101 Ways to Go Zero Waste Kathryn Kellogg,2019-04-02 Minimalism meets DIY in an accessible guide to household waste reduction We all know how important it is to reduce our environmental footprint, but it can be daunting to know where to begin. Enter Kathryn Kellogg, who can fit all her trash from the past two years into a 16-ounce mason jar. How? She starts by saying “no” to straws and grocery bags, and “yes” to a reusable water bottle and compostable dish scrubbers. In 101 Ways to Go Zero Waste, Kellogg shares these tips and more, along with DIY recipes for beauty and home; advice for responsible consumption and making better choices for home goods, fashion, and the office; and even secrets for how to go waste free at the airport. “It’s not about perfection,” she says. “It’s about making better choices.” This is a practical, friendly blueprint of realistic lifestyle changes for anyone who wants to reduce their waste.

The Internet of Toys Giovanna Mascheroni,Donell Holloway,2019-02-21 The Internet of Toys (IoToys) is a developing market within our Internet of Things (IoT) ecosystem. This book examines the rise of internet-connected toys and aims to anticipate the opportunities and risks of IoToys before their widespread diffusion. Contributors to this volume each provide a critical analysis of the design, production, regulation, representation and consumption of internet-connected toys. In order to address the theoretical, methodological and policy questions that arise from the study of these new playthings, and contextualise the diverse opportunities and challenges that IoToys pose to educators, families and children themselves, the chapters engage with notions of mediatization, datafication, robotification, connected and post-digital play. This timely engagement with a key transformation in children’s play will appeal to all readers interested in understanding the social uses and consequences of IoToys, and primarily to researchers and students in children and media, early childhood studies, media and communications, sociology, education, social psychology, law and design.

Poe for Your Problems Catherine Baab-Muguira,2021-09-07 When life's got you down and things aren't going your way, who better to turn to than Edgar Allan Poe? Discover how to say nevermore to your problems in this darkly comedic and refreshing self-help guide. Of all the writers anywhere, Poe would seem to be the least likely person you'd want to turn to for advice. His life was a complete dumpster fire: he had tons of failed relationships; not many people liked him; he was a drunk; he was always broke; he often went hungry; even his own death was somewhat of a mystery. However, that's also precisely the point. Somehow, even when Poe failed, he also persevered. Drawing deeply on his works and life, Catherine Baab-Muguira takes the familiar image of Poe in a new and surprising direction in this darkly inspiring self-help book. Despite what you might think, Edgar Allan Poe somehow is the perfect person to teach you to say Nevermore, problems! and show you how to use all the terrible situations, tough breaks, bad luck, and even your darkest emotions in novel and creative ways to make a name for yourself and carve out your own unique, notorious place in the world. An inspirational tale for black sheep everywhere, Poe for Your Problems will teach you how to overcome life's biggest challenges and succeed at work, love, and art—despite the odds and no matter your flaws.

Building Wireless Sensor Networks Smain Femmam,2017-09-26 Building Wireless Sensor Networks: Application to Routing and Data Diffusion discusses challenges involved in securing routing in wireless sensor networks with new hybrid topologies. An analysis of the security of real time data diffusion—a protocol for routing in wireless sensor networks—is provided, along with various possible attacks and possible countermeasures. Different applications are introduced, and new topologies are developed. Topics include audio video bridging (AVB) switched Ethernet, which uses the representation of a network of wireless sensors by a grayscale image to construct routing protocols, thereby minimizing energy consumption and data sharing in vehicular ad-hoc networks. Existing wireless networks aim to provide communication services between vehicles by enabling the vehicular networks to support wide range applications. New topologies are proposed first, based on the graphiton models, then the wireless sensor networks (WSN) based on the IEEE 802.15.4 standard (ZigBee sensors, and finally the Pancake graphs as an alternative to the Hypercube for interconnecting processors in parallel computer networks. Presents an analysis and protocol for routing in wireless sensor networks Presents ways to prevent attacks against this protocol Introduces different applications Develops new topologies

Immigrants of the Independence Valley Richard Erickson,2015-09-15 Between 1890 and 1930, approximately 1100 Nordic immigrants settled into or moved through the Independence Valley and the areas around Rochester, Washington. About 40% were Swedish speaking Finns, about 27 % were Finnish speaking Finns, 23% were Swedish, 8% were Norwegian and 2% were Danish. This book describes the settlement of the area and the assimilation of the immigrants into a new culture. Each immigrant, as identified through numerous sources, is listed. Included is a description of the various cultures, customs and daily life activities. The review of the community history focuses on schools, churches, cemeteries, local farms, logging and sawmills and social and volunteer organizations. A few stories from local immigrant families describe their personal experiences growing up in the area. The objective of the book is to provide an historical perspective of families settling into a new land far from their Nordic roots.

Building with Water Zoë Ryan,2010-01-01 Water has been an important topic in architecture and urban planning for years. The revitalization of the waterfront has been a prevalent trend in cities around the world. On the other hand, architecture also had to respond to the threat of floods. The theme of Building with Water is the use of water in architecture. It presents buildings that explicitly refer to water in their design and form. It establishes a typology of building by the water: residential structures, recreation facilities, industry and infrastructure, buildings for culture and art. The various design parameters are explored in four essays. Subsequently, twenty-two international projects are presented, organized according to their locations by a river, a lake or the sea. The authors' concern is not to show luxurious buildings in privileged locations but rather presenting projects that seriously grapple with the main criterion of the location—namely, water—in an ecologically sustainable way and respond to it with their design. Wasser ist seit Jahren ein wichtiges Thema in Architektur und Städtebau. «Building with Water» thematisiert die Verarbeitung von Wasser im architektonischen Entwurf; es werden Bauten vorgestellt, die sich in ihrer Gestaltung und Form ausdrücklich auf Wasser beziehen. Eine Typologie des Bauens am Wasser wird erstellt: Wohnbauten, Verkehrs- und Industriebauten, Bauten für Kultur und Freizeit. Ebenso werden einleitend klassische Beispiele des Bauens am/im/auf dem Wasser gezeigt, wie etwa Château de Chenonceaux an der Loire, Falling Water in Pennsylvania von Frank Lloyd Wright oder das Salk Institute in La Jolla, Kalifornien, von Louis I. Kahn. Geordnet nach ihren Standorten am Fluss, See oder Meer, werden dann etwa 20 internationale Projekte vorgestellt. Es geht den Autoren nicht darum, luxuriöse Bauten an privilegierten Plätzen zu zeigen, sondern Projekte darzustellen, deren Entwurf sich ernsthaft und ökologisch verträglich mit dem Hauptkriterium des Standortes – nämlich Wasser – auseinandersetzt und sich gestalterisch darauf bezieht

The Penguin Lady Carol A. Cole,2012 Penelope Parker lives with penguins from all over the Southern Hemisphere. Do the penguin antics prove too much for her to handle? Children count and then compare and contrast ten different penguin species as they learn geography. Includes For Creative Minds section.

Sense and Solidarity Jean Drèze,2019 This collection of Jean Drèze's essays offer a unique insight on issues of hunger, poverty, inequality, corruption, conflict, and the evolution of social policy in India over the last twenty years. 'Sense and Solidarity' enlarges the boundaries of social development towards a broad concern with the sort of society we want to create.

Privacy on the Ground Kenneth A. Bamberger,Deirdre K. Mulligan,2015-10-23 An examination of corporate privacy management in the United States, Germany, Spain, France, and the United Kingdom, identifying international best practices and making policy recommendations. Barely a week goes by without a new privacy revelation or scandal. Whether by hackers or spy agencies or social networks, violations of our personal information have shaken entire industries, corroded relations among nations, and bred distrust between democratic governments and their citizens. Polls reflect this concern, and show majorities for more, broader, and stricter regulation—to put more laws “on the books.” But there was scant evidence of how well tighter regulation actually worked “on the ground” in changing corporate (or government) behavior—until now. This intensive five-nation study goes inside corporations to examine how the people charged with protecting privacy actually do their work, and what kinds of regulation effectively shape their behavior. And the research yields a surprising result. The countries with more ambiguous

regulation—Germany and the United States—had the strongest corporate privacy management practices, despite very different cultural and legal environments. The more rule-bound countries—like France and Spain—trended instead toward compliance processes, not embedded privacy practices. At a crucial time, when Big Data and the Internet of Things are snowballing, Privacy on the Ground helpfully searches out the best practices by corporations, provides guidance to policymakers, and offers important lessons for everyone concerned with privacy, now and in the future.

Unpopular Privacy Anita Allen,2011-10-17 Can the government stick us with privacy we don't want? It can, it does, and according to Anita L. Allen, it may need to do more of it. Privacy is a foundational good, Allen argues, a necessary tool in the liberty-lover's kit for a successful life. A nation committed to personal freedom must be prepared to mandate privacy protections for its people, whether they eagerly embrace them or not. This unique book draws attention to privacies of seclusion, concealment, confidentiality and data-protection undervalued by their intended beneficiaries and targets--and outlines the best reasons for imposing them. Allen looks at laws designed to keep website operators from collecting personal information, laws that force strippers to wear thongs, and the myriad employee and professional confidentiality rules--including insider trading laws--that require strict silence about matters whose disclosure could earn us small fortunes. She shows that such laws recognize the extraordinary importance of dignity, trust and reputation, helping to preserve social, economic and political options throughout a lifetime.
