Cycling the Kettle Valley Railway Dan Langford, Sandra Langford, 2002 Tunnels and trestles are what cyclists remember most about the spectacular 600-km-long Kettle Valley Railway -- an abandoned rail bed in southern BC recognised as one of the premier rail trails in Canada. Destined to become part of the Trans Canada Trail system, this abandoned railway corridor and its connectors offer the cyclist everything from easy day riding to multi-day adventures through the magnificent scenery of southern BC between Midway and Hope. This edition documents many recent improvements with detailed maps, safety tips, history, and tourist facilities.

From Congregation Town to Industrial City Michael Shirley, 1994 a study of the southern community of Salem, North Carolina, a Moravian community of artisans and small farmers, as it was transformed over just a few decades during the 19th century from an agricultural region into the home of the smokestacks and office towers of the R.J. Reynolds Tobacco Company and the Wachovia Bank and Trust Company. Annotation copyright by Book News, Inc., Portland, OR

Vancouver Book of Everything Samantha Amara, 2008-08-15 The go-to book on Canada's west coast gem—from affordable activities to crime and punishment, slang to weather, people to politics, and much more. From “Gassy” Jack Deighton and the Klondike Gold Rush to the Chinese Head Tax to Japanese Internment, the Strathcona Protest, Vancouver Canucks and the 2010 Olympic Winter Games to profiles of the original “Dominic Da Vinci,” Larry Campbell, famed author Douglas Coupland, and environmentalist David Suzuki, no book is more comprehensive than the Vancouver Book of Everything. No book is more fun. Well-known Vancouverites weigh in on every aspect of their beloved city. Historian Chuck Davis gives us his top five events that shaped its history; author Jen Sookfong Lee gives us her top five best things about living in Vancouver; Vancouver Sun restaurant critic Mia Stainsby gives us the city's top five cheap eats and Global TV's meteorologist, Mark Madryga, offers up his top five Vancouver weather events. From the city's First People and infamous weather to its slang, heinous crimes, and the ubiquitous Japa dog, it's all here. Whether you are a lifelong resident or visiting for the first time, there is no better resource about the city of Vancouver, you'll love the Vancouver Book of Everything. “Even born-and-bred Vancouverites will doubtless find something of interest in the Vancouver Book of Everything.” —The Westender “The book combines tourist elements . . . with facts that even seasoned Vancouverites may not know.” —Miss604 “When your friends start asking questions about the city, hand them the Vancouver Book of Everything.” —Vancouver Sun

Classified Traci Sorell, 2022-02-17 Audisee® eBooks with Audio combine professional narration and sentence highlighting for an engaging read aloud experience! An American Indian Library Association Youth Literature Award Honor Picture Book Mary Golda Ross designed classified airplanes and spacecraft as Lockheed Aircraft Corporation's first female engineer. Find out

how her passion for math and the Cherokee values she was raised with shaped her life and work. Cherokee author Traci Sorell and Métis illustrator Natasha Donovan trace Ross's journey from being the only girl in a high school math class to becoming a teacher to pursuing an engineering degree, joining the top-secret Skunk Works division of Lockheed, and being a mentor for Native Americans and young women interested in engineering. In addition, the narrative highlights Cherokee values including education, working cooperatively, remaining humble, and helping ensure equal opportunity and education for all. A stellar addition to the genre that will launch careers and inspire for generations, it deserves space alongside stories of other world leaders and innovators.—starred, Kirkus Reviews

Cripples & Creeps: stories and a poem Jude Davison, 2016-08-11 Among these energetic and highly entertaining stories: a suicide victim sits in a Spartan window-less waiting room eager to share his rage with God; a transgendered spy must remain in hiding and navigate the constrictions of a mental institute; a spurned lover has an unexpected liaison with his sexy voiced Satnav; and two old men discover an unlikely friendship as each faces their imminent demise on a hospital palliative ward. Throughout these ten highly imaginative stories Cripples & Creeps reflects the struggles, epiphanies, desperation, loathing and simple joys of the everyday lives and not-so-everyday lives of people around us, ultimately revealing the layers of humanity in us all. The final story, Luck, ties the entire collection together in an unexpected and original way and reminds us of the fragility, serendipity and sometimes seemingly random nature of the world we live in.

Paper Fan Terry Gould, 2010-08-06 For 14K Triad official Steven Wong, faking his own death to escape trial was easy. But evading investigative reporter Terry Gould -- impossible. For 11 years Terry Gould has tracked the man known as the "paper fan" through the organized crime circles of six countries. This riveting, horrifying, yet often hilariously funny book is the story of that search, a daredevil journey through the seductions and terrors of Steve's world. Steven Wong is the "paper fan," a thirty-nine-year-old Hong Kong-born mobster. Raised in New York's Chinatown, he matured into crime in Vancouver, where he founded and headed the murderous Gum Wah Gang in the late 1980s and early '90s. In 1992, Wong "died" in a traffic accident in a remote area of the Philippines before he could be sent to jail for heroin trafficking, conveniently just after he'd taken out a million-dollar life insurance policy. His urn may still be interred in a Vancouver cemetery, but today, Interpol has a "Red Alert" arrest warrant out for Wong, and his updated file reads like a Hollywood action film -- a post-mortem panorama of organized criminal adventure that circles the Pacific Rim, from Macau to Japan, from Cambodia to the Philippines. Gould's search takes him into a world in which politicians, police, businessmen and criminals sprint along in one big pack, sometimes nipping each other's heels, sometimes licking each other's faces, and sometimes inviting one another back home for all-night mah-jong parties. Forced to work according to right-side-up rules, honest cops haven't had a chance of arresting Steve in his upside-down world. Four times, Terry Gould has traced Steven Wong through Asia's circles of corruption and pinned him down, but the law has let him slip away. Fifth time lucky? "Gangsters are good team players who generally exhibit a locker-room familiarity with other men. Still, it surprised me when Steve answered the door on Monday wearing only his polka-dot boxers, showing off his biceps and his chest tattooed with

the winged dragons and sharp-taloned eagle. He was talking on the phone and barely interrupted himself as he turned back into the house, whereupon I realized that the display was likely done on purpose. Neck to waist his back was totally covered by a stylized tableau of a dragon crawling against a background of tigers and flowers – a Triad montage no one outside his syndicate world was supposed to see.” -- from Paper Fan

Directory of Secondary Schools in the United States, Showing Accredited Status, Enrollment, Staff, and Other Data Mabel Frances Collins Rice, J. S. Carr, United States. Office of Education, Grace Stevens Wright, 1949 This publication is intended to be both a directory of secondary schools in the United States and roster of high schools which are accredited by state and regional accrediting agencies. It is the first comprehensive list of secondary schools the Office has issued. From the standpoint of accrediting it is a continuation of the Office's practice of issuing periodically a list of those schools which have been accredited by state and regional accrediting agencies.

ICGEO 2022 Ernawati Ernawati, Yurni Suasti, Iswandi Iswandi, Dedi Hermon, Robbi Rahim, 2023-06-20 The 2nd Annual Conference of the International Conference of Geography (ICGEO) was held on November 19, 2022, with the theme Discovering New Geography Trends. The conference was organized by the Department of Geography, Faculty of Social Sciences, Universitas Negeri Padang in West Sumatra, Indonesia. The conference utilized a combination of virtual and offline methods. The conference covered various topics, including advancements in geomorphology, meteorology, climatology, hydrology,

historical geography, transport geography, industrial geography, rural settlement geography, and the ecology of agricultural systems. Additionally, the significance of geography in area studies was discussed. The conference commenced by examining the progress made in the field of geography.

Subsequently, it explored diverse aspects of urban geography, the role of geography in physical and economic planning, studies on rural areas, and geographical research concerning local government. This monograph will be valuable for geography teachers, students, and practitioners.

Governing Medical Knowledge Commons Katherine J. Strandburg, Brett M. Frischmann, Michael J. Madison, 2017-10-12 *Governing Medical Knowledge Commons* makes three claims: first, evidence matters to innovation policymaking; second, evidence shows that self-governing knowledge commons support effective innovation without prioritizing traditional intellectual property rights; and third, knowledge commons can succeed in the critical fields of medicine and health. The editors' knowledge commons framework adapts Elinor Ostrom's groundbreaking research on natural resource commons to the distinctive attributes of knowledge and information, providing a systematic means for accumulating evidence about how knowledge commons succeed. The editors' previous volume, *Governing Knowledge Commons*, demonstrated the framework's power through case studies in a diverse range of areas. *Governing Medical Knowledge Commons* provides fifteen new case studies of knowledge commons in which researchers, medical professionals, and patients generate, improve, and share innovations, offering readers a practical introduction to the knowledge commons framework and a synthesis of conclusions and lessons. The book is also available as Open Access.

Secondary Superheroes of Golden Age Comics Lou Mougin, 2020-01-10 When Superman debuted in 1938, he ushered in a string of imitators--Batman, Wonder Woman, Captain Marvel, Captain America. But what about the many less well-known heroes who lined up to fight crooks, super villains or Hitler--like the Shield, the Black Terror, Crimebuster, Cat-Man, Dynamic Man, the Blue Beetle, the Black Cat and even Frankenstein? These and other four-color fighters crowded the newsstands from the late 1930s through the early 1950s. Most have since been overlooked, and not necessarily because they were victims of poor publication. This book gives the other superheroes of the Golden Age of comics their due.

Remote Sensing of Volcanic Processes and Risk Francesca Cigna, Deodato Tapete, Zhong Lu, Susanna K. Ebmeier, 2021-03-17 Remote sensing data and methods are increasingly being implemented in assessments of volcanic processes and risk. This happens thanks to their capability to provide a spectrum of observation and measurement opportunities to accurately sense the dynamics, magnitude, frequency, and impacts of volcanic activity. This book includes research papers on the use of satellite, aerial, and ground-based remote sensing to detect thermal features and anomalies, investigate lava and pyroclastic flows, predict the flow path of lahars, measure gas emissions and plumes, and estimate ground deformation. The multi-disciplinary character of the approaches employed for volcano monitoring and the combination of a variety of sensor types, platforms, and methods that come out from the papers testify to the current scientific and technology trends toward multi-data and multi-sensor monitoring solutions. The added value of the papers lies in the demonstration of how remote sensing can improve our knowledge of volcanoes that pose a threat to local communities; back-analysis and critical revision

of recent volcanic eruptions and unrest periods; and improvement of modeling and prediction methods. Therefore, the selected case studies also demonstrate the societal impact that this scientific discipline can potentially have on volcanic hazard and risk management.
