Drive Daniel H. Pink, 2011-04-05 The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing*. Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The Surprising Truth About Motivating Others*). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy, mastery, and purpose—and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

The Joy of Search Daniel M. Russell, 2023-06-06 How to be a great online searcher, demonstrated with step-by-step searches for answers to a series of intriguing questions (for example, “Is that plant poisonous?”). We all know how to look up something online by typing words into a search engine. We do this so often that we have made the most famous search engine a verb: we Google it—“Japan population” or “Nobel Peace Prize” or “poison ivy” or whatever we want to know. But knowing how to Google something doesn't make us search experts; there's much more we can do to access the massive collective knowledge available online. In *The Joy of Search*, Daniel Russell shows us how to be great online researchers. We don't have to be computer geeks or a scholar searching out obscure facts; we just need to know some basic methods. Russell demonstrates these methods with step-by-step searches for answers to a series of intriguing questions—from “what is the wrong side of a towel?” to “what is the most likely way you will die?” Along the way, readers will discover essential tools for effective online searches—and learn some fascinating facts and interesting stories. Russell explains how to frame search queries so they will yield information and describes the best ways to use such resources as Google Earth, Google Scholar, Wikipedia, and Wikimedia. He shows when to put search terms in double quotes, how to use the operator (\*), why metadata is important, and how to triangulate information from multiple sources. By the end of this engaging journey of discovering, readers will have the definitive answer to why the best online searches involve more than typing a few words into Google.

**Everyday Problem-Based Learning** Brian Pete,Robin Fogarty,2017-10-16 Educators know that problem-based learning answers that perennial student question: "When will I ever use this in real life?" Faced with a meaty problem to solve, students finally "get" why they need to learn the content and are energized to do so. But here's the exciting part: problem-based learning doesn't require weeks of study or an end-of-year project. In this book, Brian Pete and Robin Fogarty show how you can use problem-based learning as a daily approach to helping students learn authentic and relevant content and skills. They explain how to engage students in each of the seven steps in the problem-based learning model, so students learn how to develop good questions, launch their inquiry, gather information, organize their information, create evidence, present their findings, and assess their learning. Using practical examples, they also describe how to help students master these seven important thinking skills: develop, analyze, reason, understand, solve, apply, and evaluate. To put all this in context, the authors offer seven "PBL in a Nutshell" lessons that can easily be incorporated in a single classroom period. Depth of thinking and ease of implementation--this is problem-based learning at its best.
