New Journalism Ecologies in East and Southern Africa Trust Matsilele, Shepherd Mpofu, Dumisani Moyo, 2023-03-24

This volume presents case studies of news media employing and integrating social media into their news production practices. It links social media use to journalistic practices and news production processes in the digital age of the Global South. Critically, the chapters look at seminal cases of start-up news media whose content is informed by trends in social media, ethical considerations and participatory cultures spurred by the wide use of social media. There has been considerable research looking at the potential of new media technologies, traditional journalism and citizen reporting. The extent to which these new media technologies and 'citizen journalism' have morphed or reconfigured traditional journalism practice remains debatable. Currently, there are questions around the limits of social media in journalism practice as the ethical lines continue to become blurred. It is this conundrum of the role of social media in the reconfiguration of the media, news making, production and participatory cultures that requires more investigation. Social media has also turned the logic of the political economy of media production on its head as citizens can now produce, package and distribute news and information with shoestring budgets and in authoritarian regimes with no license of practice. This new political economy means the power that special interest groups used to enjoy is increasingly slipping from their hands as citizens take back the power to appropriate social media journalism to counter hegemonic narratives. Citizens can also perform journalistic roles of investigating and whistleblowing but with a lack of, or limited, regulation. This volume seeks to explore and untangle these issues, and provides an invaluable resource for researchers across the field of journalism, mass media, and communication studies.

Genocide of thought Bisrat Woldemichael Handiso, 2015-09-04 Bisrat Woldemichael Handiso (1983) is an Ethiopian journalist who worked as an editor for different local newspapers. He was one of the founders of the Ethiopian Journalists Forum (EJF), an independent association made up of largely young journalists who advocate for greater press freedom in his country. In this function he ran training workshops and discussions on press freedom, visited journalist in prison and hospital and facilitated medical assistance for them. EJF was accused of being an illegal organisation associated with terrorism. Woldemichael Handiso was persecuted by the Ethiopian secret service and decided to save his life by fleeing to Nairobi, Kenya where he has received refugee status. This essay tells the sad story of the Ethiopian media which is faced – after a spell of press freedom and freedom of speech – with prosecution, often based on false accusations. The victims are brave journalists and media publishers who were detained or fled Ethiopia, so that they can continue reporting about the government's violation of human rights. The author's main message is that a government which doesn't respect media freedom, blocks a country's development in the broadest sense of the term. A publication of the Eva Tas Foundation. The Eva Tas Foundation encourages publication and promotion of texts that are, no matter where and no matter how, subject to censorship.

Media Law in Ethiopia Berihun Adugna Gebeye, Shimels Sisay Belete, 2019-06-13 Derived from the renowned multi-volume International Encyclopaedia of Laws, this analysis of media law in Ethiopia surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Ethiopia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

Corruption and Constitutionalism in Africa Charles M. Fombad, Nico Steytler, 2020-03-12 This collection of essays focuses on the critical issue of corruption that lies at the heart of the crisis of constitutionalism in

Africa. Most anti-corruption measures over the years have been inadequate, serving merely as symbolic gestures to give the impression something is being done. The African Union's declaration of 2018 as the 'African anti-corruption year', belated though it be, is an open recognition by African governments of the impact corruption will have on the continent unless urgent steps are taken. The key objective of this volume is to draw attention to the problem of corruption, the complexity of the situation, with all its multi-faceted social, political, economic and legal dimensions, and the need for remedial action.

The Global Ethiopian Diaspora Shimelis Bonsa Gulema, Hewan Girma, Mulugeta F. Dinbabo, 2024 A comprehensive historical, geographic, and thematic analysis of the multidimensional and dynamic migration experience of Ethiopians within and beyond Africa. Ethiopia is one of the largest African sources of transnational migrants, with an estimated two to three million Ethiopians living outside of the home country. This edited collection provides a critical examination of the temporal, spatial, and thematic dimensions of Ethiopian migration, mapping out its scale, scope, and destinations. The thirteen essays here (plus an introduction and conclusion by the volume's editors) offer a discussion of the state of knowledge and current debates on the diaspora and suggest alternative frameworks for interrogating and understanding the Ethiopian migration and diasporic experiences. Key time periods and literatures are identified to study Ethiopian transnational migration, moving from a survey of patterns in pre-twentieth century Ethiopia and on to changing trajectories in the imperial period and under succeeding postrevolutionary regimes. Geographically, the contour of the Ethiopian diaspora is outlined, identifying key destinations and patterns of return. In particular, the volume seeks to correct the traditional tendency to conflate the Ethiopian diaspora with North America and Europe by including areas that have long been marginalized, such as inter-Africa, Asia, and the Middle East. The objective is not to construct a simple cartography of migration but a critical analysis of national and global issues, policies, trends, and processes that shape the roots and routes of the migration dynamic. Thematically, this book aims to challenge the existing boundaries of Ethiopian migration and diaspora studies and raise important concerns about representation, ghettoization, and perpetuation of inequalities. Edited by Shimelis Bonsa Gulema, Hewan Girma, and Mulugeta F. Dinbabo. Contributors: Alpha Abebe; Amsale Alemu; Tekalign Ayalew; Kassaye Berhanu-MacDonald; Elizabeth Chacko; Marina de Re> Mulugeta F. Dinbabo; Peter H. Gebre; Hewan Girma; Mary Goitom; Shimelis Bonsa Gulema; Tesfaye Semela; Nassise Solomon; and Fitsum R. Tedla.

Challenging Authorities Arne S. Steinforth, Sabine Klocke-Daffa, 2021-09-20 When the notion of 'alternative facts' and the alleged dawning of a 'postfactual' world entered public discourse, social anthropologists found themselves in unexpectedly familiar territory. In their empirical experience, fact-knowledge accepted as true-derives its salience from social mechanisms of legitimization, thereby demonstrating a deep interconnection with power and authority. In this perspective, fact is a continually contested and volatile social category. Due to the specific histories of their colonial and post-independence experience, African societies offer a particularly broad array of insights into social processes of juxtaposition, opposition, and even outright competition between different postulated authorities. The contributions to the present volume explore the variety of ways in which authority is contested in Southern and Eastern Africa, investigating localized discourses on which institution, what kind of knowledge, or whose expertise is accepted as authoritative, thus highlighting the specificities and pluralities in 'modern' societies. This edited volume engages with larger theoretical questions regarding power and authority in

the context of (post)colonial states (neo)traditional authority, claiming space, conflict and (in)justice, and contestations of knowledge. It offers in-depth critical analyses of ethnographic data that put contemporary African phenomena on equal footing with current controversies in North America, Europe, and other global settings.

The Greening of Pharmaceutical Engineering, Applications for Physical Disorder Treatments M. R. Islam, Jahanara Monaf, A. O. Islam, 2023-03-21 The Greening of Pharmaceutical Engineering This fourth volume in a groundbreaking new four-volume set offers new philosophies and ideas for diagnosing and treating physical disorders, with a view toward bringing the pharmaceutical industry closer to chemical, environmental, and economic sustainability. This fourth and final volume in a four-volume series on the greening of pharmaceutical engineering presents evidence for the applications of new theories advanced in the first two volumes. Similar to the Volume three, which was for mental health, this volume presents applications for the diagnosis and treatment of physical disorders. Based on the groundwork laid in the first two volumes, the authors now embark on significant, real-life scenarios that apply their theory to physical disorder treatments. In keeping with the tradition of engineering solutions, practical yet sustainable solutions are presented. The fundamental flaws of the conventional approach to medicine is well known. However, this book does not stop at unearthing criticism of western medicine. It offers hope and recommends a series of solutions for both prevention and treatment of physical ailments. Both evidence in studies and the theory behind various treatments are analyzed. Furthermore, food and energy sources are discussed in general as they both directly impact human health. Physical and emotional activities are the other tangible and intangible factors that play a role in human health are discussed. All major diseases, scientific diagnoses, and their common treatments are presented and analyzed. Recommendations for lifestyle changes that could prevent and reverse syndromes are discussed with comprehensive analysis and evidence in medicinal studies. Seasonal flus as well as Covid-19 and other recent viruses with deadly consequences are discussed and ways to manage them through diet, exercises, and meditation are presented. Treatment plans, along with food recipes for specific ailments are presented with discussion of the logic behind these remedies. Valuable as a learning tool for beginners in this area as well as a daily reference for engineers and scientists working in these areas, this is a must-have for any library.

Before the Moon Mark Loughman, 2022-05-27 If we're not careful, the 2020's will go down in history as being more significant than the extinction of the dinosaurs, the fall of the Roman empire and the Industrial revolution all rolled into one. A handful of families with hybrid alien-human DNA who are thousands of years ahead of us technologically, have been manipulating our perceptions of reality since the first civilizations began. They are now nearing their end-game which is, a centralised one world government with a cashless society and social credit system that will make the worst form of any communist dictatorship seem like a picnic. When they installed the moon to invert the information waveform that composes planet earth, that was the end of an era known as the Golden age or the Garden of Eden. That monumentally affected our very existence and locked us into a matrix of the five

senses that we've been trapped in ever since. In present day, man is evolved enough to utilise the nano technology that these entities brought along but not enough to realise that it will be used against them. The original royal families have now sired enough hybrid offspring and placed them in positions of power around the world through secret societies to create this global corporate cabal. As more of the world's wealth is transferred to this Satanic cult via taxes, government bailouts, foreign aid, commercial monopolies, asset forfeiture, banking and foundations-charities etc, and they impose further restrictions on the populous, the plan to enslave mankind through bio-tech that has been four thousand years in the making is potentially nearing its fruition. If not enough people wake up from a collective mass-hypnosis spearheaded by social and mainstream media, (cabal owned and controlled) 2020 will be recorded in the history books as the year that they ushered in the New World Order.

Health Crises and Media Discourses in Sub-Saharan Africa Carol Azungi Dralega, Angella Napakol, 2022-05-24 This is an open access book which brings together leading scholars and critical discourses on political, economic, legal, technological, socio-cultural and systemic changes and continuities intersecting media and health crises in Sub-Saharan Africa. The volume extensively discusses COVID-19 but it also covers other epidemics, such as malaria, HIV/AIDS as well as "silent" health crises such as mental health---simmering across the subcontinent. The chapters fill knowledge gaps, highlight innovations, unpack the complexities surrounding the media ecosystem in times of health crises. They explore, among other issues, the politics of public health communication; infodemics; existential threats to media viability; draconian legislations; threats to journalists/journalism; COVID-related entrepreneurship, marginalization, and more. This is a timely resource for academics, advocacy groups, media practitioners and policy makers working on crises and media reporting, not just in Africa but anywhere in the global South.

Language Policy in Ethiopia Mekonnen Alemu Gebre Yohannes, 2021-03-22 This book examines the interplay and tensions between hegemonic and counter-hegemonic language policy and processes in Tigray, a regional state of Ethiopia, in the period of pre- and post-1991. Viewing language use and language policy as dynamic social and ideological processes, the book presents Ethiopia as an example of language policy creation and implementation over time, in a highly volatile political context. The case of Ethiopia is unique in that different language policies and practices were put in place as the country's leaders changed through political takeovers. Declared language policies were not always implemented, and those implemented were often protested. The book starts with an overview and review of language policy and planning, followed by a chapter on the history of such planning in Ethiopia. It then presents the methodology used for the study, and examines the appropriation of hegemonic LPP, patterns of resistance, schools and public sites as centers of resistance, and the emergence and development of specific patterns of language use in different regions of the country. The book ends with recommendations for future research, and draws the overall conclusion that since LPP is a dynamic and multilayered contextual process, official or de facto language policy is often undermined by overt or covert unofficial language policies, ideologies, mechanisms, and agents that result in different patterns of language use.

Media Ownership in Africa in the Digital Age Winston Mano, Loubna El Mkaouar, 2022-10-24 Who owns the media and communications in Africa today and with what implications? The book elegantly answers this urgent question by unpacking multiple dimensions of media ownership through rare and authoritative perspectives, including both historical and contemporary digital developments. It traces the evolving forms of ownership of media and communications in specific African contexts, showing how they interact with broader changes in and outside the continent. The book also shows how Big Techs, such as Meta (formerly known as Facebook), are involved in a

scramble for Africa's digital ecosystem and how their advance brings both opportunities and concerns about ownership and control. The chapters analyse evolving forms of ownership and their implications on media concentration and democracy across Africa. The book offers a nuanced account of how media ownership structures are in some instances captured with an ever-growing and complex ecosystem that also has new opportunities for public interest media. Offering a significant representation of the trends and diversity of existing media systems, the book goes beyond the postcolonial geographical divisions of North and Sub-Saharan Africa to highlight common patterns and significant similarities and differences of communications ownerships between and within African countries. The contributors expose media and communications ownership patterns in Africa that are centralised and yet decentralising and in some cases, battling, resurging and globalising.
