**Clinical Handbook of Air Pollution-Related Diseases** Fabio Capello,Antonio Vittorino Gaddi,2018-02-21 This book examines in detail the clinical implications of those diseases that either are primarily triggered by air pollution or represent direct consequences of air pollutants. The aim is to provide medical practitioners with practical solutions to issues in diagnosis and treatment while simultaneously furnishing other interested parties with crucial information on the field. The book introduces the concept that air pollution-related diseases constitute a new class of pathologies. A wide range of conditions mainly attributable to air pollution are discussed, covering different body systems and pollution impacts in subsets of the population. In addition to presenting state of the art overviews of clinical aspects, the book carefully examines the implications of current knowledge for social and public health strategies aimed at disease prevention and prophylaxis. The Clinical Handbook of Air Pollution-Related Diseases will greatly assist doctors and healthcare workers when dealing with the consequences of air pollution in their everyday practice and will provide researchers, industry, and policymakers with valuable facts and insights.

**Circulating microRNAs in Disease Diagnostics and their Potential Biological Relevance** Peter Igaz,2015-11-25 MicroRNAs as the endogenous mediators of RNA interference have experienced an unprecedented career in recent years, highlighting their pathogenic, diagnostic and potential therapeutic relevance. Beside tissue microRNAs, they are also found in body fluids, most notably in blood. Significant differences of circulating microRNA levels have been found in various diseases, making them candidates for minimally invasive markers of disease, for example tumor malignancy. The book focuses on the potential diagnostic applicability of circulating microRNAs in various diseases and their potential biological significance.

*Cells of the Immune System* Ota Fuchs,Seyyed Shamsadin Athari,2020-05-13 The cells of the immune system are lymphocytes (T-cells, B-cells and NK (natural killer) cells), neutrophils, eosinophils, and monocytes/macrophages. This book is an overview of some types of these cells and their role in recognizing and/or reacting against foreign material. The immune system is characterized by collaboration between cells and proteins. The development of all cells of the immune system begins in the bone marrow with a hematopoietic stem cell. Two chapters deal with neutrophils, three chapters with T-cells, four chapters with eosinophils, and other chapters review the immunomodulation of macrophages, the role of transcription factor KLF4 in regulating plasticity of myeloid-derived suppressor cells, immune reconstitution after allogeneic hematopoietic stem cell transplantation, and role of sorption detoxification in the therapy of acute radiation sickness.

**microRNAs in Toxicology and Medicine** Saura C. Sahu,2013-08-23 During the past decade it has become evident that microRNAsregulate gene expressions and control many developmental andcellular processes in eukaryotic organisms. Recent studies suggestthat microRNAs play an important role in toxicogenomics and arelikely to play an important role in a range of human diseasesincluding cancer. microRNAs in Toxicology and Medicine is a comprehensiveand authoritative compilation of up-to-date developments in thisemerging research area, presented by internationally recognizedinvestigators. It focuses on the role of microRNA in biology andmedicine with a special emphasis on toxicology. Divided into six parts, topics covered include: microRNA and toxicology - including environmentaltoxicants and perturbation of miRNA signaling; microRNA, andDisease States featuring microRNAs in drug-induced liver toxicity,microRNAs and Inflammation the regulatory role of microRNA inmutagenesis, microRNAs and cancer, and the role of microRNAs intumor progression and therapy, as well as current understanding ofmicroRNAs as therapeutic targets in cancer microRNAs and disease states microRNAs and stem cells microRNAs and genomics microRNAs and epigenomics microRNAs and biomarkers - including body fluid microRNAsas toxicological biomarkers, cell-free microRNAs as biomarkers inhuman diseases, and circulating microRNAs as biomarkers ofdrug-induced pancreatitis microRNAs in Toxicology and Medicine is an essentialinsight into the current trends and future directions of researchin this rapidly expanding field for investigators, toxicologists,risk assessors, and regulators in academia, medical settings,industry, and government.
