Urban Cycling Madi Carlson,2015-11-01 Bicycle commuting is growing by leaps and bounds, especially among women. For many prospective bike commuters, simply seeing a bicyclist cruise past their car or bus while stuck in heavy traffic is enough to inspire a change. But many novice bike commuters crave a manual. The largest percentage of would-be bicycle commuters falls in the Interested But Concerned category they have questions about rules of the road, fears about traffic, or uncertainty about how to get started. Urban Cycling is the easy-to-navigate resource that answers it all! Author, advocate, and urban cyclist extraordinaire Madi Carlson provides accessible and appealing guidance, giving even the most hesitant bicyclists all the tools they need to join the cycling community. Carlson details everything from choosing a bike and gear accessories to safe riding techniques, city cycling infrastructure to route planning, and multi-modal commuting to basic maintenance. China's Maritime Silk Road Initiative and South Asia Jean-Marc F. Blanchard,2017-11-02 This book brings together a diverse range of responses to China's Marine Silk Road Initiative, which proposes to redraw the map of Asia, particularly South Asia. China's 21st Century Maritime Silk Road Initiative (MSRI) is a massive scheme to connect wide swaths of East, Southeast, South, and

West Asia through a dense web of interconnected hard and soft infrastructure involving ports, roads, logistics facilities, special industrial zones, and free trade and investment agreements. This book will be invaluable for students of Chinese foreign security and foreign economic policy, those interested in South Asia including Indian foreign security and economic policy as well as Indian relations with China, those attentive to international economic developments in East and South Asia, and those interested in the political and economic situation in specific MSRI participant countries such as Pakistan, Maldives, and Sri Lanka as well as their political and economic relations with China.

TRANSPORTATION PLANNING PRABIR KUMAR
SARKAR, VINAY MAITRI, G. J. JOSHI, 2014-11-14

Transportation planning plays a useful role as a lifeline for any society. It comprises applications of science and art, where a great deal of judgement coupled with its technical elements is required to arrive at a meaningful decision in order to develop transportation infrastructure facilities for the community. Transportation planning, thereby, helps in achieving a safer, faster, comfortable, convenient, economical and environment-friendly movement of people and goods traffic. In this context, an attempt has been made to write a comprehensive book on this subject, which not only deals with the basic principles and fundamentals of transportation planning but also keeps abreast of the current practices and policies conducted in transportation planning. Divided into 23 chapters, the book felicitously proffers the fundamental techniques of transportation planning and travel demand modelling, urban form and urban structure and their relation with transport pattern, land use-transport model, accessibility and mobility consideration in transport modelling, graph theory and

road network planning, cost benefit analysis, mass transport planning, applications of intelligent transport system, applications of software in transport planning, and transport policies. Exploiting a systematic approach avoiding prolixity, this book will prove to be a vade mecum for the undergraduate and postgraduate students of civil engineering and transportation engineering. Besides, this book is of immense benefit to the students opting a course on Master of Planning conducted in various institutes.

Highlights of the Book • Systematically organised concepts well-supported with ample illustrations • Prodigious illustrative figures and tables • Incorporates chapter-end summary to help in grasping the quirk concepts • Presents state-of-the-art data • Includes chapter-end review questions to help students prepare for examination

Mulberry and Peach Hualing Nie, Jane Parish Yang, 1998 A brilliantly crafted picaresque novel, sensual, harrowing and even comic, of an Asian-American woman's exile

What a City Is For Matt Hern, 2016-09-23 An investigation into gentrification and displacement, focusing on the case of Portland, Oregon's systematic dispersal of black residents from its Albina neighborhood. Portland, Oregon, is one of the most beautiful, livable cities in the United States. It has walkable neighborhoods, bike lanes, low-density housing, public transportation, and significant green space—not to mention craft-beer bars and locavore food trucks. But liberal Portland is also the whitest city in the country. This is not circumstance; the city has a long history of officially sanctioned racialized displacement that continues today. Over the last two and half decades, Albina—the one major Black neighborhood in Portland—has been systematically uprooted by market-driven gentrification and city-renewal policies. African

Americans in Portland were first pushed into Albina and then contained there through exclusionary zoning, predatory lending, and racist real estate practices. Since the 1990s, they've been aggressively displaced—by rising housing costs, developers eager to get rid of low-income residents, and overt city policies of gentrification. Displacement and dispossessions are convulsing cities across the globe, becoming the dominant urban narratives of our time. In *What a City Is For*, Matt Hern uses the case of Albina, as well as similar instances in New Orleans and Vancouver, to investigate gentrification in the twenty-first century. In an engaging narrative, effortlessly mixing anecdote and theory, Hern questions the notions of development, private property, and ownership. Arguing that home ownership drives inequality, he wants us to disown ownership. How can we reimagine the city as a post-ownership, post-sovereign space? Drawing on solidarity economics, cooperative movements, community land trusts, indigenous conceptions of alternative sovereignty, the global commons movement, and much else, Hern suggests repudiating development in favor of an incrementalist, non-market-driven unfolding of the city.

The Regional City Peter Calthorpe, William B. Fulton, 2001 In *The Regional City*, two of the most innovative thinkers in the field of urban design and land use planning offer a detailed look at this new metropolitan form: its genesis, physical structure, and policy foundation. Using full-color graphics and in-depth case studies, they provide a thorough examination of the emerging field of regional design, explaining how new forms of smart growth and neighborhood design can help put an end to sprawl, urban disinvestment, and squandered resources. This book is a must read for environmentalists, planners, architects, landscape architects, local officials, real estate developers,

community development advocates, and students in architecture, urban planning, and policy.--BOOK JACKET.

of gold launched a rush of humanity to California's Sierra foothills and many of those miners and minerals flowed into a settlement that grew where the American and Sacramento Rivers meet.
