to knowledgeable From separate stories to the One they are all about Because once you see the big picture, you'll see it on every page. Every time.
