Crossing the Thames Estuary Roger Gaspar, 2022-08-01 The Thames Estuary is a complex and challenging area with narrow channels, shoal waters, determined tides and shifting sands, plus busy shipping traffic, three major ports and six wind farms in and around it. But its waters are also fascinating, interesting and have a wide selection of destinations to enjoy. This book describes 60 safe, viable and feasible routes between the Kent, Essex and Suffolk rivers for safe passage and wholly new time-planning tables which are now simplified with significantly additional and readily available information. The third edition retains all the popular features describing and illustrating each sector of each route, with waypoints and 'rolling road' diagrams, providing information and advice about potential or permanent hazards, the implications for the tide and guidance about shipping routes and anchorages. New simplified passage planning tables It includes new and unique passage planning tables which are simple, accurate and quick to use. Readers can select the most appropriate start time and will instantly see predicted arrival time so as to have sufficient time to continue up river to an ultimate destination.

Structural Transformation and Economic Development Banji Oyelaran-Oyeyinka, Kaushalesh Lal, 2016-09-13 This book examines long-term structural changes and the broad impact on economic development in regional comparative perspectives. The book analyzes data across Africa, Asia and Latin America. It looks at key variables of productivity growth, industrialization, poverty, urbanization, and employment. This book is concerned with understanding structural change dynamics and how it affects job creation, living standards, and the efficiency of productive cities through manufacturing productivity growth that benefits majority of citizens. With empirical evidence from a selected number of developing countries including China, India, Brazil, Nigeria and South Africa, the book attempts to present the considerable structural changes of these countries over the last few decades. It highlights that growth without the expected job creation is one of the distinct features of growth in emerging and developing countries. It suggests that countries may well record economic growth, whether through within sector productivity increase or through structural change, but this may not necessarily lead to employment, an important concern for long-term development.

Green Jobs for Sustainable Development Ana-Maria Boromisa, Sanja Tišma, Anastasya Raditya Ležaić, 2015-06-26 A 'green economy' must be built on 'green jobs' - the kind of employment that is low carbon, intended to reduce energy use and expected to restore environmental quality. But attempts to define exactly what a 'green job' is have led to varied and often contradictory answers. There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs? Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a 'dirty' industry? This book deals with the relationship between green concepts (green jobs, green economy, green growth) and sustainable development. It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing. In order to do so, general conceptual frameworks for green jobs, green economy, green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty. The selection includes advanced (the European Union, the United States of America, Australia, Canada, Republic of Korea, Japan) and developing countries (Mexico, China, Turkey and Brazil). The analysis presented in this book shows that although green concept is well-intentioned, its implementation depends on local circumstances – economic, political and social. Developed countries perceive green growth as a way to create new markets and demand, while developing countries rely more on labor intensive growth and less expensive green jobs. Thus, greening the economy does not diminish differences between rich and poor. This book is suitable for those who study and work in Ecological Economics, Sustainable Development and Labor Economics.

Gondwana Industrial Clays Patricia Eugenia Zalba,Martín Eduardo Morosi,María Susana Conconi,2016-08-30 This book is a study of the sedimentary and residual deposits of the Tandilia System, also known as the Sierras Septentrionales of Buenos Aires, Argentina. Offering an overview of the geology, stratigraphy, petrology, mineralogy and industrial applications of these deposits, it is organized geographically and according to the different districts of the province's diverse counties where economically important Neoproterozoic and Eopaleozoic clay reserves occur. Today, most of the sediments of the Tandilia basin are found in South Africa due to the breakup of the continents, which began in the Jurassic. This partly accounts for the difficulty in interpreting the geology of Tandilia. Apart from its extreme age and almost complete lack of fossil remains, for a long time the tectonics that affected the whole area presented a real challenge, as horst and graben structures added to the difficulty of geological correlations. Despite being 700 Ma old, most of the physical-chemical properties of the sediments have remained unchanged. The Microbially Induced Sedimentary Structures (MISS) found in the tidal and peritidal deposits also hold untouched information on the mystery of the beginning of life on earth. The fact that the Buenos Aires province is the country's first non-metallic productive center together with the high quality of its clay deposits, its easy access from main routes and proximity to large consumer centers have made these materials highly important in the province's construction industry.

Foreign Direct Investments in Emerging Asia Paul CHEUNG,Ammu GEORGE,Xuyao ZHANG,2023-05-31 Foreign direct investments (FDI) play an integral role in the growth story of Emerging Asian economies. As an essential source of foreign capital, FDI bolsters the path to economic recovery from recessions, including the one caused by the COVID-19 pandemic. This book is a collection of essays investigating the reconfiguration of FDI flows to the Emerging Asian economies of ASEAN, China and India following the pandemic and FDI policy reforms. This book broadly covers the trends in greenfield FDI flows to Emerging Asia in the context of three pertinent themes. Part I explores the rebalancing effects in global FDI flows after the COVID-19 pandemic, focusing on the experience of Emerging Asian economies. We also evaluate the nature of the pandemic's impact on existing FDI linkages between China and ASEAN. Part II delves into the implications of a cross-border policy framework such as the Belt and Road Initiative (BRI). In particular, we examine ASEAN trade activity after China's investments through BRI. We further discuss the future of BRI in ASEAN economies amid the emergence of global competitors. Part III of the book zooms in on the effectiveness of domestic FDI policy reforms. We discuss the cases of Indonesia Special Economic Zones and the Make in India initiative. This book is written for scholars, policymakers and industrial practitioners who wish to gain more knowledge on the recent FDI dynamics of Emerging Asia.

Food, Development, and Politics in the Middle East Marvin G. Weinbaum,2015-07-24 As the reality of a food deficit emerged in the Middle East, rural society and the agricultural sector – once viewed as peripheral to national development – swiftly rose up the policy agendas of nearly every Middle East country. This book, first published in 1982, looks at the complex interrelationships of food production, development schemes and politics in those countries. Dr Weinbaum considers the origins, nature, scope and political dimensions of the potential food shortfall and explores how food deficits could lead to changed international relations among states in the Middle East. He specifically examines the physical and technological limitations to increased food production, then assesses the major social, economic and political hurdles in the way of agricultural development, the effects of – and pressures for – agrarian reform, the bureaucratic policymaking process, and the domestic impact of foreign assistance policies. He concludes with an examination of the linkage between food supply availability and political stability.
