Science and Civilisation in China, Part 7, Military Technology: The Gunpowder Epic Joseph Needham,1987-01-22 The Gunpowder Epic is one of three planned publications on military technology within Dr Needham's immense undertaking. The discovery of gunpowder in China by the 9th century AD was followed by its rapid applications. It is now clear that the whole development from bombs and grenades to the invention of the metal-barrel hand gun took place in the Chinese culture area before Europeans had any knowledge of the mixture itself. Uses in civil engineering and mechanical engineering were equally important, before the knowledge of gunpowder spread to Europe in the thirteenth and fourteenth centuries. Dr Needham's new work continues to demonstrate the major importance of Chinese science and technology to world history and maintains the tradition of one of the great scholarly works of the twentieth century.

Food on Film Tom Hertweck,2014-10-30 This collection addresses the relative scarcity of work relating to food-film studies, showcasing innovative viewpoints about a popular, yet understudied, subject in film. The volume asks provocative questions about food and its relationship with work, urban life, sexual orientation, the family, race, morality, and a wide range of “appetites.”

SEALs Sub Strike: Operation Emerald Red S. M. Gunn,2009-03-17 The SEALs never rest -- but neither do their enemies. Borders have been redrawn, old enemies have fallen, and new ones have arisen from the ashes to threaten civilization. While the Cold War has ended, it has left in its wake a Russia more unpredictable, more unstable, and more dangerous than ever before. Grigory Rostov, a former commander in the elite Spetznaz special forces -- turned arms dealer, knows how to procure some of the former USSR's most destructive and vulnerable weaponry. Selling these next generation Weapons of Mass Destruction to his client will almost certainly precipitate a war between the US and China, opening the door for Russia to be reclaim its place as a the sole remaining superpower, and making Rostov a millionaire in the process. The only thing that can prevent Taiwan from becoming Ground Zero in the next World War: a top secret new unit within the Navy SEALs.

Leaving California to take part in the Tet Offensive in 1968, he finds the culture shock between the two overwhelming. Thrust into war and killing, he finds his approach to life and death must change quickly, but he holds fast to his beliefs. Though he saves others, his attitude toward killing and death changes for the worse, while his approach toward life improves. Sergeant Rock is a much better person for the choices he makes. In the course of a single Tet Offensive battle, his company loses all but 13 men, as 126 soldiers die in two hours. His faith increases when he meets his guardian angel during the battle. Sergeant Rock pushes his squad to their limits because he knows that death may lie just beyond the next bush. He may be only 20, but he thinks like an old veteran. With the body count in his mind, he wonders if he can ever be around normal people again. He experiences many horrors and watches friend after friend die as heroes. The hardships his squad must face, such as going without fresh water or clothes for 57 days, being shot down in a chopper, and just trying to stay alive are overwhelming. How much can our minds take before they crack? Sergeant Rock believes divine intervention is the only reason he is alive to tell his story.

Learn to Earn Peter Lynch, John Rothchild, 2012-11-27 Mutual-fund superstar Peter Lynch and author John Rothchild explain the basic principles of the stock market and business in an investing guide that will enlighten and entertain anyone who is high-school age or older. Many investors, including some with substantial portfolios, have only the sketchiest idea of how the stock market works. The reason, say Lynch and Rothchild, is that the basics of investing—the fundamentals of our economic system and what they have to do with the stock market—aren’t taught in school. At a time when individuals have to make important decisions about saving for college and 401(k) retirement funds, this failure to provide a basic education in investing can have tragic consequences. For those who know what to look for, investment opportunities are everywhere. The average high-school student is familiar with Nike, Reebok, McDonald’s, the Gap, and the Body Shop. Nearly every teenager in America drinks Coke or Pepsi, but only a very few own shares in either company or even understand how to buy them. Every student studies American history, but few realize that our country was settled by European colonists financed by public companies in England and Holland—and the basic principles behind public companies haven’t changed in more than three hundred years. In *Learn to Earn*, Lynch and Rothchild explain in a style accessible to anyone who is high-school age or older how to read a stock table in the daily newspaper, how to understand a company annual report, and why everyone should pay attention to the stock market. They explain not only how to invest, but also how to think like an investor.
