Hence, both functional and moral responsibility, of the hospital towards society is inevitable. Work in hospital requires co-ordination and a very high degree of division of labour that is highly specialized and divided among a wide variety of professionals, semi-professionals and non-professionals requiring diverse skills and talents. Each is interdependent upon the other that requires excellent co-ordination and team effort. There are multiple lines of authority where the physician and the administration coincide. Ninety per cent of the work, which the medical administrators carry out in administration, does not require medical knowledge.
