Improving the Visibility and Use of Digital Repositories Through SEO Kenning Arlitsch,Patrick S. OBrien,2013 Recent OCLC surveys show that less than 2 percent of library users begin their search on a library website, which is why search engine optimization (SEO) is so crucial. And though a survey of faculty researchers at four major universities showed that most consider Google and Google Scholar amazingly effective for their research, low Google Scholar indexing ratios for library institutional repositories is widespread because it ignores common library metadata. Arlitsch and OBrien, who have presented and published widely on the topic, show how to ensure that high-value content is visible to reseachers.

The SEO Toolbook is a wonderful companion to all books on SEO such as SEO For Dummies, SEO an Hour a Day, Search engine optimization 2016, etc. Understand How the SEO Toolbook Works First and foremost, the SEO Toolbook assumes a working knowledge of SEO. This toolbook has many wonderful free tools, but the tools alone are useless without a knowledge of how the game is played! (If you need that knowledge, we recommend you check out my SEO Fitness Workbook (on Amazon), online courses a, or call 800-298-4065 to learn more about my SEO one-on-one training and consulting services). Second, this book emphasizes only free tools. Despite the fact that there are quite a few paid SEO tools out there, none are any better than the free tools identified in this Toolbook. Indeed, in today's tight economy, why pay when you can get them for free? Not to mention, why pay when the most important element, i.e. a knowledge of how SEO is played to win, can't be obtained from

any tool? Third, we have reviewed each tool in the Toolbook for relevance and ease of use. Almost without exception, the tools in the Toolbook require nothing more than a Web browser and active connection to the Internet. Easy is just as important as free. Generally speaking, if a tool requires registration or has only a trial period, it has been excluded.
