Information Security Kan Zhang,Yuliang Zheng,2004-09-21 The 2004 Information Security Conference was the seventh in a series that started with the Information Security Workshop in 1997. A distinct feature of this series is the wide coverage of topics with the aim of encouraging interaction between researchers in di?erent aspects of information security. This trend c-tinuedintheprogramofthisyear'sconference.Theprogramcommitteereceived 106 submissions, from which 36 were selected for presentation. Each submission was reviewed by at least three experts in the relevant research area. We would liketothankalltheauthorsfortakingtheirtimetopreparethesubmissions,and wehopethatthosewhosepapersweredeclinedwillbeableto?ndanalternative forum for their work. We were fortunate to have an energetic team of experts who took on the task of the program committee. Their names may be found overleaf, and we thank them warmly for their time and e?orts. This team was helped by an even larger number of external reviewers who reviewed papers in their particular areas of expertise. A list of these names is also provided, which we hope is complete. We would also like to thank the advisory committee for their advice and s- port.TheexcellentlocalarrangementswerehandledbyDirkBalfanzandJessica Staddon. We made use of the electronic submission and reviewing software s- plied by COSIC at the Katholieke Universiteit Leuven. Both the software and the ISC 2004 website were run on a server at UNC Charlotte, and were perfectly maintained by Seung-Hyun Im. We also appreciate assistance from Lawrence Teo in editing the proceedings.

Information Security and Privacy Huaxiong Wang,Josef Pieprzyk,Vijay Varadharajan,2004-06-22 The 9th Australasian Conference on Information Security and Privacy (ACISP 2004) was held in Sydney, 13–15 July, 2004. The conference was sponsored by the Centre for Advanced Computing – Algorithms and Cryptography (ACAC), Information and Networked Security Systems Research (INSS), Macquarie U- versity and the Australian Computer Society. Theaimsoftheconferencearetobringtogetherresearchersandpractitioners working in areas of information security and privacy from universities, industry and government sectors. The conference program covered a range of aspects including cryptography, cryptanalysis, systems and network security. The program committee accepted 41 papers from 195 submissions. The - viewing process took six weeks and each paper was carefully evaluated by at least three members of the program committee. We appreciate the hard work of the members of the program committee and external referees who gave many hours of their valuable time. Of the accepted papers, there were nine from Korea, six from Australia, ?ve each from Japan and the USA, three each from China and Singapore, two each from Canada and Switzerland, and one each from Belgium, France, Germany, Taiwan, The Netherlands and the UK. All the authors, whether or not their papers were accepted, made valued contributions to the conference. In addition to the contributed papers, Dr Arjen Lenstra gave an invited talk, entitled Likely and Unlikely Progress in Factoring. Thisyeartheprogramcommitteeintroducedthe BestStudentPaperAward. The winner of the prize for the Best Student Paper was Yan-Cheng Chang from Harvard University for his paper Single Database Private Information Retrieval with Logarithmic Communication.

Information Disclosure Julie-Anne Tarr,2001 An insurance contract is one of the most significant documents an average consumer signs in the course of his or her adult life. It defines the scope and measure of protection available to the policy holder should the risk eventuate. Insurers similarly view the information supplied during contract negotiations as critical. As it provides a basis for assessing the risk inherent in issuing the policy, failure to disclose information fully and accurately can skew calculation of the risk level inherent in the deal and of the appropriate premium payable. For this reason, insurance contracts have traditionally been treated as a special category of business dealing. Unlike standard contracts based on caveat emptor, – let buyers beware – insurance contracts bind both insurers and consumers to a higher duty of honesty and good faith in their dealings with each other. Failure to fully disclose information that may affect an insurer's calculation of risk in taking on the contract can potentially, therefore, result in the valid rejection of a policy holder's claim.Given the potentially devastating consequences claim denial carries for policy holders, this book outlines the current legal regulatory framework governing this area and assesses its capacity to provide a just and efficient set of standards for the exchange of this information in the pre-contracting stage.

The Obama Doctrine Michelle Bentley,Jack Holland,2016-07-28 President Obama's first term in office was subject to intense criticism; not only did many feel that he had failed to live up to his leadership potential, but that he had actually continued the foreign policy framework of the George W. Bush era he was supposed to have abandoned. This edited volume examines whether these issues of continuity have been equally as prevalent during the president's second term as his first. Is Obama still acting within the foreign policy shadow of Bush, or has he been able to establish his own approach towards international affairs, distinct from his predecessor? Within this context, the volume also addresses the idea of legacy and whether Obama has succeeded in establishing his own distinct foreign policy doctrine. In addressing these questions, the chapters explore continuity and change from a range of perspectives in International Relations and Foreign Policy Analysis, which are broadly representative of a spectrum of theoretical positions. With contributions from a range of US foreign policy experts, this book will be of great interest to students and scholars of US foreign policy, Foreign Policy Analysis and American politics.

Secure Connected Objects Dominique Paret,Jean-Paul Huon,2017-06-26 In this book, the authors focus on the concrete aspects of IoT (Internet of Things): the daily operation, on the ground, of this domain, including concrete and detailed discussion of the designs, applications and realizations of Secure Connected Things and IoT. As experts in the development of RFID and IoT technologies, the authors offer the reader a highly technical discussion of these topics, including the many approaches (technical, security, safety, ergonomic, economic, normative, regulations, etc.) involved in Secure Connected Objects projects. This book is written both for readers wishing to familiarize themselves with the complex issues surrounding networking objects and for those who design these connective things.

The Dilemma of Energy Security Asia Mukhtar,2023-05-25 Energy Security has emerged as a critical issue in the field of International Relations. Focusing on the case of Pakistan this book attempts to establish the main actors, dynamics, and contributing elements in the exacerbating energy security situation of the country. The Author supports that clean energy generation sources are abundantly available yet remain unutilized in the Pakistani situation. How much can South Asian Geopolitics and Pakistan's Partition be blamed for this Energy Security crisis? What political and institutional elements have profoundly deteriorated this situation? This volume highlights the challenges and opportunities regarding the country's Energy Security.
