Homeland Security and Critical Infrastructure Protection Ryan K. Baggett, Brian K. Simpkins, 2018-07-11 A compelling overview of systems and strategies implemented to safeguard U.S. resources from a plethora of threats, the vulnerabilities and security gaps in these infrastructure systems, and options to enable the future security of the homeland. Since the first edition of this book was published in 2009, significant changes have occurred in the security landscape, both domestically and internationally. This second edition is thoroughly updated to reflect those changes, offering a complete review of the various security and resilience measures currently in place and potential strategies to safeguard life and property within the U.S. homeland. As noted in the U.S. Department of Homeland Security's National Preparedness Goal, the mission area of protection is vital to the homeland in its focus on actions to protect people, vital interests, and our nation's way of life. With that in mind, this book discusses strategies such as risk analysis and assessment, information sharing, and continuity planning. The authors focus on relevant and timely threats and hazards facing specific infrastructure components including, but not limited to, agriculture and food, banking and finance, water, energy, telecommunications, and transportation. The dynamic posture of critical infrastructure security and resilience (CISR) underscores the importance of an integrated, layered all-hazards approach. In describing this approach, the book includes new chapters on planning and guidance, public and private partnerships, cyber issues and threats, and careers in infrastructure protection. Additions such as discussion questions, learning objectives, and fundamental concepts for each chapter provide additional direction for instructors and students alike.

Regional Cooperation for Sustainable Food Security in South Asia Nagesh Kumar, Joseph George, 2019-08-02
This volume foregrounds the importance of regional cooperation in the context of food security challenges in South Asia. South Asia holds the key to global achievement of SDG targets of ending hunger and malnutrition – it accounts for nearly one-third of food-insecure people on the planet, with every third child suffering from stunting due to malnutrition. Similar food preferences, production systems, and the transboundary nature of agrarian ecosystems call for coordinated action by South Asian countries, complementing national actions dealing with food security challenges. In this volume, leading experts discuss the perspectives of key South Asian countries in leveraging regional cooperation for addressing food security challenges and reflect on the potential of cooperative actions in different areas. The book proposes a ten-point regional policy agenda covering cooperation for combatting climate change, regional trade liberalization, operationalization of regional food reserves, leveraging technology, sharing of good practices, regional institution building, coordinated positions in multilateral trade negotiations, addressing trans-boundary outbreak of livestock diseases, strengthening food safety standards, and the management of shared natural resources. A key volume on accomplishing SDGs in the South Asian context, this book will be of immense interest to policy makers, researchers, and development practitioners. It is also essential reading for scholars and researchers in the areas of development studies, South Asia studies, food security, environment and sustainability.

Fundamental Rights and Mutual Trust in the Area of Freedom, Security and Justice Ermioni Xanthopoulou, 2020-04-30
This book explores the relationship of mutual trust and fundamental rights in the Area of Freedom, Security and Justice (AFSJ) of the European Union and asks whether there is any role for proportionality. Mutual trust among Member States has long been presumed by the Court in a manner that mutual recognition was prioritised in regard to, but to the detriment of, the protection of fundamental rights. After thoroughly reviewing this relationship, this book offers a comprehensive framework of proportionality and explores its impact on the protection of fundamental rights in a mutual trust environment. It applies a theoretical and a normative framework of proportionality to two case studies (EU criminal and asylum law) by reference to several fundamental rights, enabling a carefully constructed analysis with useful parallels. The book argues that such analysis, based on proportionality, is not always desirable and helpful for the protection of fundamental rights in this area and thoroughly explores its impact on the protection of fundamental rights vis-à-vis mutual trust.

Regional Security Structures in Asia Ashok Kapur, 2018-10-24
Kapur argues that explanations of international relations in Asia in the post-Second World War period have relied too much on the Cold War as a key explanatory factor, and have not given enough emphasis to the useful concepts of 'regional power formation', 'conflict formation' and 'conflict resolution'. The author outlines these concepts and goes on to elaborate on them, and to apply them to three key Asian regions - northeast, southeast, and south Asia - discussing practical strategic issues in an historical perspective and arguing that these concepts, and other concepts which he discusses, are extremely helpful in making sense of the complex pattern of international relations in Asia.
