Faces Hanoch Piven,2002 Hanoch Piven has taken the art of caricature to a whole new level. With a minimalist stroke of his deft hand, combined with an object related to what the subject is noted for -- along with his sharp wit -- Piven presents his vision of the celebrities he portrays. The stories Piven tells about each face are enlivened by elemental puns, developed from a three-step creative process. As Piven is sketching the subject in pencil, he is coming up with a word or two to describe the person: Americana for Bruce Springsteen, media for Jesse Jackson. Now he goes out to the field to find the appropriate object, the field being anything from a toy store to a hardware store. Then he lays out all the stuff he has found and combines the objects, adding or culling as necessary, until he achieves the minimum amount of information the viewer needs to recognize the person. Thus we have Steven Spielberg's beard and moustache expressed with strips of film; Jesse Jackson's mouth is a speaker. Within the seven categories of TV, film, music, American politics, the world, finance, and miscellaneous, *Faces* by Hanoch Piven presents 76 deliciously wicked takes on the likes of such diverse folks as Sigmund Freud, Marilyn Monroe, and the Unabomber.

Transforming the Workforce for Children Birth Through Age 8 National Research Council,Institute of Medicine,Board on Children, Youth, and Families,Committee on the Science of Children Birth to Age 8: Deepening and Broadening the Foundation for Success,2015-07-23 Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that

they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. *Transforming the Workforce for Children Birth Through Age 8* explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. *Transforming the Workforce for Children Birth Through Age 8* offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.
