Proceedings Natural Gas Association of America,1917 Directory of membership: v. 1-

Natural Gas and Canada-United States Relations John Davis,Canadian-American Committee,1959 In view of the growing potential for transborder movements of natural gas, the Canadian-American Committee has sponsored this study of natural gas problems in North America. The study includes a brief appraisal of the development of this industry in Canada and the United States, as well as an assessment of potential natural gas resources. It describes in some detail the legislative background and the regulations which have influenced the development to date, and which will have an important bearing on the future course of gas transfers between Canada and the United States. The study is essentially an economic report; it does not attempt to assess political questions. It is also a factual report: Its principal purpose is to describe and analyze relevant information , not to set forth policy conclusions.

Governance of Arctic Offshore Oil and Gas Cécile Pelaudeix,Ellen Margrethe Basse,2017-07-14 Global energy problems will remain a challenge in the coming decades. The impact of climate change and the melting of polar sea ice opening up access to offshore hydrocarbon resources in the Arctic Ocean, raises questions for both civil society and the scientific community over drilling opportunities in Arctic marine areas. Disparities in approach

to the governance of oil and gas extraction in the Arctic arise from fundamental differences in histories, cultures, domestic constraints and substantive values and attitudes in the Arctic coastal states and sub-states. Differing political systems, legal traditions and societal beliefs with regard to energy security and economic development, environmental protection, legitimacy of decision making, and the ownership and respect of the rights of indigenous people, all affect how governance systems of oil and gas extraction are designed. Using a multidisciplinary approach and case studies from the USA, Norway, Russia, Canada, Greenland/Denmark and the EU, this book both examines the current governance of extraction and its effects and considers ways to enhance the efficiency of environmental management and public participation in this system.
