Multilingual Digital Humanities Lorella Viola,Paul Spence,2023-12-28 Multilingual Digital Humanities explores the impact of monolingualism—especially Anglocentrism—on digital practices in the humanities and social sciences. The volume explores a wide range of applied contexts, such as digital linguistic injustice, critical digital literacy, digital learning, digital publishing, low-resourced, minoritised or endangered languages in a digital space, and multilingual historical intertextuality. These discussions are situated within wider work on language technologies, language documentation and international (in particular European) language-based infrastructure creation. Drawing on both primary and secondary research, this four-part book features 13 diverse case studies of infrastructural projects, pedagogical resources, computational models, interface building, and publishing initiatives in a range of languages, including Arabic, French, Russian, Portuguese, Italian, German, Spanish, Bengali, Hindi, Malayalam, and Tamil. All the debates are contextualised within a wider cultural frame, thus bridging the gap between the linguistic focus of the multilingual initiatives and wider discussion of cultural criticism in DH. Multilingual Digital Humanities recognizes the digital as a culturally situated and organic multilingual entity embedding past, present, and future worlds, which reacts to and impacts on institutional and methodological frameworks for knowledge creation. It is essential reading for students, scholars, and practitioners working in digital humanities and digital studies.

Sanctuaries of Earth, Stone, and Light Gloria Fraser Giffords, 2022-08-23 Over nearly three centuries, Jesuit, Franciscan, and Dominican missionaries built a network of churches throughout the “new world” of New Spain. Since the early twentieth century, scholars have studied the colonial architecture of southern New Spain, but they have largely ignored the architecture of the north. However, as this book clearly demonstrates, the colonial architecture of Northern New Spain—an area that encompasses most of the southwestern United States and much of northern Mexico—is strikingly beautiful and rich with meaning. After more than two decades of research, both in the field and in archives around the world, Gloria Fraser Giffords has authored the definitive book on this architecture. Giffords has a remarkable eye for detail and for images both grand and diminutive. Because so many of the buildings she examines have been destroyed, she sleuthed through historical records in several countries, and she discovered that the architecture and material culture of northern New Spain reveal the influences of five continents. As she examines objects as large as churches or as small as ornamental ceramic tile she illuminates the sometimes subtle, sometimes striking influences of the religious, social, and artistic traditions of Europe (from the beginning of the Christian era through the nineteenth century), of the Muslim countries ringing the Mediterranean (from the seventh through the fifteenth centuries), and of Northern New Spain’s indigenous peoples (whose art influenced the designs of occupying Europeans). *Sanctuaries of Earth, Stone, and Light* is a pathbreaking book, featuring 200 stunning photographs and over 300 illustrations ranging from ceremonial garments to detailed floor plans of the churches.

The House That She Built Mollie Elkmann, 2021-09 *The House That She Built* is inspired by and dedicated to the REAL women behind the home built exclusively by a team of women in construction, skilled tradeswomen, and women-owned companies. *The House That She Built* educates young readers about the people and skills that go into building a home. One by one, children learn about the architect, framer, roofer and many more as they contribute their individual skills needed to complete the collective project -- a new home. With illustrations that connect and empower and words that build upon each other with each page, this book will leave all kids (she, he, and they) excited about their own skills and interested in learning new ones.

Grow a Living Wall Shawna Coronado, 2015-02-15 Sometimes called Green Walls or Vertical Gardens, living walls are easier than ever to plan and grow! *Grow a Living Wall* is the first wall-gardening book to focus exclusively on the needs of home gardeners. Make your vertical garden environmentally friendly and sustainable. It's easy with author Shawna Coronado's help! One of her themed vertical gardens is stocked mostly with flowers to make it a haven for bees and other pollinators. Other gardens are filled with vegetables and herbs so anyone with an outdoor wall can grow their own food - beautifully! Even more gardens promote aromatherapy or medicinal plants. Some are designed to provide a green net of air filtration near a living area, or to protect exterior walls from exposure to direct sunlight, which helps to keep the indoors cool. In addition to the comprehensive, step-by-step information that explains the basics of vertical gardening, each of the 20 featured gardens has its own chapter filled with useful tips, stunning photography, and fascinating background stories that point out how much difference a small garden can make. Like author Shawna herself, the gardens you'll find in *Grow a Living Wall* are positive, life affirming, and sure to produce a smile or two.
