Mobile Information Retrieval Fabio Crestani, Stefano Mizzaro, Ivan Scagnetto, 2017-07-19 This book offers a helpful starting point in the scattered, rich, and complex body of literature on Mobile Information Retrieval (Mobile IR), reviewing more than 200 papers in nine chapters. Highlighting the most interesting and influential contributions that have appeared in recent years, it particularly focuses on both user interaction and techniques for the perception and use of context, which, taken together, shape much of today's research on Mobile IR. The book starts by addressing the differences between IR and Mobile IR, while also reviewing the foundations of Mobile IR research. It then examines the different kinds of documents, users, and information needs that can be found in Mobile IR, and which set it apart from standard IR. Next, it discusses the two important issues of user interfaces and context-awareness. In closing, it covers issues related to the evaluation of Mobile IR applications. Overall, the book offers a valuable tool, helping new and veteran researchers alike to navigate this exciting and highly dynamic area of research.

Unique Urbanity? Tara Brabazon, 2014-11-21 This book investigates small cities - cities and towns that are not well known or internationally branded, but are facing structural economic and social issues after the Global Financial Crisis. They need to invent, develop and manage new reasons for their existence. The strengths and opportunities are often underplayed when compared to larger cities. These small cities do not have the profile of New York, London, Tokyo or Cairo, or second-tier cities like San Francisco, Manchester, Osaka or Alexandria. This book traces the current state of the

creative industries literature after the GFC, but with a specific focus. The specific - and worsening - conditions in third-tier cities are logged. The social and economic challenges within these regions are great, particularly with regard to health and health services, education, employment, social mobility and physical activity. This is not a study that merely diagnoses problems but raises strategies for third-tier cities to create both a profile and growth. The current research field is synthesized to reveal how cities are defined, constituted, developed and, in many cases, suffering decline. There is an imperative to build relationships with other urban environments. The book enters these under-discussed locations and reveal the scarred layering of injustice, signified by depopulation, dis-investment, economic decline and a reduction in public services for health, transportation and education, while also developing specific and innovative models for improvement. The vista summoned in *Unique Urbanity* is international, with strong attention to trans-local strategies that offer wide relevance, currency and opportunities for policy makers. While third-tier cities are often hidden, marginalized, invisible or demeaned, *Unique Urbanity* shows that innovation, imagination and creativity can emerge in small places.

Earth Force Shemer Kuznits, 2019-04-30 On the first day, a mist descended from the heavens blanketing Earth. On the second day, a cryptic message, 'Infusion commencing', appeared in the corner of everyone's eyes. On the third day, the sick were healed and the crippled walked again. On the fourth day, celebration and joy spread across the globe. And on the fifth day, the warping began... There was no warning. A mist descended from the sky, disabling all technology and causing a weird message to appear at the corner of everyone's eye. The situation grew even worse as animals and people started to warp, transforming into terrible monsters that prey on the livings. Within months, human civilization had crumbled. Unable to fight the seemingly-indestructible beasts, the survivors are reduced to cowering in reinforced shelters. Waiting for the end to come. Helpless. All seemed lost until a few brave souls discovered the secret of their new reality: the Tec

and how to use it to level up. Together they represent humanity's last best hope for salvation. But they first must find the answers to the mystery of their new existence. Their journey will require them to quickly adapt to alien technology, operate strange spaceships, and even befriend an extra-terrestrial merchant with an Inferiority Complex.

The Routledge Handbook of Digital Literacies in Early Childhood Ola Erstad, Rosie Flewitt, Bettina Kümmerling-Meibauer, Íris Susana Pires Pereira, 2019-07-05 As fast-evolving technologies transform everyday communication and literacy practices, many young children find themselves immersed in multiple digital media from birth. Such rapid technological change has consequences for the development of early literacy, and the ways in which parents and educators are able to equip today's young citizens for a digital future. This seminal Handbook fulfils an urgent need to consider how digital technologies are impacting the lives and learning of young children; and how childhood experiences of using digital resources can serve as the foundation for present and future development. Considering children aged 0–8 years, chapters explore the diversity of young children's literacy skills, practices and expertise across digital tools, technologies and media, in varied contexts, settings and countries. The Handbook explores six significant areas: Part I presents an overview of research into young children's digital literacy practices, touching on a range of theoretical, methodological and ethical approaches. Part II considers young children's reading, writing and meaning-making when using digital media at home and in the wider community. Part III offers an overview of key challenges for early childhood education presented by digital literacy, and discusses political positioning and curricula. Part IV focuses on the multimodal and multi-sensory textual landscape of contemporary literary practices, and how children learn to read and write with and across media. Part V considers how digital technologies both influence and are influenced by

children's online and offline social relationships. Part VI draws together themes from across the Handbook, to propose an agenda for future research into digital literacies in early childhood. A timely resource identifying and exploring pedagogies designed to bolster young children's digital and multimodal literacy practices, this key text will be of interest to early childhood educators, researchers and policy-makers.

At each stop they will be immersed in the actions, ideas, and original thoughts of these diverse and seminal thinkers, whose empirical methods and theoretical insights have inspired other sociologists and form the building blocks of the discipline. Exercises in the text create opportunities for students to activate their own imaginations and to also see familiar contemporary culture and society—TV shows, popular music, advertising, organizations, thought-leaders and authority figures, fads and movements, etc.—through fresh eyes. Digital Childhoods Susan J. Danby,Marilyn Fleer,Christina Davidson,Maria Hatzigianni,2018-04-03 This book highlights the multiple ways that digital technologies are being used in everyday contexts at home and school, in communities, and across diverse activities, from play to web searching, to talking to family members who are far away. The book helps readers understand the diverse practices employed as children make connections with digital technologies in their everyday experiences. In addition, the book employs a framework that helps readers easily

access major themes at a glance, and also showcases the diversity of ideas and theorisations that underpin the respective chapters. In this way, each chapter stands alone in making a specific contribution and, at the same time, makes explicit its connections to the broader themes of digital technologies in children's everyday lives. The concept of digital childhood presented here goes beyond a sociological reading of the everyday lives of children and their families, and reflects the various contexts in which children engage, such as preschools and childcare centres.
